ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recoupment claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE(R): Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for failing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-455 (the Computer Matching and Privacy Protection Act of 1988) permits the government to verify information by way of computer matches.

MEDICARE PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep my records in accordance with the requirements of the services provided to individuals under the State's Title XIX plan and to furnish information regarding any payment claimed for providing such services to the State Agency or Dept. of Health and Human Services upon request.

I further agree to submit an amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of additional deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURES OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were personally indicated and necessary to the health of this patient and were personally furnished by me or my employee(s) under my personal direction.

NOTICE: The fact that the foregoing information is false, inaccurate and incomplete, I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for the information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information on collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA-Fixups/Clearance Officer, Mail Stop C4-28-05, Baltimore, Maryland 21244-1850. This address is for comments and suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Policy ID: 013873940011059

Tuesday September 6, 2016 Provider: Peter Guzinski DC

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain has been more sore. Ice helps. Headaches have been better. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, tingling, shooting, numb; level: 4/10. *Pain is frequent.* *Pain radiates to:* left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* left upper extremity. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches have been better the last 2 days. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, shooting; level: 4/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; walking; bending; sit to stand; performing ADL; squatting; reaching; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain neck and upper back; extension: WNL 60/60 with pain neck and upper back; left rotation: 70/80 with pain neck and upper back; right rotation: WNL 80/80 with pain neck and upper back; left lateral bending: 35/45 with pain neck and upper back; right lateral bending: 35/45 with pain neck and upper back. *Posture:* forward head carriage; rounded shoulders. *Strength:* all upper extremity

Encounter dated 09/06/2016 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 09/20/2016

musculature (C5-T1) were WNL and graded 5/5. **Hypertonicity & Tenderness** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild to Moderate. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive lower neck mostly to the left; maximum right lateral compression: Positive lower neck mostly to the left. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: 45/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. **Heel to toe walking:** WNL. **Gait pattern:** normal. **Strength:** all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. **Tenderness & Hypertonicity:** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. **Tenderness on palpation:** left SI: moderate to severe. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 30 degrees for lower back pain; Well leg raise: Positive right at 60 degrees for lower back pain; Bechterew: Positive left for left lower back pain; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for neck and middle back pain. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.22 (Other cervical disc displacement, mid-cervical region), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** improving, less headaches. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at L4-L5 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: improving, active lumbar rotation now WNL and without pain. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy

Encounter dated 09/06/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/20/2016

and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness. *Treatment schedule:* 2x/week for 5 weeks; Re-examination for 5 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); left cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; left upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck 4x day for 15 to 20 minutes per application for 5 days. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2016 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Peter J. Guzinski, D.C.

Friday September 9, 2016 Provider: Peter Guzinski DC

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain remains the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. since last visit.

Encounter dated 09/09/2016 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 09/20/2016

Pain: achy, dull, tingling, shooting, numb; level: 4/10. *Pain is frequent. Pain radiates to:* left upper extremity. **Exacerbates symptoms:** movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. **Alleviates symptoms:** nothing. **Numbness:** left upper extremity. **Weakness:** left upper extremity. **Recent infection or fever:** No. **Night sweats or pain:** No. **Headaches:** Patient stated that her headaches have been better the last 2 days. **Recent medical treatment for this condition:** None. **Changes in past medical history:** None.

Thoracic: Patient stated that her left shoulder blade remains sore. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior thoracic pain:** none. **Changes in this condition:** no change. **since last visit.** **Pain:** achy, dull, shooting; level: 4/10. *Pain is occasional.* **Exacerbates symptoms:** movement; bending; lifting; activities of daily living; reaching; activities of daily living. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Recent medical treatment for this condition:** None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She stated PT started lumbar decompression again which was tolerable at this time. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior low back pain:** none. **Changes in this condition:** no change. **since last visit.** **Pain:** sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* **Pain radiates to:** left posterior thigh and leg. **Exacerbates symptoms:** driving; lifting; sitting; standing; walking; bending; sit to stand; performing ADL; squatting; reaching; tying shoes; putting pants, socks and shoes on; household chores. **Alleviates symptoms:** nothing. **Numbness:** left foot. **Weakness:** none. **Bowel or bladder incontinence:** No. **Recent infection or fever:** No. **Night sweats or pain:** No. **Recent medical treatment for this condition:** None. **Changes in past medical history:** None.

Objective

Cervical: **Range of motion:** flexion: WNL 50/50 with pain neck and upper back; extension: WNL 60/60 with pain neck and upper back; left rotation: 70/80 with pain neck and upper back; right rotation: WNL 80/80 with pain neck and upper back; left lateral bending: 35/45 with pain neck and upper back; right lateral bending: 35/45 with pain neck and upper back. **Posture:** forward head carriage; rounded shoulders. **Strength:** all upper extremity musculature (C5-T1) were WNL and graded 5/5. **Hypertonicity & Tenderness** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild to Moderate. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive lower neck mostly to the left; maximum right lateral compression: Positive lower neck mostly to the left. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: 45/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. **Heel to toe walking:** WNL. **Gait pattern:** normal. **Strength:** all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. **Tenderness & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right

**Encounter dated 09/09/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/20/2016**

mild to moderate. *Tenderness on palpation:* left SI: moderate to severe. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 30 degrees for lower back pain; Well leg raise: Positive right at 60 degrees for lower back pain; Bechterew: Positive left for left lower back pain; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for neck and middle back pain. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.22 (Other cervical disc displacement, mid-cervical region), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: unchanged. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness. *Treatment schedule:* 2x/week for 4 weeks; Re-examination for 4 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); left cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; left upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised

Encounter dated 09/09/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/20/2016

patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck 4x day for 15 to 20 minutes per application for 5 days. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and/or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2016 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Peter J. Guzinski, D.C.

Thursday September 15, 2016 Provider: Peter Guzinski DC

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that she had injections on her neck Tuesday at DENT. She stated that initially she was really sore but better today. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, tingling, shooting, numb; level: 4/10. *Pain is frequent.* *Pain radiates to:* left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* left upper extremity. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches have been "ok." "I am still getting them 2-3 x a week but they have not been as intense". *Recent medical treatment for this condition:* DENT. *Changes in past medical history:* None.

Thoracic: Patient stated that her left shoulder blade remains sore. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, shooting, numb; level: 4/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain has been better than a few weeks ago. Patient seeing Dr. Siddique on September 28, 2016. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; walking; bending; sit to stand; performing ADL; squatting; reaching; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing.

Encounter dated 09/15/2016 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 09/20/2016

Numbness: left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain neck and upper back; extension: WNL 60/60 with pain neck and upper back; left rotation: 70/80 with pain neck and upper back; right rotation: WNL 80/80 with pain neck and upper back; left lateral bending: 35/45 with pain neck and upper back; right lateral bending: 35/45 with pain neck and upper back. *Posture:* forward head carriage; rounded shoulders. *Strength:* all upper extremity musculature (C5-T1) were WNL and graded 5/5. *Hypertonicity & Tenderness* Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild to Moderate. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck mostly to the left; maximum right lateral compression: Positive lower neck mostly to the left. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Shepplemans: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 45/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Heel to toe walking:* WNL. *Gait pattern:* normal. *Strength:* all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Tenderness & Hypertonicity* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. *Tenderness on palpation:* left SI: moderate to severe. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 30 degrees for lower back pain; Well leg raise: Positive right at 60 degrees for lower back pain; Bechterew: Positive left for left lower back pain; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for neck and middle back pain. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.22 (Other cervical disc displacement, mid-cervical region), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Cervical assessment:* unchanged. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

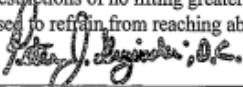

Encounter dated 09/15/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/20/2016

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness. *Treatment schedule:* 2x/week for 3 weeks; Re-examination for 3 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); left cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; left upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck 4x day for 15 to 20 minutes per application for 5 days. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2016 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

PHYSICIAN OR SUPPLIER INFORMATION

PATIENT AND INSURED INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO CONTINUATION PROGRAM ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authority released of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and non-medical information and whether the person has employer group health insurance, liability, no-fault, workers' compensation or other insurance which is responsible to pay for the services for which the claim is being made. See 42 CFR § 411.16(a). If item 9 is not checked, the patient's signature authorizes release of the information to the health plan or agency claim in Medicare assigned or TRICARE preferred rates; the "item 9" box does not affect the amount charged by the physician. Medicare rates are the amounts paid by Medicare for hospital care, physician services and supplies. TRICARE rates are the amounts paid by the Department of Defense for health services rendered to eligible beneficiaries. TRICARE rates are determined by the Department of Defense and the Department of Defense should be used in third party claims. Item 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and non-medical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If Item 9 is completed the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the claim - determination of the Medicare carrier or TRICARE fiscal intermediary as to full charge and the patient is responsible only for the deductible, co-insurance and non-covered costs. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary; this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured"; i.e., items 1a, 4, 6, 7, 8, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-lobbyback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service, by my employees under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI license #, or SSN) of the primary individual rendering such service is reported in the designated section for services to be considered "incident to" a physician's professional services; 7) they must be rendered under circumstances described above by my employee; 8) they must be integral, although incidental part of a covered physician service; 9) they must be of kinds commonly furnished in relation to office; and 10) the service is non-physician must be included on the physician's bill.

For TRICARE claims, I further certify that I (or any employee) who rendered services was not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government either civilian or military (refer to 5 USC 3636). For Black Lung claims, I further certify that the services performed were for a Black Lung related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 442.32).

NOTICE: Any one who gives false or inaccurate information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment, under Title 18, United States Code.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

This form is authorized by CHS, TRICARE and OMBP to: 1. You for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is under 36 CFR 203(h), 1871, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(b) and 484.5(a)(8), and 44 USC 3101-41 CFR 101 et seq and 10 USC 1079 and 1080, 41 USC 901 et seq and 30 USC 901 et seq 38 USC 613, E.O. 9397.

This information is not used to contact claimants under these programs to used to identify you and to determine your eligibility. It is also used to decide if the services you received are covered by the programs and to ensure that proper payment is made.

This information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs, that are other third parties paying to pay primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to give this information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE: (LAW) See the notice modifying system No. 09-05-0501, Med, "Medicare Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed, Oct 12, 1994, as updated and republished.

FOR OMBP CLAIMS: Department of Labor, Privacy Act of 1974, "Publication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See EBA-6, RSA-6, CBA-12, DVA-11, "CBA-10" as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services received are rendered by law.

DISLOSURE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation concerning title 36, statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recoupment claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a concern pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE PURPOSES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under this program for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claim under this program. Failure to furnish any other information such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-603, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records, as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, co-insurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

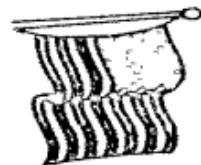

Attest: "I, [Signature], [Title], [Employer], [Address], [City], [State], [Zip] do hereby attest to respond to a collection of information unless I display a valid OMB control number. The valid OMB control number is: 10-000-0000-0000. I understand that our agency information collection is estimated to average 10 minutes per response, including the time to review instructions, research existing data, gather, enter, validate, and/or calculate and complete and review the information collection. If you have any comments concerning the accuracy of the time estimates or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: MRA Report Clearance Officer, Mail Stop C4-25-05, Baltimore, Maryland 21244-0013. This document is for electronic submission only. DO NOT MAIL COMPLETED CLAIMS TO CMS ADDRESS."

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a document containing any misrepresentation or any false, incomplete or misleading information may be guilty of a felony and subject to criminal penalties.

REFERS TO SECTION 17(1)(B) OF THE CROWN LANDS ACT

TRICARE, **AMG TRICARE PAYMENT**: A patient's assignment request that payment be made to the provider or authorizes release of any information necessary to process the claim and certifies to us the information contained in Block 1 is true, accurate, and complete. In the case of a Major Life Claim, the patient's signature and dates any other date to release to Medicare or another payor, and Medicare and Medicaid and no other payor may make payment to the provider for medical care services, including hospital insurance, whether or not the patient's assignment request or other insurance claim is submitted by the provider to Medicare or another payor. See 2 CFR 211.23(a). If it is not completed, the patient's signature authorizes release of the information in the Block 1 claim or *Assignment of Benefits* to Medicare or another payor. In Medicaid assignments to TRICARE providers, a physician's request to access the claim's determination of liability under the TRICARE full responsibility as the full charge and the physician's responsibility for the services rendered.

By AGISI LUNG AND FANG CHAIKE

the procedure must be to record the evidence and file the same in case, as provided in law. En-Block Litigation and FTCIA method/An accounting is required procedure and discussions among auditors.

SHAPES OF RAY TRAVERSING SUPPLEMENTAL BOUNDARY, FOG, AND BLACK LUMP

In reviewing the data from your recent dental visit, I easily note 1) the information on the form is all accurate and complete; 2) I have communicated openly with all applicable law enforcement and prosecutorial systems, which is required by law; 3) no records or information is required to allow the enforcement of either a civil or criminal case; and 4) I have no knowledge of any other information or records that may be held by other entities, agencies, or departments of state or federal government that would relate to this individual. I am also on record to say that I do not believe there is any information that would relate to this individual that would be held by me or my firm, or any other entity, or any other government agency or department, as required by Evidence Rule 104(c), that might be relevant to my professional services, that may fit under MCL 330.1, MCL 330.2, or SSBH as primary individual information unless it is explicitly set forth in the information provided to me. For your review, it is my understanding that a physician's professional services, if any, can be paid and/or reimbursed by the physician's employer. It is my belief that this may be a legal although incidental part of a normal physician service, as they must be fully compensated, limited to physician office visits, by the physician's employer.

For TRICARE claim, I further recall that (or our employee) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government, either civilian or military (to USCG, USMC, USNavy, USAirForce, and USSpaceForce).

No Part B will allow liability to be imposed on the State if it is recovered as required by assessing the same as quadruples (42 CFR 455.30).

NOTICE: Any one who misappropriates or steals such information and/or refuses to return payment from it, shall be liable to a fine of Rs. 10,000/- and imprisonment for a term not exceeding three months.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF GENETIC, PHARMACOGENOMIC AND BEHAVIORAL INFORMATION (PRIVACY ACT STATEMENT)

This information will be used to help determine if you qualify for the program, and to identify you as a customer. It is also used to determine your eligibility. It is also used to decide if the services and supplies you received

The information may be given in relation to services or goods, a contract, other economic, personal, social or cultural aspects, and other circumstances of a personal nature, for the exercise of consumer rights or protection of consumers. It can also relate to other areas, such as health and safety, and measures to enhance these programs. For example, it may be relevant to obtain information about the service you have used to a hospital or doctor. Additionally, it may be relevant to receive information about medical conditions or treatments of a patient.

FOR MEDICARE'S SURGEON See the service modifying system item #970-0801 listed. Office Maxxam Claims Records published in the Federal Register, Inc., 35 FR 177, page 394-395, April 19, 1990 as updated and republished.

OUR POLICY OF PAYMENT IS "INTEREST-ONLY". To ensure liquidity for investors, cash payments can be delayed until the payment upon occurrence of milestones and termination date of the term. Auskin makes no cash advance by us.

REFUND POLICY: Payment for services rendered will result in a refund if payment is made by a third party or if the client cancels their appointment. Payment for services rendered will result in a refund if payment is made by a third party or if the client cancels their appointment. Payment for services rendered will result in a refund if payment is made by a third party or if the client cancels their appointment.

If it is mandatory that you tell us if you know that another party is responsible for paying for your services. Section 1103B of the Social Security Act and 31 URC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 102-583, the "Consolidated Appropriations and Budget Protection Act of 1998," permits the government to withhold information from the Office of Personnel Management.

ENROLLMENT PAYMENTS / PROVIDER CERTIFICATION

I hereby agree to keep such records as are necessary to disclose fully the amount of services provided to individuals under the State's Title XXI plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I hereby promise to accept, as payment in full, the amount paid by the Medicaid program for my claim submitted for payment under that program, with the exception of collection costs, attorney fees or expenses or similar court-allowed charges.

SIGNATURE OF PAYEE (OR CARRIER): I certify that the services listed above were marketed to individuals and/or contrary to the health of the patient and were reasonably foreseeable by my employer for my personal deviation.

NON-ICL-The City to verify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment or omission, may be pursued under applicable Federal and State laws.

According to § 87(a)(2), Park View Acquisition Ltd., as person 1, is required to appear in a civil court of jurisdiction unless it displays a valid OMB control number. The valid OMB control number for this investigation is claim 1420-1107. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for review instructions, gathering relevant data resources, gathering the data needed, and completing and reviewing the information collection. If you have any comments concerning the use(s) or the time estimate(s) for this collection of information, please write to CMS 7370 Service Boulevard, Attn: PRA Report of Survey Officer, Hot Topic C4-96-0, Baltimore, Maryland 212-44-9600. This form is for comment and/or suggestions only. DO NOT MAIL COPY TO THE ADDRESSEE.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Tuesday September 20, 2016 Provider: Peter Guzinski DC

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain has been better. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, tingling, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* left upper extremity. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches continue to be 1 to 3 x a week. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Thoracic: Patient stated that her middle back remains sore. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, shooting; level: 4/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain remains the same. Patient seeing Dr. Siddique on September 28, 2016. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; walking; bending; sit to stand; performing ADL; squatting; reaching; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain neck and upper back; extension: WNL 60/60 with pain neck and upper back; left rotation: 70/80 with pain neck and upper back; right rotation: WNL 80/80 with pain neck and upper back; left lateral bending: 35/45 with pain neck and upper back; right lateral bending: 35/45 with pain neck and upper back. *Posture:* forward head carriage; rounded shoulders. *Strength:* all upper extremity

Encounter dated 09/20/2016 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 10/04/2016

musculature (C5-T1) were WNL and graded 5/5. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points*: left levator scapulae, bilateral upper trapezius. *Orthopedic tests*: maximum left lateral compression: Positive lower neck mostly to the left; maximum right lateral compression: Positive lower neck mostly to the left. *X-ray findings*: Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s)*: C5, C6. *Subluxations detected by*: motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points*: bilateral rhomboids. *Orthopedic tests*: Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s)*: T2, T3, T6, T7, T8, T9. *Subluxations detected by* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion*: flexion: 45/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Heel to toe walking*: WNL. *Gait pattern*: normal. *Strength*: all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Tenderness & Hypertonicity* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. *Tenderness on palpation*: left SI: moderate. *Trigger points*: left gluteus maximus. *Orthopedic tests*: Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 30 degrees for lower back pain; Well leg raise: Positive right at 60 degrees for lower back pain; Bechterew: Positive left for left lower back pain; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for neck and middle back pain. *Spinal subluxation level(s)*: L4, L5, Left SI. *Subluxations detected by*: motion and static palpation.

Assessment

Diagnosis: M50.22 (Other cervical disc displacement, mid-cervical region), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: improving, VAS score improved from a 4 to 3 out of 10. **Prognosis:** Guarded.

Post-treatment analysis: patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated

Encounter dated 09/20/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/04/2016

disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness. *Treatment schedule:* 2x/week for 3 weeks; Re-examination for 3 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); left cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; left upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck 4x day for 15 to 20 minutes per application for 5 days. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2016 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Peter J. Guzinski, D.C.

Monday September 26, 2016 Provider: Peter Guzinski DC

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain continues to improve. *Onset:* October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior neck pain:** none. **Changes in this condition:** improving, since last visit. **Pain:** achy, dull, tingling, shooting, numb; level: 2/10. **Pain is frequent.** **Pain radiates to:** left upper extremity. **Exacerbates symptoms:** movement of neck; driving; lifting; any kind of physical activity; reaching;

Encounter dated 09/26/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/04/2016

activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* left upper extremity. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches continue to be 1 to 3 x a week. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Thoracic: Patient stated that her middle back remains sore. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, shooting; level: 3/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain remains the same. Patient seeing Dr. Siddique on September 28, 2016. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; walking; bending; sit to stand; performing ADL; squatting; reaching; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain neck and upper back; extension: WNL 60/60 with pain neck and upper back; left rotation: 70/80 with pain neck and upper back; right rotation: WNL 80/80 with pain neck and upper back; left lateral bending: 35/45 with pain neck and upper back; right lateral bending: 35/45 with pain neck and upper back. *Posture:* forward head carriage; rounded shoulders. *Strength:* all upper extremity musculature (C5-T1) were WNL and graded 5/5. *Hypertonicity & Tenderness:* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck mostly to the left; maximum right lateral compression: Positive lower neck mostly to the left. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness:* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 45/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Heel to toe walking:* WNL. *Gait pattern:* normal. *Strength:* all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Tenderness & Hypertonicity:* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 30 degrees for lower back pain; Well leg raise: Positive right at 60 degrees for lower back pain; Bechterew: Positive left for left lower

Encounter dated 09/26/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/04/2016

back pain; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for neck and middle back pain. *Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.22 (Other cervical disc displacement, mid-cervical region), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: improving, VAS score improved from a 3 to 2 out of 10. *Prognosis:* Guarded.

Post-treatment analysis: patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

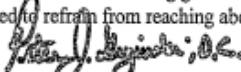

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness. *Treatment schedule:* 2x/week for 2 weeks; Re-examination for 2 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); left cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; left upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest

Encounter dated 09/26/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/04/2016

exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck 4x day for 15 to 20 minutes per application for 5 days. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2016 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

PHYSICIAN OR SUPPLIER INFORMATION

PATIENT AND INSURED INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal offense punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, infinity, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If Block 9 is completed, the patient's signature authorizes release of the information to the health plan or agency whom, if Medicare assigned or TRICARE participation exists, the physician agrees to except the charge determination of the Medicare carrier or TRICARE fiscal intermediary by the "fee charge" and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based on the charge determination of the Medicare carrier or TRICARE fiscal intermediary if the fee less than the charge submitted. TRICARE is not a health insurance program but makes payments for health benefits provided through certain facilities with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned as "Insured"; i.e., items 1a, 4, 6, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare program; 3) I have provided or will provide sufficient information required in allow the government to make an informed decision and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or have been furnished incident to my professional service by my employee under my direct supervision, except or otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering such service is reported in the designated section; 7) services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician's service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 8536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to use your information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 203(d)(1), 1072 and 1074 of the Social Security Act as amended, 42 CFR 411.24(a) and 104.5(a) (5), and 44 USC 3101-31 CFR 101 et seq and 10 USC 1079 and 1088; 5 USC 8101 et seq and 38 USC 901 et seq; 38 USC 813, E.O. 13077.

The information we obtain to complete claims and/or these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs, and to insure that proper payment is made.

The information may also be given to other providers of services, or more, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third party payors to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in system of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, "Reproduction of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, 808 ESA-5, ESA-6, ESA-12, ESA-13, FSA-3U, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and reimbursement due. See the conditions described in the notice by law.

FOR DOD USHRS: Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services under the Dept. of Transportation, and other relevant entities for purposes of, under Title 37 USC 1710(b)(1)(B) to the Dept. of Justice for supervision of the Secretary of Defense in civil actions in the United States, Service, Service, joint, collective, or single, and consumer reporting to others in connection with recoupment claims; and to Defense and Office in relation to its programs - mode or the conduct of this program in accordance with pertinent Appropriate disclosure may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on written, verbal, or electronic media, if one, application, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefit, cost and claims, and administrative action, related to the operation of TRICARE.

DISLOYALTY/FRAUD: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered in the amount charged would prevent payment of claim under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FEDA could be denied upon verification.

It is mandatory that you let us know if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 9801-9812 provides penalties for withholding this information.

You should be aware that P.L. 100-508, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for services furnished such individuals under the State's Agency or Dept. of Health and Human Services may request.

I further agree, if payment in full, the amount paid by the Medicaid program for these claims submitted for payment under that program, will be the exception of all my other deductible, co-insurance, co-payment, and related charges.

ON MATURE OF PHYSICIAN (OR CARRIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employees under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claim, statement, or documents, or commitment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Computer Matching and Privacy Protection Act of 1988, if you or my organization fail to respond to a collection of information unless it displays a valid OMB control number, The valid OMB control number for this collection is 1170-0127. The time limit for calculating this information is estimated to average 10 minutes per response. Including the time to review instructions, gather relevant data, and complete and review the information collection, if you have any comments concerning the accuracy of the time estimate or suggested collection, please write to: OMB, 1209 Pennsylvania Avenue, Washington, DC 20585, Attn: FOIA Report Clearance Officer, Mail Stop G-48-03, Baltimore, Maryland 20585-0048. This is a required document and must be submitted to OMB. DO NOT MAIL COMPLETED FORMS TO THIS ADDRESS.

HEALTH INSURANCE CLAIM FORM

APPROVED BY NATIONAL UNIFORM CLAIM COMMITTEE (NUCC) 03/12

GEICO Ins Co NY
P.O. Box 9507
Fredericksburg, VA 22401

CARRIER ↑

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any故意的、虚假的、不完整的或误导性的信息可能因犯有刑事罪而受到法律制裁并可能被处以刑事处罚。

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and non-medical information and whether the person has employer group health insurance. Individual, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(p). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE preferred option, the physician agrees to accept the charge determined by the Medicare carrier or TRICARE local rate "as is" as the full charge and the patient is responsible only for the resulting co-payment and co-insurance. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE local intermediary if this is less than the charge submitted. TRICARE is not a health insurance program; it makes payment for health benefits provided through certain affiliations with the Department of Defense. Information on the patient's sponsor should be provided in those items contained in Item 1, e.g., Items 4, 6, 7, 8, and 11.

BLOCK LUNG AND FECA CLAIMS: The provider agrees to accept the amount paid by the Government as payment in full. See Block Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA, AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions which are available from the HealthCare Connection; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) the claim, if other submitted by me or on my behalf by my designated holding company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment, including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this claim were medically necessary and personally furnished to my patient/service by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for cash service rendered incident to my professional service, the identity (legal name and NPI, license #, or SBN) of the primary individual rendering cash service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incident to, a covered physician service, 3) they must be of goods commonly furnished in physician's office, and 4) the services of non-physicians must be included in the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 8330). For Block-Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and CMCW to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(g), 1612, 1612 and 1674 of the Social Security Act as amended, 42 CFR 411.24(p) and 42 CFR 40 (b), and 44 USC 3101, 41 CFR 101 et seq and 10 USC 1079 one 1086; 5 USC 8.01 et seq; and 30 USC 601 et seq; 30 USC 613; E.O. 13377.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties to pay primary to Federal programs and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 98-70-0001, titled, "Covered Medicare Claims Record," published in the Federal Register, Vol. 65 No. 177, page 37549, Wed. Sept. 16, 1998, or as updated and republished.

FOR CMCW CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 65 No. 40, Wed Feb. 28, 1990. See ESA-5, FSA-8, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/benefits received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompense claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care, or matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, contribution of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-863, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer match.

NON-CASH PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the amount of services provided to individuals under the State's TDS-XDX plan and to furnish information regarding any payment claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept as payment in full the amount paid by the TDS-XDX program for those claims submitted for payment under that program, with the exception of authorized deductible, copayments, co-payment or similar cost-sharing charges.

SIGNATURE OF PHYSICIAN (OR SUMMUR): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: The is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no person is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0388-197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to CMS, 7500 Security Boulevard, Attn: PRA Repairs Clearance Officer, Mail Stop C-28-06, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entry to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, auto, life, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.34(a). If item 10 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health care provided through certain entities with the Uniformed Services. Information on the patient's sponsor should be provided in items 10a, items numbered 1-7, items 16, 4, 6, 7, 9 and 11.

BLACK LUNG AND PECOA CL-111B

The provider agrees to accept the amount paid by the Government as payment in full. See DRG Long and PECOA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, PECOA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided all information requested to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or my entity, is my designated billing company, employee and all applicable Medicare and/or Black Lung regulations, requirements, and program instructions for payment including but not limited to the Federal and State laws, Executive Orders, and regulations; 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional services, by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for such service rendered incident to my physician's services, the validity (legal name and NPI) license #, or SSN of the primary individual rendering each service is reported in the designated section. For services to be rendered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician's services, 3) they must be of kinds commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's billings.

For TRICARE claims, I further certify that I (or any employee) who rendered services can not be an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 10 USC 50-56). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless the form is received as required by coding, law and regulations (42 CFR 430.37).

NOTICE: Any one who misrepresents or furnishes false or inaccurate information to Medicare, Medicaid, or the VA may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, PECOA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by GHS, TRICARE and OWCP to collect for information provided in the administration of the Medicare, TRICARE, PECOA, and Black Lung programs. Authority to collect information is in section 206(a), 1862, 1872 and 1874 of the Social Security Act as amended; 42 CFR 411.2(f)(1) and 42 CFR 414.56; 46 CFR 101.101 et seq. and 10 USC 1079 and 1086, 5 USC 8101 et seq; and 30 USC 901 et seq; 38 USC 813; E.O. 13677.

The information we obtain to complete claims under these programs is used to identify you, and determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties pay to a primary care physician... and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine use of information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 03-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Repopulation of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See EBA-5, EBA-6, EBA-12, EBA-13, EBA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPAL PURPOSE(S): To evaluate liability for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs; the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; in the Dept. of Justice in representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with nonpayment claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE(S): Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged could prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under PECOA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3810-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services to the State Agency or Dept. of Health and Human Services as my agent.

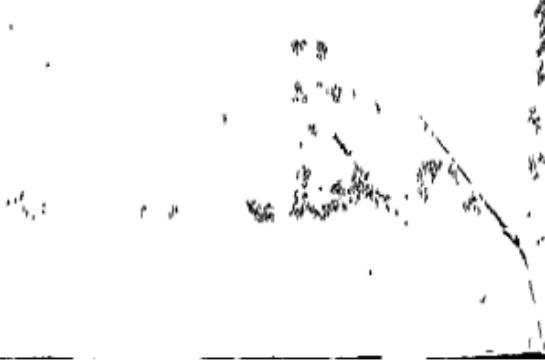

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be punishable under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-28-00, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Friday October 7, 2016 Provider: Peter Guzinski DC RE-EXAM

Electronically signed on 10/09/2016 at 10:30am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Accident Description: *Date of Accident:* October 31, 2015. *Time of Accident:* 4:55 PM. *Narrative Description of Accident:* Patient stated that she was stopped in traffic, while waiting for a truck to make a left hand turn into a driveway, when she was rear impacted. She stated that accident occurred while she was traveling South on Starin in the City of Buffalo, New York. Mrs Harwell, stated that this was a chain reaction accident. The vehicle that was behind her was also stopped and was pushed into her vehicle by an automobile that rear impacted them. *Patient Seatbelted?* Yes. *Position in vehicle driver.* *Patient Position at Impact:* looking straight ahead. *Impact Point of Patient's Car:* rear. *Brakes On At Time of Impact?* Yes. *Airbags Deployed?* No. *Did The Patient's Seat Break?* No. *Impact With Car Interior?* seatbelt left chest; headrest back head. *Patient's Vehicle Type:* Honda Odyssey 2007. *Type of Other Vehicle:* Honda CRV 2015. *Road Conditions At Time of Accident:* dry. *Was There Loss of Consciousness?* no. *What Symptoms Were Immediately Present?* Patient stated that she was experiencing head, neck, back and left shoulder and arm pain.

Cervical: Patient presented today with the continued chief complaint of neck pain. Due to the pain, she is unable to lift heavy weights, she has slight headaches which come frequently, she cannot do her usual work and her normal sleep has been moderately disturbed (1-2 hrs. sleepless). *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since onset. *Pain:* achy, dull, sharp, tingling, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* left upper extremity. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 2 x a week. She states that the duration varies, sometimes they last all day. Nothing alleviates the pain. Patient also stated that she experiences occasional dizziness with the headaches but she no longer experiences nausea. *Cervical Disability Index:* 30%. *Recent medical treatment for this condition:* Physical therapy; Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving, since onset. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement;

Encounter dated 10/07/2016 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 10/19/2016

bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Oswestry score:* 34%. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. Due to the pain, she is unable to lift heavy weights, she is unable to walk greater than 1 mile, she is unable to sit greater than 60 minutes, she is unable to stand greater than 60 minutes and she is unable to travel on journeys greater than 60 minutes. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last re-evaluation on July 29, 2016. *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 3/10. *Pain radiates to:* left posterior thigh and leg. *Exacerbating symptoms:* driving; lifting; sitting; standing; walking; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *OSWESTRY Disability Index:* 34%. *The Keele STarT Back Screening Tool:* Medium risk. *Recent medical treatment for this condition:* Physical therapy. *Changes in past medical history:* None.

Activity of Daily Living Form Bathing/Showering: mild impairment; Bending forward/backward: moderate impairment; Driving: moderate impairment; Drying Hair: mild impairment; Household chores: moderate impairment; Laundry: moderate impairment; Lifting less than 10 lbs: mild to moderate impairment; Lifting more than 10 lbs: moderate impairment; Kneeling: mild impairment; Making Meals: mild impairment; Prolonged Sitting more than 30 minutes: moderate impairment; Putting pants on: mild impairment; Putting shoes/socks on: mild impairment; Restful night's sleep: mild impairment; Seated to standing position: moderate impairment; Sexual activity: moderate impairment; Standing: mild impairment; Squatting: mild impairment; Tying shoes: mild impairment; Using lavatory: mild impairment.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain; right rotation: WNL 80/80 with pain neck and upper back; left lateral bending: 35/45 with pain neck and upper back; right lateral bending: 35/45 with pain neck and upper back. *Posture:* forward head carriage; rounded shoulders. *Strength:* all upper extremity musculature (C5-T1) were WNL and graded 5/5. *Sensation:* all upper extremity sensory exams (C5-T1) were WNL to Pin prick. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild to Moderate. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Reflexes:* bilateral upper extremity reflexes (C5, C6, C7) 2+. *Orthopedic tests:* left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck mostly to the left; maximum right lateral compression: Positive lower neck mostly to the left; Spinal Percussion C1-C7: Negative; left shoulder depression: Negative; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness:* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 50/60 with pain lower back; extension: 10/25 with pain

**Encounter dated 10/07/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/19/2016**

lower back; left rotation: 20/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Heel to toe walking:* WNL. *Gait pattern:* normal. *Strength:* all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Sensation:* all lower extremity sensory exams (L1-S1) were WNL to Pin prick. *Tenderness & Hypertonicity:* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus. *Reflexes:* bilateral lower extremity reflexes (L4 and S1) 2+. *Orthopedic tests:* Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 50 degrees for lower back pain; Well leg raise: Negative right at 70 degrees; Bechterew: Negative; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for neck and middle back pain. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-evaluation on July 29, 2016 her Neck Disability Index score improved from 42% to 30%. In addition, she is now concentrating and sleeping 1 to 2 hours longer with less pain. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL. *Diagnosis:* M50.22 (Other cervical disc displacement, mid-cervical region), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* improving, patient able to bend with less middle back pain.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last re-evaluation on July 29, 2016. Her VAS score improved from a 7 to 3 out of 10 and her Oswestry Disability Index score improved from 68% to 34%. In addition, she is now able to walk 3/4 of a mile farther and sit for 30 minutes longer with less pain. Further treatment is medically necessary to help improve her active lumbar ROM and improve her ability to sit, stand, sleep, walk and lift with less pain. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Encounter dated 10/07/2016 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/19/2016

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness. *Treatment schedule:* 1x/week for 8 weeks; Re-examination for 8 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 left (manual traction); L5 left (manual traction); SI right PI (blocking maneuver). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); left cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; left upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to November 30, 2016 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Physiatry Evaluation: September 28, 2016

Chief Complaint(s): Low back, buttock and leg pain, left greater than right

Dear Dr. Guzinski:

At your kind request, I had the pleasure of seeing Danielle Harwell in our office for an initial physiatry consultation on September 28, 2016 .

IMPRESSION

36-year-old female with low back and bilateral buttock, hip and leg pain secondary to multi-level degenerative disc disease L3 to S1, multi-level lumbar facet joint arthropathy L3 to S1, disc herniations/protrusions at L4-5 and L5-S1, myofascial pain syndrome, coccydynia, bilateral sacroiliac joint dysfunction, right greater than left, and left ischial tuberosity bursitis.

The patient's symptoms are causally related to an injury sustained in a motor vehicle accident on 10/31/15.

Assessment: M54.16 - Radiculopathy, lumbar region, M51.26 - Other intervertebral disc displacement, lumbar region, M47.816 - Spondylosis without myelopathy or radiculopathy, lumbar region, M48.06 - Spinal stenosis, lumbar region

HISTORY/CHIEF COMPLAINT

Patient is a pleasant 36-year-old female who presents to the office today for a scheduled initial consultation secondary to complaints of low back, buttock, hip and leg pain, left greater than right. The patient subjectively states that she was involved in a motor vehicle accident on 10/31/15. The patient states that she was sitting in a stopped car when she was rear ended by the three cars behind her. The fourth car rear ended the third car and in a domino effect, the patient's car was also hit. She started complaining of neck and low back pain immediately. She

did have a seat belt on. She did not lose any consciousness nor were any airbags deployed. She also had pain in the left arm. She now complains of low back pain that radiates into her bilateral buttocks and hips, left greater than right, and shoots posteriorly down her lower extremities to the bottom of her feet. She is currently undergoing formal courses of physical therapy and chiropractic treatments, which have helped immensely. She continues to have persistent pain. She does undergo regular trigger point injections at the Dent Neurologic center. She states that coughing, standing, lifting and walking worsens her pain and that lying down straight on her back with knees elevated improves it. She is not using any pain medications for pain relief at this time. She currently rates her pain score a 4/10 on the visual analog scale. She is desiring intervention for pain relief. She has no other complaints at this time.

RECOMMENDATIONS

1. At this time, we recommend the patient undergo a caudal epidural steroid injection.
2. We may consider bilateral L3 to S1 facet joint injections versus lumbar transforaminal epidural steroid injections.
3. The risks, benefits, alternatives and side effects were discussed with the patient regarding this procedure to include but not limited to infection, bleeding, paralysis, increase in pain and nerve damage. The patient would like to proceed with the caudal epidural steroid injection. We will request authorization from the patient's insurance provided if needed. Otherwise, we will schedule the patient accordingly. The patient was also instructed to hold off from any aspirin, aspirin containing products, and non-selective, nonsteroidal anti-inflammatory medications such as Advil, Aleve, Ibuprofen, Motrin, Naprosyn for 5-7 days prior to the procedure.
4. She will continue with her formal course of chiropractic care with Dr. Guzinski as well as with physical therapy.
5. She will continue to maintain her current level of activity.
6. We will see the patient back for a followup evaluation after her procedure.

PAST MEDICAL HISTORY

Asthma

PAST SURGICAL HISTORY

Tonsillectomy and adenoidectomy, D & C, endoscopy and colonoscopy

ALLERGIES

Keflex, Codeine, Soma, Biaxin, Clindamycin, Penicillin, Cipro, Ranitidine

MEDICATIONS

Voltaren, Pantoprazole Sodium, Vitamin D3, Magnesium Oxide, Loratadine

FAMILY HISTORY

Diabetes, stroke and heart disease

SOCIAL HISTORY

Patient is currently married. She has never smoked cigarettes and does not drink alcohol. She denies illicit drug use.

REVIEW OF SYSTEMS

A comprehensive review of systems was conducted including questioning on cardiovascular, respiratory, integumentary, psychiatric, genitourinary, gastrointestinal, neurologic, musculoskeletal, lymphatics and constitutional symptoms. Please refer to the history of present illness for any pertinent

positives and negatives. Please refer to the chart.

PHYSICAL EXAMINATION

BP: 113/77 Pulse: 87 Resp: 16 Ht: 63" Wt: 160lb BMI: 28.3

General: Patient is sitting comfortably in no acute distress. She is awake, alert and oriented x3. She is a pleasant female.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are pink and moist. Her speech is fluent, articulate, intelligible and coherent. She is wearing eyeglasses at this time.

Cardiovascular: Normal S1, S2.

Abdomen: Soft, non-distended, nontender.

Skin: Intact. Normal skin turgor. No clubbing, cyanosis or edema.

Lymphatics: No cervical lymphadenopathy.

Neuromusculoskeletal: Patient ambulates with a normal gait and station. She does not have any difficulty rising from a seated to a standing position. She has limited range of motion at the lumbar spine in all planes for forward flexion, extension, lateral rotation and side bending bilaterally. She is able to forward flex 85° and extend up to 5°. She has components of extension based back pain. She has tenderness to palpation of the lumbar paraspinal region as well as the coccyx. She has tenderness at the bilateral sacroiliac joints, right greater than left. She has tenderness to palpation at the left ischial tuberosity and none on the right. She does not have any greater trochanteric tenderness to palpation. She has good 5/5 musculoskeletal strength throughout all myotomes of her bilateral lower extremities. Her sensation is intact to light touch throughout all dermatomes of her bilateral lower extremities. She has normal muscle tone throughout without any spasticity or rigidity. She has 1+ reflex at the bilateral patella, symmetric and intact. She has negative Flipp test bilaterally. She has negative seated and supine straight leg raise test bilaterally. She has positive Patrick's test bilaterally which reproduces her left sided low back pain.

Psychiatric: Judgement and cognition appear to be within normal limits.

REVIEW OF DIAGNOSTIC STUDIES

MRI examination of the lumbar spine from Buffalo MRI on January 4, 2016 reveals disc desiccation at L3-4, L4-5 and L5-S1. There is facet arthropathy and annular bulging at L3-4. At L4-5, there is a central disc protrusion/herniation with annular tear. There is mild central canal stenosis. There is bilateral facet arthropathy and mild neural foraminal narrowing. At L5-S1, there are hypertrophic facet changes. There is a central to left paracentral disc protrusion/herniation with an annular tear at this level as well.

Thank you for allowing me to participate in Danielle's care. If you have any questions or concerns regarding this patient, please do not hesitate to contact me at your earliest convenience.

Sincerely,

Electronically signed by Jafar Siddiqui, M.D. on 11/01/2016 at 11:08 pm

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE T136 FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a federal crime and subject to criminal penalties.

SECRETS IN GOVERNMENT RECORDS ONLY

Medicare and I-Health P.W.M. (IHP) require insurance companies to pay for services that are reasonable and necessary for the treatment of a patient's condition. It is the responsibility of the insurance company to determine if a service is reasonable and necessary. If a service is determined to be reasonable and necessary, the insurance company will pay for it. If a service is determined to be unreasonable or unnecessary, the insurance company will not pay for it.

REFERENCES AND NOTES

The government has informed the current post by the Governor and no payment is left. Rec. GULU LUMI and FFCA indicated regarding relevant uncertainty and diagnosis related awareness.

SIGNATURE OF PHYSICIAN OR SUPPLIER (LET MEAP, TRICARE, FECA AND BLACK LUMI)

For TMC USE ONLY: I declare that I am not an employee of the United States Government or a contractor to the United States Government, either civilian or military. I have read UMO B6500, Fr. Stockholder's Guide, further details can be found at www.fsa.fsa.usda.gov.

No Pan-G100 can be better than its individual units which form a standard as to quality and value.

PC-2000. Any questions or comments should be directed to the project manager. I would appreciate it if you would respond by Friday, January 13, 2006. Thank you very much for your attention to this important matter.

NOTICE TO RIGHTHOLDERS: COLLECTION AND USE OF INFRINGING, TAKEN, PUBLIC AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are unable to file TPA-1001 and GOM-1001 as they are incomplete and do not fit the conversion rule of the Act. We believe the TRICARE PRA, and Block 1, are incomplete. Accordingly, we will not file them at this time. Instead, we will file the TRICARE PRA, and Block 1, separately. Additionally, we will file the GOM-1001 and TPA-1001 as they are incomplete. Specifically, we will file the GOM-1001 as GOM-1001, and the TPA-1001 as TPA-1001.

The information will be used to complete claims under these programs to determine your auto's eligibility. It is also used to determine if the car meets and replaces your uninsured auto insurance plan. You may cancel or change your plan at any time.

The information may also be used in other powers of attorney, carers' statements, declarations, wills, letters of wishes, health plans, or other documents or digital services. For the relevant legislation, see Part 6 of this Code. To ensure that a person's power of attorney is valid, it must be signed by the person and witnessed by two people who are not connected to the person. It may also be witnessed by a solicitor, a notary public or a justice of the peace. Additional measures are available through routine use of an attestation confirmation system or remote.

FORM 27 EDICARIA CLASSIFICATION FOR THE ACTIVE MONITORING SYSTEM. 10 CD 10 0901, 1000. *Centro Atómico de Olmos Potosí*, published by the Rogers, R. owner, 1st Ed. 53 No. 177, page 37E19.

TCR T-cell receptor; CD45RA: CD45 isoform expressed by naïve T cells; CD45RO: CD45 isoform expressed by effector memory T cells.

¹Private States, federal regulatory agencies, and consumer advocacy organizations can implement their own regulations or look to Congress or the Courts to regulate to address problems in the areas of the power in which a company operates. Appropriate disclosure may be required in state, local, state, federal, foreign, economic, political, human rights, and environmental providers of care in certain states, as a settlement, claim, determination, or recommendation from a court, quality assurance, or a review, program, audit, or inspection by the entity, organization, or entity and several entities related to the operation of TRECURE.

DOJC FRAUD: **Unlawful Interference**: If prior written information will result in delay in payment or may result in denial of claim. With the one exception discussed below there are no penalties and/or fines for refusing to release information. However, failure to furnish information in preparing the medical records involved in the claim can result in denial of payment of claims under the program. Failure to furnish any other information, such as name or claim number would delay payment of the claim. Failure to provide medical information under FD-205, could result in denial of a claim.

It is mandatory that you tell us if you know or suspect the party is responsible for your break-in. Section 118d of the Social Security Act, and 31 U.S.C. 3801-3812 (microdissemination) for withholding this information.

You should be registered IP.L. #00-503, Inc Computer Monitoring and Privacy Protection Act of 1988; giving the permission to verify information by way of computer monitor.

ENROLLMENT AND CERTIFICATION

I certify that the above record is true to the best of my knowledge and belief, and I also certify that the State of the Commonwealth of Massachusetts has been paid to me the amount of \$100.00 for my services as a Notary Public.

For more information on the system and the benefits provided by the public and private sector to combat climate change, visit the website of the United Nations Environment Programme, www.unep.org.

SIGNATURE OF PRACTITIONER (OR CNA/PLE) OR KEY INFO: The signatures listed above were initially introduced and subsequently signed in the form of his patient and were personally witnessed by me as my employee under my personal direction.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control

Patient: Danielle Harwell #3438 DOB: 03/29/1980
Policy ID: 013873940011059

Thursday January 5, 2017 Provider: Peter Guzinski DC

Electronically signed on 01/05/2017 at 11:03am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today stating that her neck pain has been more intense. She stated that she has been sleeping on the couch with her son who has been sick which aggravated her condition. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* slightly worse. *since last 3 nights.* *Pain:* achy, dull, sharp, shooting, numb; level: 4/10. *Pain is occasional.* *Pain radiates to:* left shoulder, right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she has not had a headache since last visit. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting. *Range:* 3->4/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activites of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that her left posterior thigh continues to remain painful. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb; level: 4/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain right neck ; right rotation: 60/80 with pain right neck ; left lateral bending: 35/45 with pain right neck ; right lateral bending: 35/45 with pain right neck . *Posture:* foward head carriage; rounded

Encounter dated 01/05/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 01/20/2017

shoulders. **Hypertonicity & Tenderness** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Moderate; Mild to Moderate. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Left Mild to Moderate; Thoracic paraspinal musculature Right Mild. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: 50/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: 20/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Tenderness & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. **Tenderness on palpation:** left SI: moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Positive left at 50 degrees for lower back pain; Well leg raise: Negative right at 70 degrees; Bechterew: Negative. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: mild exacerbation of symptoms, continue with current treatment plan. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated

Encounter dated 01/05/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 01/20/2017

disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.
Treatment schedule: 1x/week for 2 weeks; 1x every 2 weeks for 2 weeks; Re-examination for 4 weeks.
Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (flexion/distraction); L5 extension restriction (flexion/distraction); SI left PI (prone mobilization).
Physical Modalities: bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy.
Patient given: home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec.
Home care: ice: neck / lower back prn for 20 minutes.
Additional instructions: Advised patient to monitor for any changes in their symptoms.
Short term goals: decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain.
Long term goals: decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain.
Disability status: Temporary partial starting on November 12, 2015 to January 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Monday January 9, 2017 Provider: Peter Guzinski DC

Electronically signed on 01/09/2017 at 10:13am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today stating that her neck pain remains the same. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior neck pain:** none. **Changes in this condition:** no change. since last visit.

**Encounter dated 01/09/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 01/20/2017**

Pain: achy, dull, sharp, shooting, numb; level: 4/10. *Pain is constant.* **Pain radiates to:** left shoulder, right shoulder, left upper extremity. **Exacerbates symptoms:** movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** left upper extremity. **Recent infection or fever:** No. **Night sweats or pain:** No. **Headaches:** Patient stated that she has not had a headache since last visit. **Recent medical treatment for this condition:** Massage therapy. **Changes in past medical history:** None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior thoracic pain:** none. **Changes in this condition:** no change. **since last visit:** **Pain:** achy, dull, sharp, shooting. **Range:** 3->4/10. **Pain is occasional.** **Exacerbates symptoms:** movement; bending; lifting; activities of daily living; reaching; activities of daily living. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Recent medical treatment for this condition:** None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior low back pain:** none. **Changes in this condition:** no change. **since last visit:** **Pain:** achy, dull, sharp, shooting, numb; level: 4/10. **Pain is occasional.** **Pain radiates to:** left posterior thigh and leg. **Exacerbates symptoms:** driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Bowel or bladder incontinence:** No. **Recent infection or fever:** No. **Night sweats or pain:** No. **Recent medical treatment for this condition:** Massage therapy. **Changes in past medical history:** None.

Objective

Cervical: **Range of motion:** flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain right neck ; right rotation: 60/80 with pain right neck ; left lateral bending: 35/45 with pain right neck ; right lateral bending: 35/45 with pain right neck . **Posture:** forward head carriage; rounded shoulders. **Hypertonicity & Tenderness** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Moderate; Mild to Moderate. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Left Mild to Moderate; Thoracic paraspinal musculature Right Mild. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppelman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: 50/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: 20/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Tenderness & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. **Tenderness on palpation:** left SI: moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise:

Encounter dated 01/09/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 01/20/2017

Negative right at 70 degrees; Bechterew: Negative. *Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: worse, pain more constant than occasional. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged. *Post-treatment analysis:* patient tolerated treatment without incident.

Lumbar assessment: improving, left SLR improved from 50 to 60 degrees. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.

Treatment schedule: 1x/week for 1 week; 1x every 2 weeks for 2 weeks; Re-examination for 3 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (flexion/distraction); L5 extension restriction (flexion/distraction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10

Encounter dated 01/09/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 01/20/2017

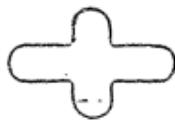

daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to January 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Procedure Note
Date: 01/19/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 Age: 36 Y Sex: Female
PCP: James Panzarella, DO

Reason for Appointment

- Trigger Point Injections. Headaches
- Neck pain

History of Present Illness

General:

Danielle is a 36-year-old patient with a history of migraine headaches, cervicalgia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. She states that she continues to benefit from her trigger point injections.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) once a day
- Taking loratadine 10 mg capsule 1 cap(s) once a day
- Taking Melatonin 3 mg tablet 1 tab(s) once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) once a day
- Taking Lamictal 25 mg tablet 1 tab(s) 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) prn migraine, okay to repeat dose in 2 hours, MDO = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 110/74, HR 72, RR 16, Ht 63", Wt 210.8, BMI 37.34, BSA 2.06.

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle

deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1 (Primary)

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

The supervising physician on site is Dr. Holmlund.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 7 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness. The procedure was performed by Abbey Burdick, PA-C..

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle. 01/19/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 01/19/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 01/19/2017.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIMATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement or claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

TRICARE and TRICARE Prime LTHA. A patient's consent is required if payment is made and authorization issued if any information sent prior to receipt of the claim and discharge statement. Authorization provided by States 1 through 12 is also acceptable and is included in the cost of a Medicare claim; the patient's signature is required only in reference to Medicare national and supplemental insurance and that, if the person is not employer group health insurance liability, is not liable, under a combination or other insurance, for the responsibility as set forth in the contract. For claims filed after January 1, 2002, see 42 CFR 111.12(e). If item B is completed, the patient's signature will serve as evidence of the information in the bill of lading or any other document. In TRICARE assignment or TRICARE participation cases, the provider agrees to accept the exchange continuation of the life degree career or TRICARE local intermediary for the life change and to furnish its responsibility only to the deductible charge and non-covered services. Contractor and the deductible will be based upon the TRICARE local intermediary for the life change or the life degree career. TRICARE is not a health insurance program but is payment for health care provided through certain health care providers. Information may be obtained at the nearest TRICARE office or by calling 1-800-TRICARE (1-800-874-2273).

For TRICARE claims, I further certify that I do not have any other service-connected injuries or disabilities, nor am I a member of the Uniformed Services or a civilian employee of the United States Government, or a current employee of the United States Congress, either civilian or military (Under 51 USC 593B). For BlueCross claims, I further certify that the same as contained in the

Mr. Post S. Elkins is a licensed engineer holding a license issued by the state of Georgia, and is registered by Georgia law and regulations (12 CFR 347.7).

WHO IS EXEMPT? Any individual who receives an annual contribution from Federal funds allocated by the IRS may upon correction be subject to the annual prepayment of amounts applied to Federal taxes.

DO NOT FORGET TO PAY THE COLLECTIVE AND INDIVIDUAL TRIBES, ETC., AND PLACE MTS. RE COLLECTIONS ON THE ACCOUNT OF THE TRIBES.

This information is often used to identify clients under these programs or used to verify you and to determine your eligibility. It is also used to decide if the services and supplies you receive are covered by the program, and to ensure proper payment is made.

The institution may also be given no other privileges or services, cameras, intercom, cameras, medical review, and/or health plans, and other organizations or Federal agencies, for the efficient administration of the institution.

We have tried to disclose all information about the products you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

World Bank Group, 1990, as updated and republished.

ES-12 ESG-13, ESG-30, or as updated and republished.

FOUR THIRTY-FIVE CORP'S PRINCIPLES ("PRINCIPLES") establish eligibility for medical care provided by civilian sources and to issue payments upon establishment of capacity and determination that the service members received are authorized by law.

DISCLOSURES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for failure to supply information. However, failure to furnish regarding the medical services rendered or the amount charged would prevent payment of claims under the programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 11200 of the Social Security Act and 91 USC 3001-3012 provide penalties for withholding this information.

You should be aware that P.L. 100-508, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matching.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments or rates for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, in payment in full, the amount paid by the Medicaid program for these claims submitted for payment under this program, with the exception of non-nursing domiciliary care services, as payment in full for the following others:

SIGNATURE OF PHYSICIAN (OR SUPPLYING): I certify that the supplies listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTE: It is your responsibility to verify that the information you provide is true, accurate, and complete. I understand that a perjury and/or violation of this claim will be treated as a Federal and State offense, and that any false statement, statement, or document, or component of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0325-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for review instructions, search existing data resources, gather the data needed, and complete and review the information collected. If you have any comments concerning the accuracy of the time estimates or suggestions for improving this form, please write to: OMB PRA Report Clearance Officer, Mail Stop 04-26-05, Baltimore, Maryland 21214-1950. This address is for comments and suggestions only. DO NOT MAIL COMPLETED FED CLAIM FORMS TO THIS ADDRESS.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.34(a) if Item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown in Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary as the full charge and the patient is responsible only for the deductible, co-insurance and non-covered services. Co-insurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE local intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured"; i.e., items 10, 4, 6, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal and State Stark laws; Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service; 6) my identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by health employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of funds commonly furnished in physician's offices; and 4) the services of non-physicians must be included on the physician's bill.

For TRICARE claims I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5339). For Black Lung claims, I further certify that the services performed were not for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OIGP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(g), 1892, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.2(a)(6) and 421.5(e)(6), and 44 USC 3101, 1 CFR 101 et seq. and 10 USC 1679 and 1083, 5 USC 801 et seq, and 30 USC 801 et seq; 38 USC 610; E.O. 13937

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, Med, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed Sept 12, 1990, as updated and republished.

FOR OIGP CLAIMS: Department of Labor, Privacy Act of 1974, "Publication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See ESA-5, ESA-6, ESA-12 ESA-13 ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/claims received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies and consumer reporting agencies in connection with recruitment claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to enrollment, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE(S): Voluntary; however failure to provide information will result in delay in payment or may result in denial of claim. With one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged could prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1120B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988" permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program with the exception of authorized deductible, co-insurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Response Clearance Office, Mail Stop C4-26-05, Baltimore, Maryland 21204-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note

Date: 01/19/2017

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 36 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- Trigger Point Injections, Headaches
- Neck pain

History of Present Illness

General:

Danielle is a 36-year-old patient with a history of migraine headaches, cervicalgia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. She states that she continues to benefit from her trigger point injections.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) once a day
- Taking loratadine 10 mg capsule 1 cap(s) once a day
- Taking Melatonin 3 mg tablet 1 tab(s) once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) once a day
- Taking Lamictal 25 mg tablet 1 tab(s) 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking nizatriptan 10 mg tablet 1 tab(s) prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

Father: alive, Stroke
 Mother: alive, Asthma
 Siblings alive
 1 brother(s) - healthy

Social HistoryTobacco Use:

Smoking Patient is a non smoker

Alcohol use:

Alcohol Consumption Patient does not drink alcohol.

Resides with:

Spouse Husband Children: Yes, x3.

Working:

Employed Stay at home mom.

Marital Status:

Married. Yes.

Driving:

Does Patient Drive: Yes.

Exercise:

Daily: Yes, Walks

Caffeine:

Other. Patient does not consume caffeine.

Allergies

- Keflex
- codeine
- penicillin
- Blaxin
- Cipro
- Soma

Hospitalization/Major Diagnostic Procedure

See surgical history

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy

Vital Signs

BP sitting 110/74, HR 72, RR 16, Ht 63", Wt 210.8, BMI 37.34, BSA 2.06.

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle

deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1 (Primary)

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

The supervising physician on site is Dr Holmlund.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Treatment

1. Myofascial pain

MASSAGE Therapy 1401192

Chiropractic therapy 1401191

Procedures

Injections

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 7 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness. The procedure was performed by Abbey Burdick, PA-C .

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 01/19/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 01/19/2017.

Exercise: Patient counseled on importance of moderate physical activity daily 01/19/2017

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be subject to criminal and civil penalties.

RESPONSE TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS. A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and confirms that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Veterans claim, the patient's signature authorizes any entity to release to Medicare medical and home health information and will verify the person is a carrier group health insurance, hobby, no-lit, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.2(b). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or TRICARE local office, state, city or town office and the current enrollment office for duplicate, concurrent and non-covered services. Consents and releases are based upon the change determinations in the VA/DoD carrier or TRICARE local/district authority file, and not in the change submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through commercial contracts with the Uniformed Services, whom claim is paid by the patient's sponsor or should be provided in those items captioned in "Insurance"; i.e., Items 1a, 4, 6, 7, 8 and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and amounts coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA, AND BLACK LUNG)

I, a physician, have read the form (and related forms) I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed, equitable and just payment decision; 4) the claim is neither submitted by me or on my behalf by my designated billing company, complete with all applicable Medicare and/or Medicaid forms, signatures, and appropriate documentation for payment, including but not limited to the Federal anti-fraud laws and Physician Self Referral law (commonly known as Stark); 5) the services on this form are not only necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise required by law; 6) I am not a member of TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI license 4, or 888) of the primary individual in providing such services is reported in no decimal format. For services to be considered "incident to" a physician's professional services, it may be rendered under the physician's direction or supervision by his/her employee. 7) It may be an integral, although incidental part of a covered physician service; 8) the service must be of kind commonly furnished in physician's office, and 9) the services or non-physician must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 7332). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disease.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 414.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PAYOR/FI ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OIGCP to use you for information needed in the administration of the Medicare, TRICARE, FECA and Black Lung programs. Authority to collect information is in section 305(a), 162, 1879 and 1874 of the Social Security Act as amended, 42 CFR 411.26(a) and 424.5(a)(ii), and 44 USC 3101-3101 CFR 101.1 et seq and 10 USC 1070 and 1086, 5 USC 801-804, and 30 USC 901 - see 30 USC 613; E.O. 8897.

The information we obtain is used to compile, store and/or those programs is used to identify you and to determine your eligibility. It is also used to identify if the service(s) and supplies you received are provided by federal programs and to insure that proper payment is made.

The information may also be used to obtain payment of services, carriers, intermediaries, medical review boards, health plans, and other payors or entities or federal agencies. In the U.S. state administrative or federal programs, the relevant payor or federal agency may pay primary to Federal programs, and as otherwise necessary to administer the programs. For example, it may be necessary to disclose information about you if health providers need to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: Is in the notice preceding Form No. 00-70-0301, titled, "Carrier Medicare Claims Record" published in the Federal Register, Vol. 63 No. 177, page 37519, Vice, Sect. II, Part, or as amended and supplemented.

FOR OIGCP CLAIMS: Department of Labor, Privacy Act of 1974, "Reproduction of Pulse of Systems of Records," Federal Register Vol. 56 No. 40, Wrd L-B, 26, 1070, S-16 ESA-5, ESA-6, ESA-12, ESA-13, FSA-30, or as updated and replaced, d.

FOR TRICARE CLAIMS (PRIVACY AND CONFIDENTIALITY): To determine eligibility for medical care provided by civilian contractors and to issue payment items or bills based on eligibility and to monitor health care providers' compliance with laws and regulations authorized by law.

NOTICE TO PAYOR/FI: Information on claims and related documents, may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services, under the Dept. of Transportation contract with its statutory administrative representative, under TRICARE CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in court cases, to the Internal Revenue Service, private collectors and others, who consumer reporting agencies in connection with recompensation claims, and to Congressional offices in response to inquiries made of the agent of the payor to whom it is record or claim. Agreements or releases may be made to other federal, state, local, foreign government agencies, private health contractors, and individual providers of care, on matters relating to enrollment, claim adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefit, and other functions related to the operation of TRICARE.

NOTICE TO PAYOR/FI: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for failing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is necessary that you fully understand that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provides penalties for extraneous info submissions.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICARE PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for services such as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, co-payment or similar cost-share charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: The fact that the foregoing information is true, accurate and complete, I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false or untrue statement, document, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

Address to: U.S. Dept. of HHS, Office of Inspector General, 4500 Rockville Pike, Bethesda, MD 20892-1850. To respond to a request to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number is 1605-0001, 1605-0002, 1605-0003, 1605-0004, 1605-0005, 1605-0006, 1605-0007, 1605-0008, 1605-0009, 1605-0010, 1605-0011, 1605-0012, 1605-0013, 1605-0014, 1605-0015, PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a civil and/or criminal offense under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and related information and whether the person has employer group health insurance, salary, no-salary, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency whose plan, benefits assigned or TRICARE participant the case is. The physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary for the full charge and TRICARE is responsible only for the deductible component and non-covered services. Insurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain providers of the Uniformed Services. Information in the patient's sponsor should be provided in those items captioned as "Insured" i.e., item 1a, 4, 5, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In signing this claim for patient item 1a, I certify that: 1) the information on this form is true, accurate and complete; 2) I have furnished myself with all applicable laws, regulations, and program instructions; 3) this claim, unless submitted by me or on my behalf by my designee or billing company, complies with all applicable laws, regulations, and program instructions; 4) the payment, including but not limited to the Federal rate-back, state and Physician Self-Referral, is community based as defined in the laws which immediately preceded and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly provided by Medicare, TRICARE, etc. 5) to the extent rendered incident to my professional service, the identify legal name and MBI license (or SSN) of the primary individual rendering such service is reported in the designated section. For services to be considered "incident" to a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of direct concern furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I am my employee who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 553a). For Black Lung claims I further certify that the services performed was not for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 414.32).

NOTICE: Any misstatement represents or facilitates user-made information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is: in section 205(a), 1082, 1082 and 1087 of the Social Security Act as amended, 42 CFR 411.24(a) and 494.5(a) (6), and 44 USC 3101, 1 CFR 101 et seq and 10 USC 1079 and 1085, 10 USC 3101 et seq, and 20 USC 901 et seq, 38 USC 613, E.O. 13397.

The information we obtain to complete claims and/or these programs is used to identify you and to determine your eligibility. It is also used to decide if the service(s) and supplies you request are covered by this program and to insure that proper payment is made.

This information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0901, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 60 No. 177, page 37549, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 65 No. 40, Wed Feb 28 1990, See EBA-6, CSA 6, CSA-12, EGA-13, EBA-3, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/treatments received are authorized by law.

FOR VETERANS CLAIMS: Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in actions before the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recovery claims; and to Congressional Offices in response to inquiries made at the request of the House or Senate in whom a record pertains. Appropriations disclosure may be made to other federal, state, local, foreign government agencies, private entities, contractors, and individual citizens, or, of course, on a need-to-know basis to entitlement claim adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, disclosure of CTC data, and current legislation related to the operation of TRICARE.

DISCLAIMER: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below there are no penalties and/or loss of payments for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under this program. Failure to furnish any other information, such as name or alias number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

Understand that under the P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

TRICARE PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under this program, with the exception of authorized deductible, co-payment or similar cost-sharing charge.

STATEMENT OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false statement, misnomer, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

As required by the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather new data, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggested changes to improve this form, please write to CMS, 7500 Security Boulevard, Attn: PRA/Regulatory Clearance, OHRAC Mail Stop C4-20-05, Baltimore, Maryland 21245-1860. This address is for comment; under separate cover only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

 DOB:08/29/1980 Today's date: 02/21/2017

movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Oswestry score:* 22%.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. Due to the pain, she is unable to lift heavy weights off the floor and she is unable to sit greater than 60 minutes. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since onset. *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 3/10. *Pain is* occasional. *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *OSWESTRY Disability Index:* 22%. *The Keele STarT Back Screening Tool:* Low risk. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Activity of Daily Living Form Bending forward/backward: moderate impairment; Driving: mild impairment; Household chores: moderate impairment; Laundry: moderate impairment; Lifting less than 10 lbs: mild impairment; Lifting more than 10 lbs: moderate impairment; Kneeling: mild impairment; Making Meals: mild impairment; Prolonged Sitting more than 30 minutes: mild impairment; Putting shoes/socks on: mild impairment; Restful night's sleep: mild impairment; Seated to standing position: mild impairment; Sexual activity: mild impairment; Standing: mild impairment; Squatting: mild impairment; Tying shoes: mild impairment; Using lavatory: mild impairment.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* forward head carriage; rounded shoulders. *Strength:* all upper extremity musculature (C5-T1) were WNL and graded 5/5. *Sensation:* all upper extremity sensory exams (C5-T1) were WNL to Pin prick. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Reflexes:* bilateral upper extremity reflexes (C5, C6, C7) 2+. *Orthopedic tests:* left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck; Spinal Percussion C1-C7: Negative; left shoulder depression: Negative; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 20/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: 20/30 with pain lower back; right rotation: 20/30 with pain lower back; left lateral

Encounter dated 02/07/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/21/2017

bending: 15/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Heel to toe walking:* WNL. *Gait pattern:* normal. *Strength:* all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Sensation:* all lower extremity sensory exams (L1-S1) were WNL to Pin prick. *Tenderness & Hypertonicity:* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus. *Reflexes:* bilateral lower extremity reflexes (L4 and S1) 2+. *Orthopedic tests:* Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 30 degrees for lower back pain; Well leg raise: Positive right at 60 degrees; Bechterew: Negative; Minor's sign: Negative; Slump Test: Positive bilateral for lower back pain; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for lower back pain on a cough or sneeze. *Spinal subluxation level(s):* L4, L5, Left SL. *Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Her condition has remained relatively unchanged since her last re-evaluation on December 6, 2016. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL.

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Prognosis: Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: Mrs. Harwell's lower back condition has been worse since her last re-evaluation on December 6, 2016. Active lumbar flexion decreased from 50 to 20 degrees, her left SLR decreased from 50 to 30 degrees and her right SLR decreased from 70 to 60 degrees and now with lower back pain. Further treatment is medically necessary to help improve her active lumbar ROM and improve her ability to sit, bend, perform household chores and lift with less pain. *Post-treatment analysis:* patient tolerated treatment without incident.

Set backs: Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.

Encounter dated 02/07/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/21/2017

Treatment schedule: 1x/week for 4 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 8 weeks.
Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to March 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Tuesday February 7, 2017 Provider: Peter Guzinski DC RE-EXAM

Electronically signed by Peter Guzinski DC on 02/12/2017 at 2:40pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Accident Description: *Date of Accident:* October 31, 2015. *Time of Accident:* 4:55 PM. *Narrative Description of Accident:* Patient stated that she was stopped in traffic, while waiting for a truck to make a left hand turn into a driveway, when she was rear impacted. She stated that accident occurred while she was traveling South on Starin in the City of Buffalo, New York. Mrs Harwell, stated that this was a chain reaction accident. The vehicle that was behind her was also stopped and was pushed into her vehicle by an automobile that rear impacted them. *Patient Seatbelted?* Yes. *Position in vehicle driver. Patient Position at Impact:* looking straight ahead. *Impact Point of Patient's Car:* rear. *Brakes On At Time of Impact?* Yes. *Airbags Deployed?* No. *Did The Patient's Seat Break?* No. *Impact With Car Interior?* seatbelt left chest; headrest back head. *Patient's Vehicle Type:* Honda Odyssey 2007. *Type of Other Vehicle:* Honda CRV 2015. *Road Conditions At Time of Accident:* dry. *Was There Loss of Consciousness?* no. *What Symptoms Were Immediately Present?* Patient stated that she was experiencing head, neck, back and left shoulder and arm pain.

Cervical: Patient presented today with the continued chief complaint of neck pain. Due to the pain, she is unable to lift heavy weights, she has moderate headaches which come infrequently, she can only do her usual work, but no more and her normal sleep has been moderately disturbed (1-2 hrs. sleepless). *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving. *since onset. Pain:* achy, dull, sharp, tingling, shooting, numb; level: 4/10. *Pain is occasional. Pain radiates to:* right shoulder; left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. **Headaches:** Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Cervical Disability Index:* 30%. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving. *since onset. Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is occasional. Exacerbates symptoms:*

Electronically signed by Peter Guzinski DC on 01/17/2017 at 9:39am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today stating that her neck pain remains the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, shooting, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left shoulder, right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she had a really bad headache over the weekend but she has been better since. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, shooting. Range: 3->4/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Recent medical treatment for this condition:* None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, shooting, numb; level: 3/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 35/45 with pain left lower neck ; right lateral bending: 35/45 with pain left lower neck . *Posture:* forward head carriage; rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Moderate; cervical

Encounter dated 01/17/2017 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 02/21/2017

paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild to Moderate. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Left Mild to Moderate; Thoracic paraspinal musculature Right Mild. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by motion and static palpation.*

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 50/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. *Tenderness on palpation:* left SI: mild to moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise: Negative right at 70 degrees; Bechterew: Negative. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Cervical assessment:* unchanged. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged. *Post-treatment analysis:* patient tolerated treatment without incident.

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Encounter dated 01/17/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/21/2017

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 1 week; 1x every 2 weeks for 2 weeks; Re-examination for 3 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (flexion/distraction); L5 extension restriction (flexion/distraction); SI left PI (blocking maneuver). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to January 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Tuesday January 24, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 01/24/2017 at 10:07am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient stated that her neck pain has not been as intense. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, shooting, numb. *Range:* 2->3/10. *Pain is constant.* *Pain radiates to:* left shoulder, right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical

Encounter dated 01/24/2017 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 02/21/2017

activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing.
Numbness: none. **Weakness:** left upper extremity. **Recent infection or fever:** No. **Night sweats or pain:** No.
Headaches: Patient stated that she had a bad headache on Sunday, but better today. **Recent medical treatment for this condition:** Massage therapy. **Changes in past medical history:** None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior thoracic pain:** none. **Changes in this condition:** no change. **since last visit.** **Pain:** achy, dull, tight; level: 4/10. **Pain is occasional.** **Exacerbates symptoms:** movement; bending; lifting; activities of daily living; reaching; activities of daily living. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Recent medical treatment for this condition:** None.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that the pain has been radiating into both posterior thighs and legs. "I think the shot feels like is slowly wearing off." Follow up with Dr. Siddique on February 14, 2017. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior low back pain:** none. **Changes in this condition:** no change. **since last visit.** **Pain:** achy, burning, dull, tingling, numb; level: 4/10. **Pain is occasional.** **Pain radiates to:** left posterior thigh and leg, right posterior thigh and leg. **Exacerbates symptoms:** driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. **Alleviates symptoms:** nothing. **Numbness:** none, bilateral posterior thigh and leg. **Weakness:** none. **Bowel or bladder incontinence:** No. **Recent infection or fever:** No. **Night sweats or pain:** No. **Recent medical treatment for this condition:** Massage therapy. **Changes in past medical history:** None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 35/45 with pain left lower neck ; right lateral bending: 35/45 with pain left lower neck . **Posture:** forward head carriage; rounded shoulders. **Hypertonicity & Tenderness:** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild to Moderate. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness:** Thoracic paraspinal musculature Left Mild to Moderate; Thoracic paraspinal musculature Right Mild. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by motion and static palpation.**

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 50/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Tenderness & Hypertonicity:** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. **Tenderness on palpation:** left SI: mild to moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Positive left at 60 degrees for lower back pain; Well

Encounter dated 01/24/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/21/2017

leg raise: Negative right at 70 degrees; Bechterew: Negative. *Spinal subluxation level(s): L4, L5, Left SI.*
Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: improving, VAS score improved from a 4 to 2 to 3 out of 10. *Prognosis:* Guarded.

Post-treatment analysis: patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged. *Post-treatment analysis:* patient tolerated treatment without incident.

Lumbar assessment: worse, pain now radiating into right posterior thigh and leg. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 1 week; 1x every 2 weeks for 2 weeks; Re-examination for 3 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (flexion/distraction); L5 extension restriction (flexion/distraction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapulae trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10

Encounter dated 01/24/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/21/2017

daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to February 28, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Three-Part Alignment of the Internal and External Data Sources in Order to Address and FEELs in the Future *Addressing the three data sources and defining the three parts of the alignment process will help to ensure that the system can be used effectively.*

SIGNATURE OF PATIENT OR GUARDED BY A PROXY (HICAP, TRICARE, PEOA AND BLACK LUNG)

For TRICARE claims, I further certify that (i) any employee who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government, (ii) no claim or inquiry (refer to 3 USC 853g). For Blue-Card claims, I further certify that the services performed were for Blue-Card qualified standards.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations [42 CFR 425.321].

3001CCDC: Any one who misrepresents or fabricates essential information to receive payment from Federal funds requested by this item may upon conviction subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, PICA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and GMECP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to obtain information on you in section 203(h), 1872, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.3(e)(1) and 424.5(a)(6), see 1 USC Section 101 et seq. and 10 USC 1670 and 1675; 18 USC 8701 et seq. and 30 USC 601 et seq., see 38 USC 4101 et seq. E.O. 13690

This application is given in compliance with the law to identify you and to determine your eligibility. It is also used to decide if the services and supplies you require are covered by basic income and/or other social insurance programs.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the purpose of administration of Federal programs that require other third party payers to pay primary to Federal programs and as otherwise necessary to administer the programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine use for utilization control of systems of automated data processing.

PDF ID: ED-2024-CIA-0175; See the notice publishing system item No. 69-70-0501, titled, "Cancer Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549.

FOR OFFICERS: Department of Labor, Privacy Act of 1974 "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28 1990, See ESA-5 ESA-6, ESA-12 CRA-10 EHA-30 as reprinted and consolidated.

FOR THIS/CASE, CLINIC/PRINCIPLE PURPOSE(S) To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and continuation of care.

Individuals listed in Information item claims and related documents may be given to the Govt. of Victoria's Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation.

Revenue Services, private collection agencies, and consumer reporting agencies in connection with a consumer dispute, and to Congressional Officers in response to inquiries made by the request of the person whom a complaint pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and non-governmental entities, or can, on a needs-to-know confidential basis, disclosure be made to insurance companies, health care providers, pharmaceutical companies, and medical facilities related to the operation of TRICARE.

-850-755-1515. Verifying services, looks to provide information will result in delay as payment or may result in denial of claim. With one exception deposit of bill, there are no fees associated with this service. A physician or provider is responsible to supply information. However, failure to furnish information regarding the medical service rendered or the amount charged would prevent payment of claim, and a physician's failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information within 30 days of request will result in denial of claim.

I am unable to self-serve, hence I'm not a party to responsible for paying for your services. Section 1(b)(B) of the Small Business Act am 31 USC 3801-3812 provides:

This should be noted, that P.L. 84-503, the Computer Matching and Privacy Protection Act of 1988, permits the government to verify information lawfully by computer matching.

MEDICARE PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to have such records as are necessary to document fully the extent of services we provide to individuals under the State's Title XIX plan and to furnish information regarding any services and/or claims we provide, such services or the State Agency or Dept. of Health and Human Services may request.

Health care providers may be paid by the Medicaid program for their claims submitted for payment under that program, but the exception of all non-drug deductible, copayments, and other health care charges.

SIGNATURE OF PHYSICAL (OR SUPPLY)I I certify that the services listed above were medically indicated and necessary to the health of my patient and were personally furnished by me or my employee & is not for my personal protection.

(b) (5)(C) This is to certify that the foregoing information is true, accurate and complete. I further stand that payment and satisfaction of this claim will be from Federal and State funds, and nothing herein, whether true, or untrue, or the omission of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no person is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0208-1197. This form requires 6 to complete and return 10 minutes for responses, including the time for review. If you have any comments concerning the accuracy of the instructions or burden estimate, please contact the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20585, telephone (202) 501-1074.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Tuesday February 14, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 02/14/2017 at 5:31pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since onset.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->4/10. *Pain is occasional.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since onset.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that her legs have not been as sore. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since onset.* *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 2->3/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy; Pain management evaluation with injection schedule for March 30, 2017. *Changes in past medical history:* None.

Objective

Encounter dated 02/14/2017 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 03/06/2017

Cervical: Range of motion: flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. Posture: forward head carriage; rounded shoulders. Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. Trigger points: left levator scapulae, bilateral upper trapezius. Orthopedic tests: left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. X-ray findings: Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. Spinal subluxation level(s): C5, C6, left first rib. Subluxations detected by: motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Mild-to Moderate. Trigger points: bilateral rhomboids. Orthopedic tests: Spinal percussion T1-T12: Negative; Sheppelman's: Negative bilateral. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: WNL 60/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** unchanged. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: improving, Active lumbar ROM improving since last visit and her left SLR improved from 30 to 60 degrees and now without pain. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in

**Encounter dated 02/14/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 03/06/2017**

mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

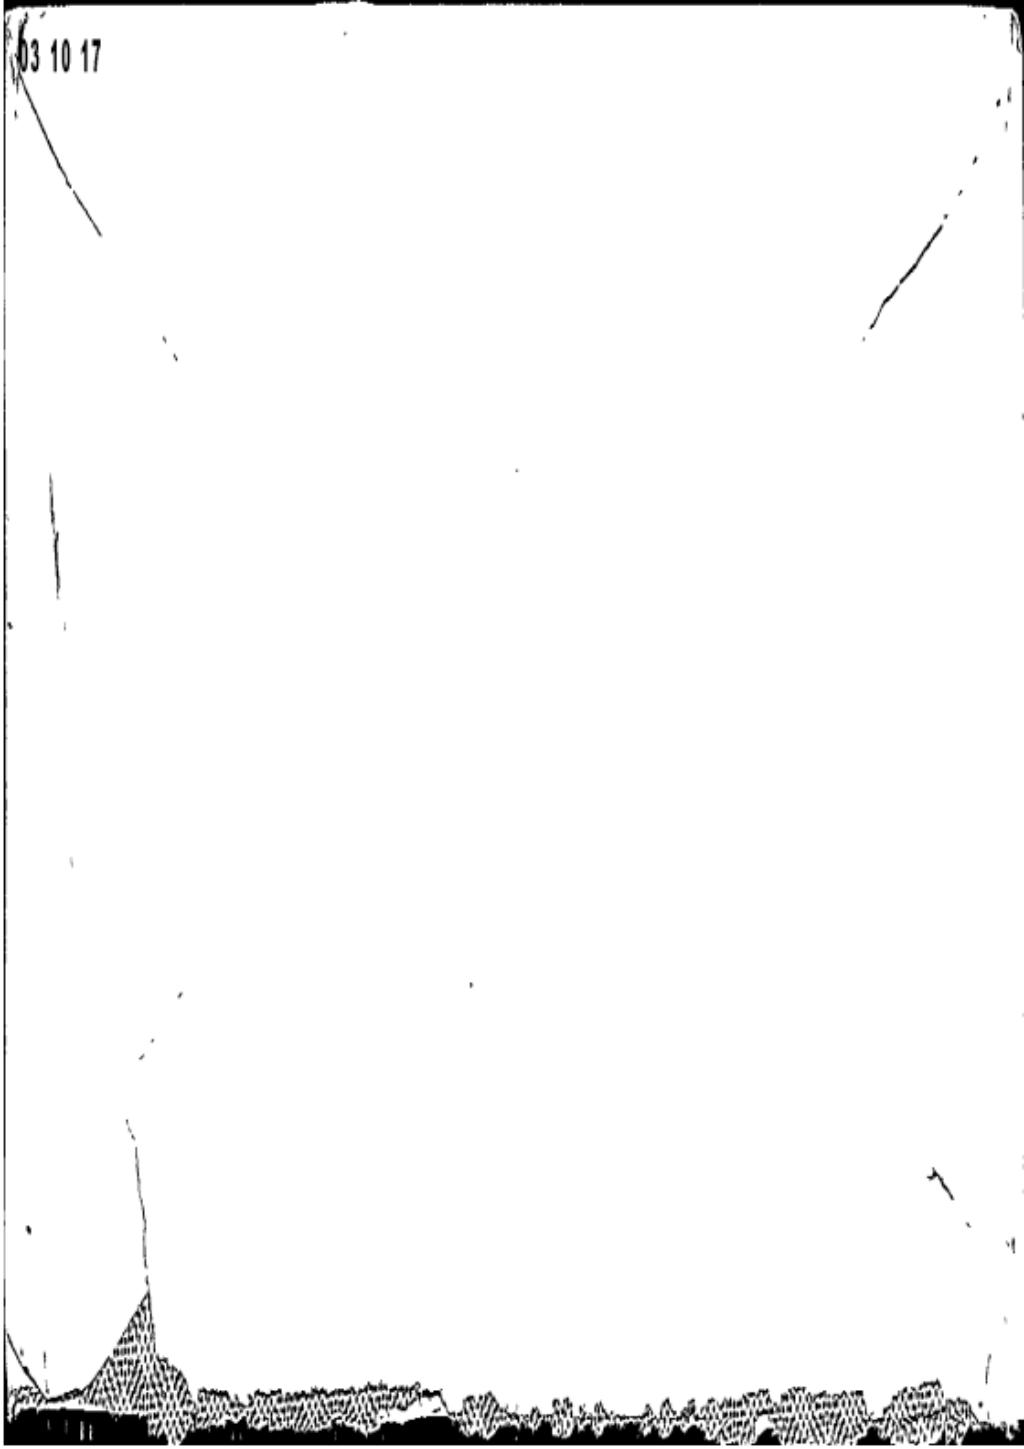

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 3 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 7 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to March 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Thursday March 2, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 03/02/2017 at 8:37am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. She states that she has noticed increased headaches as well. She states that she feels like the room is spinning. "I feel like on a rocking boat. It comes out of nowhere." Patient saw neurologist who ordered a new cervical and head MRI. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* slightly worse, *since* last week. *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->5/10. *Pain is* occasional. *Pain radicates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she has been experiencing daily headaches. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy; Neurological evaluation. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, *since onset.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is* occasional. *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that she has an injection scheduled for March 30, 2017 with Dr. Siddique. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* slightly worse, *since* last visit. *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 3->4/10. *Pain is* occasional. *Pain radicates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Encounter dated 03/02/2017 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 03/16/2017

Objective

Cervical: Range of motion: flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. Posture: forward head carriage; rounded shoulders. Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. Trigger points: left levator scapulae, bilateral upper trapezius. Orthopedic tests: left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. X-ray findings: Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. Spinal subluxation level(s): C1, C2, C5, C6, left occiput, left first rib. Subluxations detected by: motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Mild to Moderate. Trigger points: bilateral rhomboids. Orthopedic tests: Spinal percussion T1-T12: Negative; Shepplemans: Negative bilateral. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: 40/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** worse, increased headaches. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: slightly worse, active flexion decreased from 60 to 40 degrees. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space

Encounter dated 03/02/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 03/16/2017

narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.
Treatment schedule: 1x/week for 2 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 6 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization); Occiput left posterior (prone mobilization); C1 left lateral flexion restriction (Instrument adjustment Arthrostim); C2 left lateral flexion restriction (Instrument adjustment Arthrostim). *Physical*

Modalities: bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to March 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Thursday March 9, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 03/09/2017 at 4:40pm

Encounter dated 03/09/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 03/16/2017

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. She states that the headaches remain the same. Patient saw neurologist who ordered a new cervical and head MRI. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last week.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->5/10. *Pain is occasional.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. **Headaches:** Patient stated that she states that she has been experiencing daily headaches. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since onset.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that she has an injection scheduled for March 30, 2017 with Dr. Siddique. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 3->4/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* forward head carriage; rounded shoulders. *Hypertonicity & Tenderness:* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C1, C2, C5, C6, left occiput, left first rib. *Subluxations detected by:* motion and static palpation.

Encounter dated 03/09/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 03/16/2017

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Mild to Moderate. Trigger points: bilateral rhomboids. Orthopedic tests: Spinal percussion T1-T12: Negative; Sheppelman's: Negative bilateral. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: 40/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechtere: Negative. Spinal subluxation level(s): L4, L5, Left SL. Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). Cervical assessment: unchanged. Prognosis: Guarded. Post-treatment analysis: patient tolerated treatment without incident. Set backs: Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. Thoracic assessment: unchanged.

Lumbar assessment: unchanged. Post-treatment analysis: patient tolerated treatment without incident. Set backs: Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. Treatment schedule: 1x/week for 1 week; 1x every 2 weeks for 4 weeks; Re-examination for 5 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction

February 14, 2017

James Panzarella, DO
1208 Niagara Falls Boulevard
Tonawanda, NY 14150

Patient Name:	Danielle Harwell
Date of Birth:	08/29/1980
No-Fault Carrier:	NF Geico
CL#:	0138739400101059
Date of Injury:	10/31/15

Physiatry Re-evaluation: February 14, 2017

Chief Complaint(s): Neck pain, low back pain and bilateral leg pain, headaches.

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle Harwell in our Park Club Lane office for a re-visit on February 14, 2017.

HISTORY/CHIEF COMPLAINT

This is a 36-year-old female presenting today for re-evaluation. She reports overall her pain seems somewhat better at today's evaluation. She rates her pain score today 4/10 on the visual analog scale. This mostly has to do with her headaches and neck pain. She does feel that her low back pain improved following a caudal epidural injection in late October 2016, but at this point is noting some of her pain is recurring. She continues with chiropractic care, as well as medical massage therapy. She is utilizing naproxen for anti-inflammatory relief. She is following with Dr. McGive at Denl Neurologic Institute for her chronic headaches. Standing, coughing, lifting and walking aggravate her symptoms. She states that frequent position changes and activity changes help to keep her pain more tolerable. Despite her pain, she does manage a home, taking care of paraplegic husband, as well as three children. She denies clumsy hands, unsteady gait, bowel or bladder dysfunction or weakness. It is to be noted the patient did have some urinary retention and numbness for about 12 hours after her last caudal injection. She would be interested in pursuing further intervention at this time. There have been no other changes to her health history.

PHYSICAL EXAMINATION

BP Sitting: 127/86 **Pulse:** 91 **Resp:** 16 **Ht:** 63" **Wt:** 165lb **BMI:** 29.2

General: This is a 36-year-old female, in no acute discomfort. She is awake, alert and appropriate. Speech is fluent and coherent.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are pink and moist.

Cardiovascular: Normal S1, S2.

Abdomen: Soft, non-distended, obese.

Neuromusculoskeletal: The patient demonstrates well-preserved strength throughout the upper and lower limbs. Sensory examination is intact. She demonstrates symmetric muscle bulk and tone. There is limited range of motion at the lumbar spine with components of extension-based back pain. There is also some tenderness to the lumbar paraspinal muscles. She ambulates with a non-antalgic gait.

Psychiatric: Judgement and cognition are within normal limits.

ASSESSMENT

M54.16 - Radiculopathy, lumbar region, M51.26 - Other intervertebral disc displacement, lumbar region

IMPRESSION/RECOMMENDATIONS:

This is a 36-year-old female with neck, low back pain and headaches status post a motor vehicle accident. Lumbar MRI is significant for multi-level lumbar degenerative disc disease and facet joint arthropathy most concentrated L3-S1, paralumbar disc protrusion/herniations L4-5 and L5-S1 with elements of sacroiliac joint dysfunction and myofascial pain syndrome. At this time we recommend the patient undergo a repeat caudal epidural steroid injection. She reports greater than 50% improvement from an injection that was completed in late October 2016. She would like to proceed. Additionally, I have recommended the patient attempt a course of aquatic physical therapy. This was also recommended to her by her chiropractor as well. A script was provided. She will continue to follow with Dent Neurologic Institute for treatment of her headaches. She will continue with her medication regimen as detailed above. She will continue with her medical massage therapy. I will see her back one month following her injection or sooner as clinically warranted.

Thank you for allowing me to participate in Danielle's care. If you have any questions or concerns regarding this patient, please do not hesitate to contact me at your earliest convenience.

Sincerely,

Electronically signed by Sarah O'Mara, PA-C on 03/10/2017 at 1:21 pm

Procedure Note
Date: 03/21/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- No-Fault - Requires Opinion
- Trigger Point Injections. Headaches
- Neck pain

History of Present Illness

General:

Danielle is a 36-year-old patient with a history of migraine headaches, cervicigia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. She reports good benefit with her trigger point injections.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

- T & A
- D&C

Family History

Father: alive, Stroke
 Mother: alive, Asthma
 Siblings: alive
 1 brother(s) - healthy.

Social History

Tobacco Use:

Smoking Patient is a: non smoker.

Fall History:

Fell in the past year? No . Feel unsteady when standing or walking? No .

Alcohol use:

Alcohol Consumption: Patient does not drink alcohol.

Resides with:

Spouse: Husband. Children: Yes, x3. Self: Yes.

Working:

Employed: Stay at home mom.

Marital Status:

Married: Yes.

Driving:

Does Patient Drive: Yes.

Exercise:

Daily: Yes, Walks.

Caffeine:

Other: Patient does not consume caffeine.

Allergies

- Keflex
- codeine
- penicillin
- Biaxin
- Cipro
- Soma

Hospitalization/Major Diagnostic Procedure

See surgical history

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 114/74, HR 72, RR 16, Ht 63", Wt 220.0, BMI 38.97, BSA 2.10.

Examination

Neurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger

points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 9 cc was injected with a 25-gauge needle without complication into 9 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 03/21/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 03/21/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 03/21/2017.

Follow Up

4 Weeks

Electronically signed by Abbey Burdick , PA-C on 03/21/2017 at 09:26 AM EDT

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

(c)(6)(B) Any person who knowingly files a statement containing any misrepresentation or any false, incomplete or misleading information may be guilty of a felony if such individual is not subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

BLACK LIMS AND BECA CHAMPS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Line and FSCA instruction regarding required procedure and diversion of funding.

SPEC NATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable law, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the contractor to make an informed decision regarding my claim; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional services by my employee under my direct supervision, except as otherwise provided by Medicare or TRICARE; 6) for each service furnished incident to my professional services, the identifying (legal name and NPI) license(s) or SSN(s) of the primary physician or entity in which the service is furnished is included in the third-party identification section for services to be reimbursed incident to a physician's professional services; 7) they must be rendered under the physician's direct supervision by his/her employee; 2) they may be an integral, although incidental part of a covered physician service; 3) they must be of a kind commonly furnished in physician's offices; and 4) no service, including laboratory services, is being submitted for payment.

F. TRICARE claim: I, the beneficiary listed on my employment contract, who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government, a contractor employee of the United States Government, either civilian or military (refer to 5 USC §8505). For Black Lung claims, I further certify that the services performed were for a Black Lung related disorder.

No P-411 Merckam benches may be paid unless the following is received as required by existing law and regulations (42 CFR 464.37):

HOTLINE: Any person may make a false or fictitious statement or furnish erroneous information to receive payment from Federal funds requested by this form must, upon conviction, be subject to fine, imprisonment, or both.

NOTICE TO PATIENTS ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We also authorized by Title TRICARE and QMC to act for you in information needed in the administration of the Medicare, TRICARE, FED, and Black Lung programs. Authority to collect information is in section 205(m) 1882, and 407(e) of the Social Security Act as amended, 42 CFR 411.26(a) and 248(a)(8), and 44 USC 3101.41 CFR 101-11.999 and 10 USC 1019

The information is used to complete claims under these programs as well as to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by the program and to issue those payments or refunds.

This information may also be given to other providers of services, clients, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties (e.g., payers) to pay primary to Federal programs, and as otherwise necessary to administer those programs. For example, it may be necessary to disclose information about the services you have paid to a hospital or doctor. Additional disclosures are made through no, one uses for information contained in systems of records.

FOR "SEDICARE CLINIC": See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed., Sept. 15, 1990, areas outlined are redacted.

FOR OFFICERS OF THE DEPARTMENT OF LABOR: Privacy Act of 1974, "Regulation of Notice of Systems of Records," Federal Register Vol. 55 No. 40, M&D Feb. 28, 1990, See E&A-5, E&A-6, E&A-12, L-14-13, E&A-30, as so amended and as published.

FCC, TRIBUNAL CLAIMS: PURPOSE(S): To establish eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services rendered are reasonable and necessary.

POLITICAL PARTIES: Information from claims and related documentation may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation in accordance with the Freedom of Information Act, or to Congress, the Office of the Inspector General, or to the appropriate congressional committee under Title II-B of S. 1375 (CHAMPVA). In the case of the Dept. of Transportation, information may be given to the Dept. of Transportation in accordance with the Freedom of Information Act, or to Congress, the Office of the Inspector General, or to the appropriate congressional committee under Title II-B of S. 1375 (CHAMPVA).

Private Barriers, private collection agencies, and consumer reporting agencies in connection with recompence claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record relates. Agency disclosures may be made to state/federal, state, local, investigating government, genocides, private business entities, and individual consumers; or to state/federal, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, consultation of law, attorney and general litigation related to the operation of TRICARE.

regarding medical treatment, however, failure to provide information will result in early payment or may result in denial of claim. With the one exception discussed below, there are no minimum dollar amounts for which you must furnish supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under this program. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be disastrous to your claim.

I am sending my check to you from [REDACTED] responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 UCF 3801-3312 provide penalties

You shall have the right to inspect, copy, or receive a copy of your personal information held by us, and we will provide such information to you in an electronic format if feasible, unless doing so would interfere with our operations or would violate applicable law.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I have agreed to waive my rights as an enrollee to decline fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding payments claimed or paid on patients such as the State Agency or Dept. of Health and Human Services may request.

I further agree to pay my account in full, the amount paid by the *Kidz Card* program for the items submitted for payment under this program, with the *less* option of cashback as available.

SIGNATURE OF PHYSICIAN (OR CARRIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were furnished by me or my employee under my personal direction.

NOTICE: I acknowledge that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false statement, or concealment, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

A company or individual may file a FOIA request for records that are held by the FBI. No person is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 1190-0119. The time estimate to complete this information collection is estimated to average 10 minutes per response, including the time to review and verify the accuracy of the information submitted, and complete and review the information collection. If you have any comments concerning the accuracy of this time estimate, please contact the FBI, 7500 Security Boulevard, FBI PRA Requests Clearance Office, Mail Stop Q4-03-03, Baltimore, Maryland 21244.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.28(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE local intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health services provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned "Insured", i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5636). For Black-Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWC to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1962, 1972 and 1974 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a)(6); and 44 USC 1101.41 CFR 101 et seq and 10 USC 1079 and 1088; 5 USC 1101 et seq; and 30 USC 901 et seq; 38 USC 813, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties pay to primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No 177, page 37549, Wed. Sept. 12, 1990, as updated and republished.

FOR OWC CLAIMS: Department of Labor, Privacy Act of 1974. "Republication of Notice of Systems of Records," Federal Register Vol. 55 No 40, Wed Feb. 28, 1990. See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, as updated and republished.

FOR TRICARE CLAIMS PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/benefits received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompensation claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1126B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Report Clearance Officer, Mail Stop C4-28-05, Baltimore, Maryland 21244-1690. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Reason for Appointment

- No-Fault - Requires Opinion
- Trigger Point Injections Headaches
- Neck pain

History of Present Illness

General.

Danielle is a 36-year-old patient with a history of migraine headaches, cervicigia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. She reports good benefit with her trigger point injections.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally pm headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 9 cc was injected with a 25-gauge needle without complication into 9 areas in the back within the trapeziel and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING. Healthy Living: Patient counseled on the importance of healthy lifestyle 03/21/2017.

History of Present Illness

General:

Danielle is a 36-year-old patient with a history of migraine headaches, cervicalgia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. She reports about 1-1/2-2 weeks of relief with her trigger point injections.

Daniel also reports increased headache activity, also now with associated vertigo. She describes episodes of "room spinning". It will occur either before or along with her headaches. It generally does not occur without a headache. It has affected her to the point where she has had to pull over while driving. She did undergo full battery VNG testing 2 years ago which was normal. She had been going to physical therapy regularly which she believes did also include vestibular therapy, however she was discharged from this 3 months ago. She has found that the exercises she was taught to do for dizziness has not been helpful.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally pm headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day

Vital Signs

BP sitting 112/70, HR 68, RR 16, Ht 63", Wt 215.4, BMI 38.15, BSA 2.08.

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1 (Primary)
2. Vestibular dysfunction - H83.2X9
3. Concussion, without loss of consciousness, sequela - S06.0X0S
4. Cervical radicular pain - M54.12

Danielle reports worsening of her symptoms at today's trigger point injection appointment. Due to worsening headache activity and associated vertigo and nausea, he would like to obtain imaging including MRI brain and cervical spine, as these have not been obtained in over a year. Her previous MRI brain was normal and her previous MRI cervical spine showed some disc protrusions with no narrowing of canal. We would also like her to return to vestibular therapy. We will see her in 1 month for repeat trigger point injections. If her symptoms continue to worsen, she will likely need to be referred back to the dizziness clinic and possibly for repeat vestibular testing.

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Dr. McVige is the supervising physician on site.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

PATIENT: DANIELLE HARWELL

DOB: 8/29/1980

EXAM DATE: 3/27/2017

Referring: JENNIFER W. MCVIGE MD JAMES PANZARELLA DO

PROCEDURE: MRI OF THE CERVICAL SPINE

TECHNIQUE: An MRI scan of the cervical spine was obtained utilizing T1 weighted and T2 weighted scan sequences in the axial plane. The study also included T1 weighted scan sequences in the sagittal plane and STIR sequences in the sagittal plane.

This study is of good quality.

COMPARISON: OUTSIDE EXAMS, MR, MRI C-SPINE WO, 1/04/2016, 12:55.

INDICATIONS: History of disc protrusions with no narrowing of canal.

FINDINGS: The vertebral bodies are relatively normal in height and signal intensity. Only some subtle anterior spondylitic spurring is seen at C4-5 and C5-6. There is evidence of dextroscoliosis of the upper cervical spine. No definite evidence of spondylolisthesis or vertebral body compression is noted.

On the STIR sequences, no abnormal signal intensities are seen within the vertebral bodies.

The cervical cord is normal in size and signal intensity.

CONCLUSION: Abnormal serial MRI of the cervical spine demonstrating:

1. A mild degree of dextroscoliosis of the cervical spine without evidence of definite spondylolisthesis or vertebral body compression.
2. Posterior uncovertebral spur disc complexes seen at C4-5, C5-6 without foraminal or spinal stenosis.
3. The cervical cord is normal in size and signal intensity.
4. When compared to the study from 01/04/2016 there has not been a significant change.

PATIENT: DANIELLE HARWELL

DOB: 8/29/1980

EXAM DATE: 3/27/2017

Referring: JENNIFER W. MCVIGE MD JAMES PANZARELLA DO

PROCEDURE: MRI OF THE BRAIN

TECHNIQUE: An MRI scan of the brain was obtained utilizing T1 weighted, T2 weighted, FLAIR, diffusion weighted, and susceptibility weighted sequences in the axial plane. The study also included a FLAIR sequence in the sagittal plane.

The study is of good quality.

COMPARISON: None.

INDICATIONS: Worsening headache activity and associated vertigo and nausea.

FINDINGS: The ventricular system is normal for the patient's age without any shift or distortion.

On the FLAIR axial images no definite parenchymal abnormalities are noted.

The basal cisterns, sulci, and fissures are normal for the patient's age.

The signal voids within the anterior posterior arterial circulation are present. Superior sagittal sinus is patent.

The diffusion-weighted images are unremarkable.

No abnormalities are seen in the orbits, sinuses, or mastoids.

CONCLUSION: Normal MRI scan of the brain without contrast.

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS. A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If Item 9 is completed, the patient's signature waives release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health services provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured"; i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on the form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5336). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a)(6), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1086; 5 USC 1101 et seq; and 39 USC 801 et seq; 38 USC 613, E.O. 9397.

The information we obtain to compile claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37548, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990. See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S) To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

BOUTINFLUSFOR: Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompence claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, liaison, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3601-3612 provide penalties for withholding this information.

You should be aware that P.L. 100-603, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, co-insurance, co-payment or similar cost-sharing charges.

SIGNATURE OF PHYSICIAN (OR SUPPLIER) I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1996, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Report Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note
Date: 02/16/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- No-Fault - Requires Opinion
- Migraines
- Trigger point injections Headaches
- Neck pain

History of Present Illness

General:

Danielle is a 36-year-old patient with a history of migraine headaches, cervicalgia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. She reports about 1-1/2-2 weeks of relief with her trigger point injections.

Daniel also reports increased headache activity, also now with associated vertigo. She describes episodes of "room spinning". It will occur either before or along with her headaches. It generally does not occur without a headache. It has affected her to the point where she has had to pull over while driving. She did undergo full battery VNG testing 2 years ago which was normal. She had been going to physical therapy regularly which she believes did also include vestibular therapy, however she was discharged from this 3 months ago. She has found that the exercises she was taught to do for dizziness has not been helpful.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally pm headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Review of Systems

Neck pain, headaches, vertigo, nausea. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Bones	Sleep Studies
Doppler/TCD	SPECT
EEG	Ultrasound
EMG	TMS
InPACT	VNG
Infusion	

Vital Signs

BP sitting 112/70, HR 68, RR 16, Ht 63", Wt 215.4, BMI 38.15, BSA 2.08

Examination**Neurological:**

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1 (Primary)
2. Vestibular dysfunction - H83.2X9
3. Concussion, without loss of consciousness, sequela - S06.0X0S
4. Cervical radicular pain - M54.12

Danielle reports worsening of her symptoms at today's trigger point injection appointment. Due to worsening headache activity and associated vertigo and nausea, he would like to obtain imaging including MRI brain and cervical spine, as these have not been obtained in over a year. Her previous MRI brain was normal and her previous MRI cervical spine showed some disc protrusions with no narrowing of canal. We would also like her to return to vestibular therapy. We will see her in 1 month for repeat trigger point injections. If her symptoms continue to worsen, she will likely need to be referred back to the dizziness clinic and possibly for repeat vestibular testing.

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Dr McVige is the supervising physician on site

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Procedures**Injections:**

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 9 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. Sec 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if it is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured", i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on the form is true, accurate and complete, 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment inclusion but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 8) for each service rendered incident to my professional service, the identity (legal name and NPI), license #, or SSN of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 421.32).

NOTICE: Any one who misrepresents or omits essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a)(6), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1086, 5 USC 8101 et seq, and 30 USC 801 et seq; 38 USC 613, E.O. 13377.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, Mid, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37548, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with repayment claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to enrollment, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 9301-9312 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICARE PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Report Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21246-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

PATIENT: DANIELLE HARWELL

DOB: 8/29/1980

EXAM DATE: 3/27/2017

Referring: JENNIFER W. MCVIGE MD JAMES PANZARELLA DO

PROCEDURE: MRI OF THE CERVICAL SPINE

TECHNIQUE: An MRI scan of the cervical spine was obtained utilizing T1 weighted and T2 weighted scan sequences in the axial plane. The study also included T1 weighted scan sequences in the sagittal plane and STIR sequences in the sagittal plane.

This study is of good quality.

COMPARISON: OUTSIDE EXAMS, MR, MRI C-SPINE WO, 1/04/2016, 12:55.

INDICATIONS: History of disc protrusions with no narrowing of canal.

FINDINGS: The vertebral bodies are relatively normal in height and signal intensity. Only some subtle anterior spondylitic spurring is seen at C4-5 and C5-6. There is evidence of dextroscoliosis of the upper cervical spine. No definite evidence of spondylolisthesis or vertebral body compression is noted.

On the STIR sequences, no abnormal signal intensities are seen within the vertebral bodies.

The cervical cord is normal in size and signal intensity.

CONCLUSION: Abnormal serial MRI of the cervical spine demonstrating:

1. A mild degree of dextroscoliosis of the cervical spine without evidence of definite spondylolisthesis or vertebral body compression.
2. Posterior uncovertebral spur disc complexes seen at C4-5, C5-6 without foraminal or spinal stenosis.
3. The cervical cord is normal in size and signal intensity.
4. When compared to the study from 01/04/2016 there has not been a significant change.

PATIENT: DANIELLE HARWELL

DOB: 8/29/1980

EXAM DATE: 3/27/2017

Referring: JENNIFER W. MCVIGE MD JAMES PANZARELLA DO

PROCEDURE: MRI OF THE BRAIN

TECHNIQUE: An MRI scan of the brain was obtained utilizing T1 weighted, T2 weighted, FLAIR, diffusion weighted, and susceptibility weighted sequences in the axial plane. The study also included a FLAIR sequence in the sagittal plane.

The study is of good quality.

COMPARISON: None.

INDICATIONS: Worsening headache activity and associated vertigo and nausea.

FINDINGS: The ventricular system is normal for the patient's age without any shift or distortion.

On the FLAIR axial images no definite parenchymal abnormalities are noted.

The basal cisterns, sulci, and fissures are normal for the patient's age.

The signal voids within the anterior posterior arterial circulation are present. Superior sagittal sinus is patent.

The diffusion-weighted images are unremarkable.

No abnormalities are seen in the orbits, sinuses, or mastoids.

CONCLUSION: Normal MRI scan of the brain without contrast.

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: If a person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil pen. litig.

REFERS TO GOVERNMENT PROGRAMS ONLY

TRICARE/MD TRICARE PAYMENTS: A patient's physician requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Block 5 through 10 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and non-medical information, and authorizes his/her employer, entity or insurance company, to file a liability, no-fault, workers' compensation or other insurance which is responsible to pay for the services in this claim. Medicare claim is made. See 42 CFR 411.504. Item 9 is completed if the patient's signature authorizes release of the health plan or agency information to the health plan or agency office. In those cases where TRICARE does not administer the program it refers to the agency to accept the charge submission of the physician claim. TRICARE itself will make the final charge and the government responsible for "negligible, consequential and non-covered services." Compensation and the deductible are based upon the charge determination of the physician, carrier or TRICARE for inpatient liability. It also has the right to change submitted TRICARE is not a health insurance program but makes payment for health benefits provided through certain enrollment via the Uniform Services Insurance on the patient's signature should be provided in these items captioned as "insured", i.e., items 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The person whose service request the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (TRICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment, I certify that: 1) the information on this form is true, accurate and complete; 2) I have furnished my office with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) my claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and TRICARE regulations and program instructions for payment, including but not limited to the Federal anti-kickback statute and Physician Self-Referral Law (commonly known as Stark law); 5) the services on the form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision or as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license, etc.) or 85% of the primary individual rendering each service, is reported in the designated section for services to be considered "incident to" a physician's professional services; 7) they must be rendered under the physician's direct supervision by his/her employee; 8) they must be an integral, although incidental part of a covered physician's professional services; 9) they must be of funds commonly furnished in physician's offices, and 10) the services of non-physicians must be included on the physician's bill.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black-Lung claims, I further certify that the services performed were for a Black-Lung related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OMB to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1626, 1627 and 1674 of the Social Security Act as amended, 42 CFR 411.34(p) and 424.5(a)(5), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1080, 6 USC 8101 et seq. and 30 USC 901 et seq. 38 USC 613, E.O. 13377.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties to pay primary to Federal programs, and as otherwise necessary to administer those programs. For example, it may be necessary to disclose information about the results you have had at a hospital or clinic, additional disclosures can made through multiple uses for information contained in system - of records.

FOR MEDICARE CLAIMS: See the notice modifying item No. 09-70-0701, titled, "Clarification Medicare Claims Report," published in the Federal Register, Vol. 65 No. 177, page 57943, Wed. Sept. 17, 2002, or its update if and reproduced.

FOR CHOP-CI (AMERICAN) PLAN OF LIFE, Privacy Act of 1974, "Restitution of Nutria of Systems of Records," Federal Register Vol. 56 No. 40, Wed Feb. 26, 1991, Sec. 136.5, PMA-5, CBA-12, DVA-12, FSA-12, or its update if and reproduced.

FOR TRICARE CLAIMS: PRINCIPLE: To evaluate eligibility for medical care provided by civilian sources and to issue payment upon evidence of liability and documentation that the care supplied is rendered and authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services, and/or the Dept. of Transportation consistent with their statutory authority and/or permission under TRICARE/RETIREMENT; to the Dept. of Justice for representation of the Secretary of Defense; in civil actions to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with repayment claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosure may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care, on notices relating to enrollment, claim, adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation involved in the operation of TRICARE.

DISCLOSURE(S): Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-803, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding our payments claimed for providing such services, as the State Agency or Dept. of Health and Human Services may request.

I further agree to certify, or pay medical bills, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, insurance co-payment or similar cost sharing charges.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were properly furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statement, or documents, or noncompliance of a material fact, may be prosecuted under applicable Federal or State laws.

According to Title 44, Part 1, section 10, the system is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0110. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, to gather relevant data, to complete and review the information collection. If you have any comments concerning the accuracy of the time expenditure or any suggestions for improving this form, please send an e-mail message to GSA, FECA Projects Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21204-1870. That address is for comments and inquiries only. DO NOT MAIL COMPLETED OR ALREADY FILLED OUT FORMS TO THIS ADDRESS.

Electronically signed by Peter Guzinski DC on 03/16/2017 at 12:04pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain and headaches. Patient saw neurologist who ordered a new cervical and head MRI. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last week.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->5/10. *Pain is occasional.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she has been experiencing daily headaches. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since onset.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that she has an injection scheduled for March 30, 2017 with Dr. Siddique. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 3->4/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Encounter dated 03/16/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 03/31/2017

Objective

Cervical: Range of motion: flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. Posture: rounded shoulders. Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. Trigger points: left levator scapulae, bilateral upper trapezius. Orthopedic tests: left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. X-ray findings: Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. Spinal subluxation level(s): C1, C2, C5, C6, left occiput, left first rib. Subluxations detected by: motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Mild to Moderate. Trigger points: bilateral rhomboids. Orthopedic tests: Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: 40/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** unchanged. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in

Encounter dated 03/16/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 03/31/2017

mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* continue 1x/week for 2 weeks; 1x every 2 weeks for 2 weeks; Re-examination for 4 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (flexion/distraction); L5 extension restriction (flexion/distraction); SI left PI (prone mobilization); Occiput left posterior (prone mobilization); C1 left lateral flexion restriction (Instrument adjustment Arthrostim); C2 left lateral flexion restriction (Instrument adjustment Arthrostim). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to March 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain and headaches. Patient going for her cervical and head MRI on March 27, 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. since last week. *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->5/10. *Pain is occasional.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she has been experiencing daily headaches. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy; Neurological evaluation with trigger point injections. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. since onset. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. She states that she has an injection scheduled for March 30, 2017 with Dr. Siddique. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. since last visit. *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 3->4/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C1, C2, C5, C6, left occiput, left first rib. *Subluxations detected by:* motion and static palpation.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Friday April 7, 2017 Provider: Peter Guzinski DC RE-EXAM

Electronically signed by Peter Guzinski DC on 04/09/2017 at 12:24pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Accident Description: *Date of Accident:* October 31, 2015. *Time of Accident:* 4:55 PM. *Narrative Description of Accident:* Patient stated that she was stopped in traffic, while waiting for a truck to make a left hand turn into a driveway, when she was rear impacted. She stated that accident occurred while she was traveling South on Starin in the City of Buffalo, New York. Mrs Harwell, stated that this was a chain reaction accident. The vehicle that was behind her was also stopped and was pushed into her vehicle by an automobile that rear impacted them. *Patient Seatbelted?* Yes. *Position in vehicle driver.* *Patient Position at Impact:* looking straight ahead. *Impact Point of Patient's Car:* rear. *Brakes On At Time of Impact?* Yes. *Airbags Deployed?* No. *Did The Patient's Seat Break?* No. *Impact With Car Interior?* seatbelt left chest; headrest back head. *Patient's Vehicle Type:* Honda Odyssey 2007. *Type of Other Vehicle:* Honda CRV 2015. *Road Conditions At Time of Accident:* dry. *Was There Loss of Consciousness?* no. *What Symptoms Were Immediately Present?* Patient stated that she was experiencing head, neck, back and left shoulder and arm pain.

Cervical: Patient presented today with the continued chief complaint of neck pain. She stated that she had a brain and cervical MRI performed on March 27, 2017. Due to the pain, she is unable to lift heavy weights, she has moderate headaches which come infrequently and she can do most of her usual work, but no more. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last re-examination on February 7, 2017. *Pain:* achy, dull, sharp, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Cervical Disability Index:* 28%. *Recent medical treatment for this condition:* Head and cervical MRI; Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving.

Encounter dated 04/07/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/13/2017

since last re-examination on February 7, 2017. **Pain:** achy, dull, sharp, shooting; level: 3/10. **Pain is frequent.** **Exacerbates symptoms:** movement; bending; lifting; activities of daily living; reaching; activities of daily living. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Oswestry score:** 28%.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain has been better since her recent set of injection. She stated that she had lumbar injections performed on March 30, 2017 with Dr. Siddique. Due to the pain, she is unable to lift heavy weights, she is unable to sit greater than 30 minutes, she is unable to stand greater than 60 minutes and she is unable to travel on journeys greater than 60 minutes. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior low back pain:** none. **Changes in this condition:** improving, since last re-examination on February 7, 2017. **Pain:** achy, dull, sharp, shooting, numb. **Range:** 2->3/10. **Pain is frequent.** **Pain radiates to:** left posterior thigh and leg. **Exacerbates symptoms:** driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Bowel or bladder incontinence:** No. **Recent infection or fever:** No. **Night sweats or pain:** No. **OSWESTRY Disability Index:** 28%. **The Keele Start Back Screening Tool:** Low risk. **Recent medical treatment for this condition:** Pain management evaluation with injections. **Changes in past medical history:** None.

Activity of Daily Living Form Bending forward/backward: moderate impairment; Driving: mild impairment; Drying Hair: mild impairment; Household chores: moderate impairment; Laundry: moderate impairment; Lifting less than 10 lbs: mild impairment; Lifting more than 10 lbs: severe impairment; Kneeling: mild impairment; Making Meals: moderate impairment; Prolonged Sitting more than 30 minutes: moderate impairment; Putting pants on: mild impairment; Putting shoes/socks on: mild impairment; Reaching above the shoulders: no impairment; Restful night's sleep: no impairment; Seated to standing position: mild impairment; Sexual activity: moderate impairment; Standing: mild impairment; Squatting: mild impairment; Tying shoes: mild impairment; Using lavatory: no impairment; Walking: no impairment.

Objective

Cervical: Her recent cervical and brain MRI were not available for review today. **Range of motion:** flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. **Posture:** rounded shoulders. **Strength:** left deltoid: 4/5; all other upper extremity musculature (C5-T1) were graded 5/5. **Sensation:** all upper extremity sensory exams (C5-T1) were WNL to Pin prick. **Hypertonicity & Tenderness** Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Reflexes:** bilateral upper extremity reflexes (C5, C6, C7) 2+. **Orthopedic tests:** left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Mild to Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppelman's: Negative

Encounter dated 04/07/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/13/2017

bilateral. *Spinal subluxation level(s)*: T2, T3, T6, T7, T8, T9. *Subluxations detected by motion and static palpation*.

Lumbar/Sacral/Pelvis: *Range of motion*: flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Heel to toe walking*: WNL. *Gait pattern*: normal. *Strength*: all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Sensation*: all lower extremity sensory exams (L1-S1) were WNL to Pin prick. *Tenderness & Hypertonicity* lumbar paraspinal left mild to moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. *Tenderness on palpation*: left SI: mild to moderate. *Trigger points*: left gluteus maximus. *Reflexes*: bilateral lower extremity reflexes (L4 and S1) 2+. *Orthopedic tests*: Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise: Positive right at 60 degrees; Bechterew: Negative; Minor's sign: Negative; Slump Test: Negative bilateral; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for lower back pain on a cough or sneeze. *Spinal subluxation level(s)*: L4, L5, Left SI. *Subluxations detected by*: motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-examination on February 7, 2017 her active cervical rotation improved from 60 to 70 degrees and she is now able to sleep without being limited by neck pain. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL. **Diagnosis**: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis**: Guarded. **Post-treatment analysis**: patient tolerated treatment without incident. **Set backs**: Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment**: unchanged.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last re-evaluation on February 7, 2017. Her active lumbar flexion improved from 20 to 60 degrees, extension from 10 to 15 degrees, bilateral rotation from 20 to 30 degrees and left lateral flexion from 15 to 25 degrees. In addition, her left SLR improved from 30 to 60 degrees. Further treatment is medically necessary to help improve her active lumbar ROM and improve her ability to sit, stand, bend, perform household chores and lift with less pain. **Post-treatment analysis**: patient tolerated treatment without incident. **Set backs**: Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion

Encounter dated 04/07/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/13/2017

(herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 4 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 8 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to May 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Abbreviations

ADL: activities of daily living
MVA: motor vehicle accident
ROM: range of motion
WNL: within normal limits

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Tuesday March 28, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 03/28/2017 at 11:06am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain and headaches. Patient stated that she had her neck and head MRI last night. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since* last week. *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->5/10. *Pain is occasional.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she has been experiencing daily headaches. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy; Neurological evaluation with trigger point injections. *Changes in past medical history:* None.

Thoracic: Patient stated that her middle back pain remains the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since onset.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is occasional.* *Exacerbates symptoms:* movement; bending; lifting; activites of daily living; reaching; activites of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain has been more intense since last for her MRI yesterday. She stated that she was unable to get off the table due to the pain. She states that she has an injection scheduled for March 30, 2017 with Dr. Siddique. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since* last visit. *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 5->6/10. *Pain is occasional.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Encounter dated 03/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/13/2017

Objective

Cervical: Range of motion: flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. Posture: rounded shoulders. Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. Trigger points: left levator scapulae, bilateral upper trapezius. Orthopedic tests: left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. X-ray findings: Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. Spinal subluxation level(s): C1, C2, C5, C6, left occiput, left first rib. Subluxations detected by: motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Mild to Moderate. Trigger points: bilateral rhomboids. Orthopedic tests: Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: 40/60 with pain lower back; extension: 10/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: WNL 30/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild to moderate. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Patrick's/Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** unchanged. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in

Encounter dated 03/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/13/2017

mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* continue 1x/week for 2 weeks; Re-examination for 2 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (anterior); T3 left rotation restriction (anterior); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (flexion/distraction); L5 extension restriction (flexion/distraction); SI left PI (prone mobilization); Occiput left posterior (prone mobilization); C1 left lateral flexion restriction (Instrument adjustment Arthrostim); C2 left lateral flexion restriction (Instrument adjustment Arthrostim). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left humbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes.

Additional instructions: Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and/or control pain.

Disability status: Temporary partial starting on November 12, 2015 to April 30, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Abbreviations.

ADL: activities of daily living
MVA: motor vehicle accident
ROM: range of motion
WNL: within normal limits

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY / APPLICABLE PROGRAMS.
 NOTICE: Any person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

REG. 411.210 TRICARE PAYMENT: A patient's signature, where it is known that payment will be made and releases release of any information necessary to process the claim and certifies that the individual identified in Pacer 1 through 12 has, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and non-medical information and identifies the person has a employer group health insurance, liability, no-fault, workers' compensation or other insurance which is responsible to pay for the services furnished the healthcare claim as follows. See 42 CFR 411.210(a), if item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency that, in the opinion of the physician, is responsible for the deductible, copayments and non-covered services. Consents and the deductible can be copied onto the charge documentation. See Medicare name of provider (Healthcare claim) if item 9 is not checked, then no charge. Tricare is not a health insurance program but makes payment for health benefits provided through contractor to the Uniformed Services. The information on the patient's sponsor should be provided in these boxes captioned "Inured", i.e., items 10 & 11, 12 & 13, 14 & 15.

BLACK LUNG AND FECA CLAIMS

The amount shown is the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedures and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA, AND BLACK LUNG)

I acknowledge that I am filing a claim for payment from Federal funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed decision; and payment decision; 4) the claim number submitted by me or on my behalf, by my designee being completely consistent with an appropriate Medicare, FECA, and/or Black Lung claim number, and provides for payment according to law but not limited to the Federal rate-tables; 5) I am and Physician Bill Retainer law (commonly known as Stark law); 6) the services rendered are not medically necessary in nature, and personally furnished to my professional service by my employee under my direction, my direct, cap, or noncap, except as otherwise may be permitted by Medicare or TRICARE; 6) for each service rendered, I am not paid in part, in the discounted scenario. For services to be coded, not "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they may be rendered by a physician's non-physician, 3) they must be of good condition furnished by physician's employee, and 4) the services, or non-physicians must be included on the physician's bill.

For TRICARE claims, I further certify that: 1) my employee/veteran rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contractor or employee of the United States Government, other civilian or military (refer to 5 USC 3336). For Black Lung claims, I further certify that the services performed by you for a Black Lung medical provider.

For FECA and Black Lung claims, my signature below this form is received as required by existing law and regulations (42 CFR 424.2).

NOTICE: Any person who knowingly files inaccurate information to receive payment from Federal funds requested by the firm may upon conviction, be subject to fine and imprisonment under applicable criminal laws.

NOTICE TO PAYMENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, THICARE and CIVICP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in sections 205(h), 107, and 107c of the Social Security Act as amended, 42 CFR 411.24(p) and 421.5(a)(6), and 44 USC 3101, 1 CFR 101 et seq and 10 USC 1079 and 1079.5 USC 3101 et seq, and 30 USC 601 et seq 38 USC 610, E.O. 9897.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to detect if the services and supplies you received are covered by these programs and to ensure that proper payment is made.

The information may also be given to other providers of services, companies, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the objective administration of Federal programs that require other third parties pay to primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used in a hospital or doctor. Additional disclosures are made through routine uses for information retained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 00-70-0001, titled, "Gamer Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37548, Wed. Sept. 12, 1990, as updated and republished.

FOR OIGCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990. See RSA-5, EGA-6, EGA-12, EGA-13, EGA-30, as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the service supplied received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense, in civil actions; to the Health Resources Service, private collecting agencies, and consumer reporting agencies in connection with recoupment claims; and to Congressional Offices in response to inquiries made at the request of the House or Senate in regard to record patterns. Appropriate disclosures may be made to other Federal, state, local, foreign government agencies, payor's business entities, and individual providers of care, on matters relating to enrollment, claims, nondisclosure, fraud, program abuse, utilization review, quality assurance, peer review, premium inquiry, third-party liability, continuation of benefits, and civil and/or criminal litigation related to the operation of TRICARE.

INSTRUCTIONS: Voluntarily or, if ever, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under the program for failing to supply information. However, failure to furnish information regarding the medical services rendered or the "amount charged would" prevent payment of claim, which then negates. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to furnish medical information under FECA, could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1198B of the Social Security Act and 31 USC 3401-3112 provide penalties for withholding the information.

You are advised to consult Title P.L. 102-393, the "Computer Matching and Privacy Protection Act of 1992," prior to the government to verify information by way of computer matching.

PHYSICAL PAYMENTS (PROPOSED CERTIFICATION)

I hereby agree to be bound by rules and regulations to disclose fully my cost of services provided to individuals under the State's Medicaid plan and to furnish information to the appropriate Medicaid contractor or agency on the State Agency or Dept. of Health and Human Services may request.

I further agree to submit, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under this program with the exception of deductible, coinsurance, co-payment or similar co-charging charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal decision.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false claim, documents, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

ATTACHMENT: I, Robert J. Binkowski, # 415-51199, am required to respond to a collection of information unless I display a valid OMB control number. The valid OMB control number for this information is 0937-1190. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to answer the questions, search existing records, gather the required information, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate or any suggestions for reducing this burden, please write to: CMS, PRA Reports Clearance Officer, Mail Stop C4-98-03, Baltimore, Maryland 21201. Thank you for your assistance in making our forms more user friendly and accurate. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note Date: 04/25/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- Migraines, Trigger Point Injections, Headaches
- Neck pain

History of Present Illness

General:

Danielle is a 36-year-old patient with a history of migraine headaches, cervicalgia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. The patient reports good results with her trigger point injection. She does still complain of dizziness. She has not yet started vestibular therapy. MRI results were reviewed with the patient which have remained unchanged since previous over one year ago.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

- T & A

Family History

Father: alive, Stroke
 Mother: alive, Asthma
 Siblings: alive
 1 brother(s) - healthy.

Social HistoryTobacco Use:

Smoking Patient is a: non smoker .

Fall History:

Have you fallen: No . Do you feel unsteady when: No .

Alcohol use:

Alcohol Consumption: Patient does not drink alcohol.

Ilicit Drugs:

Using illicit drugs: Denies.

Resides with:

Spouse: Husband. Children: Yes, x3. Self: Yes.

Working:

Employed: Stay at home mom.

Marital Status:

Married: Yes.

Driving:

Does Patient Drive: Yes.

Exercise:

Daily: Yes, Walks.

Caffeine:

Other: Patient does not consume caffeine.

Allergies

- Keflex
- codeine
- penicillin
- Biaxin
- Cipro
- Soma

Hospitalization/Major Diagnostic Procedure

See surgical history

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 122/74, HR 76, RR 16, Ht 63, Wt 221.8, BMI 39.29, BSA 2.11.

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

. Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 8 cc was injected with a 25-gauge needle without complication into 8 areas in the back within the trapeziell and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 04/25/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 04/25/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 04/25/2017.

Follow Up

4 Weeks

Electronically signed by Abbey Burdick , PA-C on 04/25/2017 at 09:48 AM EDT

After consenting to the procedure the patient was taken to the operating room and positioned on the fluoroscopy table. Sterile prep and drape was done and procedure started as stated above. Local anesthetic was administered. Screening fluoroscopy was utilized to identify the levels stated above. The needle was advanced under direct visualization. The patient's vital signs remained stable throughout the procedure and the patient was taken to the recovery room in stable condition.

HEALTH INSURANCE CLAIM FORM

APPROVED BY NATIONAL UNIFORM CLAIM COMMITTEE (NUCC) 02/12

GEICO Ins Co NY
P.O. Box 9507
Fredericksburg, VA 22403

PATIENT AND INSURED INFORMATION

THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS. SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a federal civil and/or criminal offense.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENT: A complete signature signifies that payment for medical and other services is authorized by the patient. The signature is not necessary to process the claim and certifies that the information provided therein is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and related information which the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay or be liable for the Medicare claim. Under 42 CFR 414.51(a), if item 6 is completed, the patient's signature certifies the release of the information to the health plan or agency shown in item 6, unless otherwise designated. TRICARE beneficiaries, when they agree to accept TRICARE as their primary provider of the healthcare benefit, the liability and payment is responsibility only to the DoD health insurance and medical care and services. **CONTRACTOR** and the deductible (as base) upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary (less, after the charge submitted). TRICARE is not a health insurance program but makes payment for health benefits provided through certain authorities in the Uniform Services. Information on the claim's charges should be provided in there terms captured in "item 6," items 16, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, Electronically signed by Peter Guzinski DC on 04/11/2017 at 9:52am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. She stated that she had a brain and cervical MRI performed on March 27, 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activites of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain remains the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb. *Range:* 2->3/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: Her recent cervical and brain MRI were not available for review today. *Range of motion:* flexion:

Encounter dated 04/11/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/28/2017

WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Strength:* left deltoid: 4/5; all other upper extremity musculature (C5-T1) were graded 5/5. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal left mild to moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: mild to moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise: Positive right at 60 degrees; Bechterew: Negative. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Post-treatment analysis: patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural

Encounter dated 04/11/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/28/2017

foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 3 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 7 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to May 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown in Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain utilizations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured"; i.e., Items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor, 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision, 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-locksback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (begin name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral although incidental part of a covered physician service, 3) they must be of value commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black-Lung claims, I further certify that the services performed were for a Black-Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a) (6), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1088; 5 USC 8101 et seq, and 30 USC 901 et seq, 38 USC 613, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S). To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recoupment claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: I.C. 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-25-05, Baltimore, Maryland 21244-1650. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note
Date: 04/25/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- Migraines, Trigger Point Injections Headaches
- Neck pain

History of Present Illness

General.

Danielle is a 36-year-old patient with a history of migraine headaches, cervicalgia and associated trigger point. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. The patient reports good results with her trigger point injection. She does still complain of dizziness. She has not yet started vestibular therapy. MRI results were reviewed with the patient which have remained unchanged since previous over one year ago.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 intl units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking nizatidine 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 122/74, HR 76, RR 16, Ht 63, Wt 221 8, BMI 39 29, BSA 2.11

Examination

 Batavia Office | 35 Batavia City Centre • Batavia, NY 14020 | Fax: (716) 250-2045

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

. Continue all previously prescribed medicines at the current doses

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Procedures

Injections.

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 8 cc was injected with a 25-gauge needle without complication into 8 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 04/25/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 04/25/2017.

Exercise: Patient counseled on importance of moderate physical activity daily 04/25/2017.

Follow Up

4 Weeks

Electronically signed by Abbey Burdick , PA-C on 04/25/2017 at 09:48 AM EDT

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Friday April 28, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 04/28/2017 at 10:10am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* slightly worse. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb. *Range:* 4->5/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. **Headaches:** Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, they can last a few hours but not all day anymore. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain remains the same. She stated that she still has been experiencing pain radiating down her left lateral thigh. Patient seeing Dr. Siddique on May 2, 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb. *Range:* 3->4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. **Bowel or bladder incontinence:** No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Encounter dated 04/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 05/11/2017

Cervical: Her recent cervical and brain MRI were available for review today. *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Strength:* left deltoid: 4/5; all other upper extremity musculature (C5-T1) were graded 5/5. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal left mild to moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: mild to moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise: Positive right at 60 degrees; Bechterew: Negative. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: slightly worse. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. Cervical MRI was performed at DENT on March 27, 2017. According to the radiologist, only some subtle anterior spondylitic spurring is seen at C4-C5 and C5-C6. There is evidence of dextroscoliosis of the upper cervical spine. MRI of the brain was performed at DENT on March 27, 2017. According to the radiologist, it was a normal MRI scan of the brain without contrast.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set*

Encounter dated 04/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 05/11/2017

backs: Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. **Treatment schedule:** 1x/week for 1 week; 1x every 2 weeks for 4 weeks; Re-examination for 5 weeks. **Subluxations found on assessment and adjusted:** C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). **Physical Modalities:** bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapulae trigger point therapy; left rhomboid trigger point therapy. **Patient given:** home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. **Home care:** ice: neck / lower back pm for 20 minutes. **Additional instructions:** Advised patient to monitor for any changes in their symptoms. **Short term goals:** decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. **Long term goals:** decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. **Disability status:** Temporary partial starting on November 12, 2015 to May 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

NOTE: Any person who has made false or fictitious claims concerning new misclassification or any false, incomplete or misleading information sent by mail or

HEDIMCONE AND LIFEART TRICARE® A patient's signature signifies that payment has made and authorizes release of any information necessary to process the claim and/or indicates that the information contained in Block 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes and entitles to release to Medicare medical information contained in the claim form. A statement and signature by the carrier, plan or employer group health insurance, liability, auto, workers' compensation or other insurance which is responsible for payment for the claim is also required. See 42 CFR 430.141(d)(4). Item 9 is completed. The patient's signature authorizes release of the information to the life insurance plan or agency plan or to the life insurance company for the group health insurance coverage and life-covered services. Consistently and the deductible(s) based upon the charge information of the Medicare carrier or TRICARE for medical services if the U.S. has the claim filed. TRICARE is not a health insurance program but makes payment for health care provided through certain military health care facilities, medical clinics, hospitals, dentists, optometrists, orthodontists, audiology, laboratories, pharmacists, physical therapists, speech pathologists, dietitians, social workers, nurses, and home health aides.

BLACKLINE AND READING

-This proposal is subject to approval by the Government as payment in full. See Black Lung and FECA Instructions regarding required pre-claim and claimant coding systems.

156 WOODRINGE PHYSICIAN 28 SUPPLEMENT TO 2009 CAMPUS TRICARE, FECA AND D-4 ACTIVITIES

In establishing the claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow this government to rule on my claim(s); 4) I am entitled to payment under this claim; 5) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare vendor rules; 6) I understand that if, at any time, it is determined that my claim(s) are not payable, I may be liable for repayment of any payment made to me, plus interest, and that I may be subject to a civil fine or criminal prosecution; 7) I have been advised, by my attorney or personally informed by me or were furnished to me in writing by my professional service, the identity (legal name and NPI, license #, or RSN) of the entity or individual rendering the services as reported in the dispensing service; for services to be considered "incident to" a physician's professional services, 8) they must be performed under the direction and direct supervision by her/his physician; 9) they must be an integral, although incidental part of a covered physician service; 10) they will be of benefit, commonly furnished in the dispensing service; and 11) no services for non-physician must be included on the physician's bills.

For TRICARE claims, I attest to the fact that I (or my employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government (other civilian or military), other than Black Lung claims, I further certify that the services performed were for a Black Lung related disorder.

No Part II election, benefits may be used unless this form is received as required by existing law and regulations (42 CFR 136.32).

NOTICE: Any one who misrepresents or fails to furnish information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

WARNING TO CONSUMERS ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, HCPCS, and GHPIC to ask you for information needed in the administration of the Medicare, HCPCS, and Black Lung programs. Authority to collect information is in section 1105(a) (1)(B) and 1877 of the Social Security Act as amended, 42 CFR 411.84(a) and 494(a)(6), and 45 USC 3101(a)(1) CFR '91 as seq and 10 USC 101(a)

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you receive are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations if Federal agencies for the effective administration of Federal programs require other third parties to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to give this information about the benefit you have entitled to a hospital or doctor. Additional disclosures are made through routine uses for information on claims in systems of records.

POR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0901, titled, 'Carrier Medicare Claims Record,' published in the Federal Register Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, or an update and republished.

FOR CMCF CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, Ser E8A-5, E8A-6, E8A-12, E8B-13, E8A-10, or as undated and reprinted.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and confirmation that the services/claims received are authorized by law.

HIGHLIGHTS: Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services, and/or the Dept. of Transportation.

Other TRICARE administrative responsibilities of the TRICARE Office include the development of regulations for the delivery of medical care, enrollment, claims processing, and payment by the Defense Health Service, private collection agencies, and consumer reporting agencies in connection with recipient claims; and to Congressional Offices in response to inquiries made at the request of the public to whom a service provides. Appropriate disclosure may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care or services related to enrollment, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, recuperation of benefits, and civil and criminal litigation related to the operation of TRICARE.

INTEGRAL GROUP < You shall, however, failure to provide information will result in delay in payment or may result in denial of claim. With 90th day exception discussed below, there are no extensions granted for filing of claims for medical expenses. However, failure to furnish Information regarding the medical services rendered or the amount charge I would request payment of before and/or the program. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information via FSCA, will be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 109-503, i.e. 'Computer Matching and Privacy Protection Act of 1988', permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

1. The City agrees to keep such records as are necessary to document the costs of services provided to individuals under the State's Title XX plan and to furnish information regarding payments claimed for providing such services to the State Agency or Dept. of Health and Human Services as may be requested.

I further agree to do my best payment plan, the current plan of the Medicaid program in these same substances for payment under this program, with the exception of animal care, insurance, co-payment or similar cost sharing charge.

NOTICE: The employee shall keep the documents referred to in Article 10 of the present contract in his/her possession, furnished by me or my employee under my personal direction.

According to the Paperwork Reduction Act of 1995, you are not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for the Information Collection Request is 1125-0001. This request is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate or suggestions for improving the form, please contact: CMS, 2000 Revere Boulevard, Attn: PRA Response Clearance Officer, Mail Stop 04-26-03, Baltimore, Maryland 21236.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAM.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

LIFETIME AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible for pay for the services for which the Medicare claim is made. See 42 CFR 411.2(a)(4). Item 9 is completed. The patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assignable or TRICARE participation cases, the physician agrees to accept the charge determined by the Medicare carrier or TRICARE fiscal intermediary as the full charge and the physician is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if 2% to less than 10% charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations.

BLACKLINES AND RECALL CLAIMS

The previous entries to record the amount used by the Contractor as comment in J11. See Black Luma and RECA instructions re-garding required procedure re: distributor coding systems.

REGISTRATION OF PHYSICIAN OR STAFF FOR MEDICARE, TRICARE, FECA AND BLAIS LUNCHEON

In requesting that claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have furnished my self with all applicable instructions, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make informed eligibility and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on the line(s) are medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise stated or permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identifier (legal name and NPI, license#, or EBN) of the primary individual rendering such service is printed in the designated section for services to be considered "incident to" a physician's professional services; 7) they may be rendered under the direction and/or supervision by my lesser employee; 8) they may be an integral (though incidental part of a covered physician service, 9) they must be of items currently furnished in reasonable office, and 10) the location of rendered, as must be included on the physician's bills.

For TRICARE claims, I further certify that, for any individual(s) who rendered services or not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to USC 5398). For Black Lung claims, I further certify that the services performed were for a BIA-Listed Lavor related employer.

No Part II Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.37).

MDIGIC: A person who misappropriates or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

VA and authorized in 43 U.S.C. TRICARE, the CWA, is set by you for maximum benefit in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to do this under section 1301 of the CWA, 1982, 1972 and 1971 of the Social Security Act as amended, 42 CFR 411.26(a) and 42 CFR 515.16, and 44 USC 3101 et seq. and 10 USC 1070 et seq., 1980 5 USC 8101 et seq., and 99 USC 801 et seq; 38 USC 813, E.O. 9597.

The information we obtain to complete claim forms in these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you receive are covered by these programs and to insure that proper payment is made.

The information may often be given in other forms of services, grants, intermediaries, financial review boards, and other organizations or Federal agencies. In the administration of Federal provisions that require other third parties to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have had to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FCC PRACTICALLY CLIMBED. See the notice, including system No. 69-70-0501, titled, "Carrier Medium Claims Record," published in the Federal Register, Vol. 55 No. 177, page 375-19, Mar. 19, 1980, or as updated/republished.

FOR OIGCP CLAIMS: Department of Labor, Privacy Act of 1974, "Registration of Notice of Systems of Records," Federal Register Vol. 53 No. 40, Wrd Feb 28, 1989; See ESA-4, ESA-6, ESB-12, CSM-13, ESA-9C, or as updated and retitle by d.

automated list of services applies normally or is authorised by law.

entitlement "as if it statutorily administered." Report Agencies under TRICARE/REICH/AMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Inspector General, service collection regions; and consumer reporting agencies in connection with recompensation claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private health entities, and educational providers of care, or entities relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability coordination of benefit, and civil and criminal litigation related to the operation of TRICARE.

DISCLAIMER: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no "penalties" under these programs for failing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FICA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 112RB of the Social Security Act and 31 U.S.C. 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, at payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, co-insurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction

NOTICE: This is to certify that the foregoing information is true, accurate, and complete. I understand that payment and satisfaction of my claim will be from Federal and State funds, and that any false statement, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Physiatry Re-evaluation: May 2, 2017

Chief Complaint(s): Tailbone pain, left leg pain

Dear Dr. Guzinski:

I had the pleasure of seeing Danielle in our Park Club Lane office for a physiatry re-evaluation on May 2, 2017.

HISTORY OF PRESENT ILLNESS

This is a 36-year-old female presenting today for an evaluation. She is status post a caudal epidural steroid injection with Dr. Siddiqui on 3/30/17. This worked very well at controlling her right leg pain, but unfortunately it has not helped her left side pain which seems to be somewhat worse. She reports pain that radiates down the left buttock and thigh in the posterolateral aspect of the left calf into the fifth digit of the left foot. She is utilizing Naproxen but finding this ineffective. She is also having some issues with pain at the injection site. She reports no fevers or chills associated with this. She continues to follow with her chiropractic and Dent Neurologic Institute for chronic headaches. She reports her pain today at a 4/10 on the visual analog scale. Coughing, standing, lifting, and walking aggravate her pain. Lying down helps alleviate it. She notes unsteadiness when she walks at times due to her left leg discomfort.

Review of systems is notable for headache and joint pain, otherwise noncontributory.

PHYSICAL EXAMINATION

BP Sitting: 127/86 **Pulse:** 76 **Resp:** 16 **Ht:** 63" **Wt:** 200lb **BMI:** 35.4

General: 36-year-old female in no acute distress. She is awake, alert and appropriate. Speech is fluent and coherent.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are pink and moist.

Cardiovascular: Normal S1, S2.

Abdomen: Soft, non-distended, nontender.

Neuromusculoskeletal: The patient demonstrates well preserved strength. Sensory examination is intact to light touch. She demonstrates symmetric muscle bulk and tone without spasticity or rigidity. Straight leg raise sign is positive on the left, negative on the right. Patrick's testing is negative bilaterally. She has tenderness to the left buttock and left lumbar paraspinal muscles. She ambulates with a mildly antalgic gait. The caudal injection site was inspected today. There is no swelling or erythema. The coccyx is tender.

Psychiatric: Judgement and cognition appear to be within normal limits.

ASSESSMENT

M54.16 - Radiculopathy, lumbar region, M51.26 - Other intervertebral disc displacement, lumbar region, MS53.3 - Sacrococcygeal disorders, not elsewhere classified

IMPRESSION/RECOMMENDATIONS

This is a 36-year-old female with dominant complaints today of low back and left leg pain in the setting of multi-level lumbar degenerative disc disease and facet arthropathy with lumbar disc bulges/hemiations at L4-L5 and L5-S1. She also has clinical evidence of coccygodynia today. At this time, we will initiate a Methylprednisolone Dosepak. She will hold Naprosyn while utilizing this. I also will forward the patient for a left L5-S1 transforaminal epidural steroid injection. She will continue with her other medical providers who are treating her for symptoms causally related to her motor vehicle accident on 10/31/15. The patient expressed understanding and agreement to today's plan of care.

The material risks, benefits, side effects and alternatives with the above named procedure were discussed with the patient today. These include, but are not limited to, injection site pain, bleeding, bruising, infections, damage to targeted or non-targeted tissue, increased pain, nerve injury or other reaction. In rare cases potentially serious reactions such as a CVA, arrhythmia, or death may occur. The patient was given procedure instructions and educational materials for this specific purpose at the time of the visit.

The patient was advised today regarding treatment with the above named medication(s). The risks, benefits, common side effects and alternative treatments were discussed with the patient. The patient verbalized understanding and was told to call with any concerns.

Thank you for allowing me to participate in Danielle's care. If you have any questions or concerns regarding this patient, please do not hesitate to contact me at your earliest convenience.

Sincerely,

Electronically signed by Sarah O'mara, PA-C on 05/05/2017 at 1:17 pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she had 2 headaches since last visit. *Recent medical treatment for this condition:* Massage therapy; Neurological evaluation with a referral for vestibular therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving. *since last visit:* Pain: achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activites of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain remains the same. She stated that she still has been experiencing pain radiating down her left lateral thigh. Patient saw Dr. Siddique and he recommended another injection. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, shooting, numb; level: 4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders.

Encounter dated 05/08/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 05/26/2017

Strength: left deltoid: 4/5; all other upper extremity musculature (C5-T1) were graded 5/5. **Hypertonicity & Tenderness:** Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness:** Thoracic paraspinal musculature Bilateral Mild to Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. **Gait pattern:** normal. **Tenderness & Hypertonicity:** lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. **Tenderness on palpation:** left SI: mild to moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise: Positive right at 60 degrees; Bechterew: Negative. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: unchanged. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. Cervical MRI was performed at DENT on March 27, 2017. According to the radiologist, only some subtle anterior spondylitic spurring is seen at C4-C5 and C5-C6. There is evidence of dextroscoliosis of the upper cervical spine

MRI of the brain was performed at DENT on March 27, 2017. According to the radiologist, it was a normal MRI scan of the brain without contrast.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** improving, VAs score improved from a 5 to 3 out of 10.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation)

Encounter dated 05/08/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 05/26/2017

with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 3 weeks; Re-examination for 3 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to May 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS. A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and verifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes my entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(d). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participating cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE local intermediary; if this is less than the charge submitted, TRICARE is not a health insurance program but makes payment for health benefits provided through certain clinics such as the Uniformed Services. Information on the patient's spouse should be provided in those items captioned in "Insured" i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding system.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA, AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have knowledge myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment, including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 7) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by their employee, 2) they must be an integral, although incidental part of a covered physician's services, 3) they must be of such severity furnished in physician's office, and 4) the services of non-physicians must be indicated on the physician's bill.

For TRICARE claims, I further certify that 1) for a civilian employee(s) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a civilian employee of the United States Government, either civilian or military (refer to 5 USC 5336). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part II Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 442.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to law and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to use your information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information in section 205(a), 1028, 1027, and 1071 of the Social Security Act as amended, 42 CFR 411.24(n) and 424.5(a) (8), and 44 USC 3101.41 CTR 101 of reg and 10 USC 1079 and 1080, 8 USC 8101 et seq and 30 USC 901 et seq 30 USC 912, E.O. 13397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of service, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties to pay to the Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 03-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed Sept. 12, 1990, as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, "Publication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See E&A-5, E&A-8, E&A-10, E&A-30, as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S). To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the circumstance(s) applies to the individual authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with repayment claims; and to Congressional Offices in response to inquiries made at the request of individuals whom we record patients. Appropriate disclosure may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to enrollment, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

PENALTIES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be disciplinary or obstructive.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1126B of the Social Security Act and 31 USC 3001-3012 provide penalties for withholding this information.

You should be aware that P.L. 100-693, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICARE PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such accounts as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of enhanced deductible, co-payment or similar cost sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false claims, claims for, or document, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Information Report Act of 1974, a provider is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 1905-0119. The time required to complete the information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimates or suggestions for improvement, please write to CMS, 4500 Security Boulevard, Rm. 2040, P.R. Reports Clearance Officer, Mail Stop C4-00-06, Baltimore, Maryland 21244-0006. The address is for comments only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note

Date: 06/02/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- NF- Requires Opinion
- headaches, trigger points. Patient presents for treatment of []

History of Present Illness

General:

The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. The patient reports good results with her trigger point injections.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 inti units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Hospitalization/Major Diagnostic Procedure

See surgical history

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 118/72, HR 76, RR 16, Ht 63, Wt 229, BMI 40.56, BSA 2.15.

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Infusion	

1. Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site.

Procedures**Injections:**

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 8 cc was injected with a 25-gauge needle without complication into 8 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living. Patient counseled on the importance of healthy lifestyle. 06/02/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 06/02/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 06/02/2017.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Thursday May 25, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 05/25/2017 at 9:47am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient stated that her left neck and shoulder area has been sore. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches have been daily for the past week. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain has been better. Patient going for an injection with Dr. Siddique on June 1, 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving. *since last visit.* *Pain:* achy, dull, sharp, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: Left neck extensors were weak and graded 4/5. *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 70/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Strength:* left deltoid: 4/5; all other upper extremity musculature

Encounter dated 05/25/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 06/08/2017

(C5-T1) were graded 5/5. **Hypertonicity & Tenderness** Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Mild to Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with no pain. **Gait pattern:** normal. **Tenderness & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. **Tenderness on palpation:** left SI: mild to moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Positive left at 60 degrees for lower back pain; Well leg raise: Positive right at 60 degrees; Bechterew: Negative. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: unchanged. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. Cervical MRI was performed at DENT on March 27, 2017. According to the radiologist, only some subtle anterior spondylitic spurring is seen at C4-C5 and C5-C6. There is evidence of dextroscoliosis of the upper cervical spine

MRI of the brain was performed at DENT on March 27, 2017. According to the radiologist, it was a normal MRI scan of the brain without contrast.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: improving, VAS score improved from a 5 to 3 to out of 10. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac

Encounter dated 05/25/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 06/08/2017

with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.
Treatment schedule: 1x/week for 1 week; Re-examination for 1 week. **Subluxations found on assessment and adjusted:** C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (diversified side posture). **Physical Modalities:** bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy.
Patient given: home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. **Home care:** ice: neck / lower back prn for 20 minutes. **Additional instructions:** Advised patient to monitor for any changes in their symptoms. **Short term goals:** decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain. **Long term goals:** decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. **Disability status:** Temporary partial starting on November 12, 2015 to June 17, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 05/25/2017 at 9:47am

Abbreviations:

ADL: activities of daily living
MVA: motor vehicle accident
ROM: range of motion
VAS: Visual Analog Scale
WNL: within normal limits

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal and/or civil offense under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature accepts that payment is made and authorizes release of any information necessary to process the claim and settle the information provided in clause 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature entitles any entity to release to Medicare, either the individual or the program, any information which is necessary to pay for benefits under the Medicare program. In the case of a TRICARE claim, the patient's signature authorizes release of the items set forth in clause 1 through 8, except as otherwise prohibited by law. TRICARE payments are subject to the type of determination of the Medicare carrier or TRICARE local contractor and will change from the provider's perspective if and as the carrier, contractor and non-covered services. Contractors and the deductible are based upon the charge determinants of the Medicare carrier or TRICARE local contractor, not the actual amount paid. If any item is less than the charge submitted, TRICARE is not a health insurance program but makes payment for health benefits provided under the contract of coverage. Under clause 8, information in the provider's opinion should be provided in the space indicated in clauses 1 through 12, 4, 5, 7, 8 and 11.

BLACK LUNG AND FECA CLAIMS

For health claims in respect of the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding resuscitation procedure and diagnosis coding system.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In answer to your claim for payment from these funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have furnished myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have a private or will provide sufficient information to allow the government to make an audit of my records and payment of claims, either submitted by me on my behalf by my designated billing company, complete with all appropriate documentation for audit purposes; 4) I am entitled to receive payment for services or services furnished to me or to whom furnished incident to my professional services by my employer under my direct supervision, except as those expressly permitted by Medicare or TRICARE; 5) I, as each service rendered incident to my professional service, the item may (legal name and NPI 100-102-0000) or the primary care physician, if applicable, is referred to in paragraph 1 as "physician" or "practitioner"; 6) services rendered incident to a physician's consultation; I survived; 7) I file my claim under the laws of my state or the jurisdiction in which I practice; 8) they must be funds constantly kept at a physician's office; and 9) the services of non-physicians must be included on the physician's bill.

For TRICARE claims, I further certify that I (or any employee) no longer serve as member of the Uniformed Services or a civilian employee of the U.S. State Department or a U.S. Government or a civilian employee of the United States Government, either civilian or military (refer to 3 USC 833e). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No more than one signature may be placed upon this form as required by existing law and regulations (42 CFR 442.32).

NOTICE: Any one who intentionally or falsely makes material information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTE: TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OMB to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is contained in 26 USC 1680, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.21(a) and 484.5(b)(6), and 14 USC 3101-3103, 40 CFR 101-102, and 1100-104 and 100-105, 9 CFR 8.01(c)(6) and 38 USC 613, E.O. 13377.

The information we obtain to compile our claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to make that proper payment is made.

This information may also be given to other providers of services, centers, intermediary sites, medical service benefit, health plans, and other organizations or Federal agencies, for the administration of Federal programs that require other third parties to pay primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: So, the notice modifying system No. 09-70-0501, titled, "Comer Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, pg. 47349, Wed. Sep. 12, 1995, is as updated and republished.

FOR ONCP CL-113E: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990. See PS-1, CSA-6, CSA-12, CSA-13, CSA-14, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and confirmation that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation, as well as their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in legal actions, to the Internal Revenue Service, private collectors, ice agencies, and consumer reporting agencies in connection with recovery of claims, and to Congressional Offices in response to inquiries made in the request of or to whom a relevant program. Appropriate disclosures may be made to other Federal, state, local, foreign governmental agencies, private business entities, and individual providers of care on matters relating to enrollment, claim adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and other relevant legislation relating to the operation of TRICARE.

DISCLOSURES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for failing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3601-3812 provide penalties for failure to inform us.

You should be aware that P.L. 100-505, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to do my best to make it necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payment claim in accordance therewith such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to do my best, as payment is full, the amount paid by this Medicaid program for these claims submitted for payment under this program, with the exception of authorized deductible, consultation, or payments or similar consulting charges.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claim, false report, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Privacy Regulation, if OMB approves, we are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control numbers for the Medicare program are 1400-102 and 1400-115. The time interval to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or the "OMB number" for completing this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-05, Baltimore, Maryland 21204-1859. This address is for comments and suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS PROVIDED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

167-02046-AZD (TRICARE PAYMENT) A patient's signature request that payment be made and authorizes release of any information needed to process the claim and certifies that the information provided in Block 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary for the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in items 10-13 unless depicted in Item 1, i.e., items 4, 6, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

It is my/her desire to file this claim paid by the Government as payment in full. See Black Lung and FECA insurance referring required procedure and diagnosis coding system.

STATE OF PLACE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an initial and complete payment claim; 4) this claim, whether submitted by me or on my behalf, by my direct or indirect billing company, complies with all applicable Medicare and/or Federal laws, regulations, and program instructions for payment rendering but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished to my professional service by my employee under my direct supervision, except as otherwise commonly paid for by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual or facility which rendered the specific service is reported to be correct; 7) medical records for services provided by a physician's professional services, 8) they must be referred under the physician's direct supervision by her/his employer, 9) they must be an integral, although incidental part of a certified physician service, 10) they must be referred under the physician's direct supervision by her/his employer, 11) they must be an integral, although incidental part of a certified physician service, 12) they must be of kinds commonly furnished at physician's offices, and 13) the services on this form, if any, must be indicated on the physician's bills.

For TRICARE claims, I further certify that (i) for any employee who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 8536) For Black Lung claims, I further certify that the service(s) performed were for a Black Lung entitled disease.

No Part B Medicare payments may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one-time arrangements or follow-on payments to receive payment from Federal funds requested by this form may upon conviction be subject to fine and incarceration under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)
This is maintained by CMS, TRICARE and OMB to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(c), 46 CFR, 1872 and 18% of the Social Security Act, as amended, 42 CFR 411.2(a) and 49 CFR 5(b) (8) and 44 USC 3101-11 CFR 101 et seq and 10 USC 107 and 108, 6 USC 8101 et seq, and 31 USC 901 et seq 31 USC 613, E.O. 8387.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered or free programs and to ensure that proper payment is made.

This information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties to pay primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system no. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, as updated and revised above.

FOR OMB CLU/ISS: Department of Labor, Privacy Act of 1974, "Reproduction of Notice of Systems of Records," Federal Register Vol. 53 No. 40, Wed Feb. 28, 1988. See CSA-6, EBA-6, CSA-12, EBA-13, EBA-9, as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies rendered are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation, or to their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collective agencies, and consumer reporting agencies in connection with recipient claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosure may be made to other Federal, state, local, foreign government agencies, private benefit entities, and individual providers of care, on matters relating to enrollment, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third party liability, continuation of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary from me. Failure to provide information will result in delay in payment or may result in denial of claim. With the exception of the information discussed below, there are no penalties resulting from failure to furnish the type of information. However, failure to furnish information regarding the medical condition, route of or amount charged would prevent payment of claim, reduce those proceeds. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under this PA may result in disbarment.

If I stipulate that you will, if you know that another party is responsible for paying for your treatment, Section 1128B of the Social Security Act and 31 USC 9001-3812 prohibit me from furnishing this information.

You should be aware that P.L. 104-188, the "Computer Matching and Privacy Protection Act of 1996" permits the government to verify information by way of computer matching.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to render fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding my payment of claims for providing such services to the State Agency or Dept. of Health and Human Services as may be requested.

I further agree to accept payment in full the amount paid by the Medicaid program for those claims submitted for payment under this provision, with the exception of authorized deductibles, copayments or similar cost sharing charges.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTING: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, false merits, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no person is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0948-0115. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, gather data, respond, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Baltimore, Maryland 21244-1850. The address is for comments and suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note

Date: 06/02/2017

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 36 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- NF- Requires Opinion
- headaches, trigger points Patient presents for treatment of []

History of Present Illness

General:

The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. The patient reports good results with her trigger point injections.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 intl units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

- T & A
- D&C
- Endoscopy
- Colonoscopy

Family History

Father alive, Stroke
 Mother alive, Asthma
 Siblings: alive
 1 brother(s) - healthy

Social HistoryTobacco Use:

Smoking Patient is a non-smoker.

Fall History:

Have you fallen No . Do you feel unsteady when. No .

Alcohol use:

Alcohol Consumption Patient does not drink alcohol.

Illicit Drugs:

Using illicit drugs. Denies.

Working:

Employed Stay at home mom.

Driving:

Does Patient Drive Yes.

Exercise:

Daily Yes, Walks

Allergies

- Keflex
- codeine
- penicillin
- Biaxin
- Cipro
- Soma

Hospitalization/Major Diagnostic Procedure

See surgical history

Review of Systems

Neck pain and headaches No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 118/72, HR 76, RR 16, HT 63, WL 229, BMI 40.56, BSA 2.15

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

EMG	ZMS
ImPACT	PNG
Injuries	

1 Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses
Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site

Procedures Injections

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 8 cc was injected with a 26-gauge needle without complication into 8 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 06/02/2017

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 06/02/2017

Exercise: Patient counseled on importance of moderate physical activity daily. 06/02/2017.

Follow Up

4 Weeks

Attn: Claims Dept

The attached claims have been faxed to Geico. Recently, there has been an issue with the clarity of the claims or they have not been scanned after they have been faxed. This is to verify that they were submitted both via fax and mail.

I hope this will help in getting the claims processed without any delay.

Sincerely,

Kristen R.
Billing

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Monday June 12, 2017 Provider: Peter Guzinski DC RE-EXAM

Electronically signed by Peter Guzinski DC on 06/14/2017 at 1:24pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Accident Description: *Date of Accident:* October 31, 2015. *Time of Accident:* 4:55 PM. *Narrative Description of Accident:* Patient stated that she was stopped in traffic, while waiting for a truck to make a left hand turn into a driveway, when she was rear impacted. She stated that accident occurred while she was traveling South on Starin in the City of Buffalo, New York. Mrs Harwell, stated that this was a chain reaction accident. The vehicle that was behind her was also stopped and was pushed into her vehicle by an automobile that rear impacted them. *Patient Seatbelted?* Yes. *Position in vehicle driver.* *Patient Position at Impact:* looking straight ahead. *Impact Point of Patient's Car:* rear. *Brakes On At Time of Impact?* Yes. *Airbags Deployed?* No. *Did The Patient's Seat Break?* No. *Impact With Car Interior?* seatbelt left chest; headrest back head. *Patient's Vehicle Type:* Honda Odyssey 2007. *Type of Other Vehicle:* Honda CRV 2015. *Road Conditions At Time of Accident:* dry. *Was There Loss of Consciousness?* no. *What Symptoms Were Immediately Present?* Patient stated that she was experiencing head, neck, back and left shoulder and arm pain.

Cervical: Patient presented today with the continued chief complaint of neck pain. Due to the pain, she is unable to lift heavy weights, she has moderate headaches which come infrequently, she can do most of her usual work, but no more and her sleep has been moderately disturbed (1-2 hrs. sleepless). *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving since last re-examination on April 7, 2017. *Pain:* achy, dull, sharp, tingling, shooting; level: 4/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 2-3 x a week. She states that the duration varies, but they no longer last all day. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. Patient seeing Dr. McVige on Thursday. *Cervical Disability Index:* 36%. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving since last re-examination on April 7, 2017. *Pain:* achy, dull, sharp, shooting; level: 4/10. *Pain is frequent.*

**Encounter dated 06/12/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 06/23/2017**

Exacerbates symptoms: movement; bending; lifting; activities of daily living; reaching; activities of daily living.
Alleviates symptoms: nothing. *Numbness:* none. *Weakness:* none. *Oswestry score:* 36%.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain continues to slowly improve. Due to the pain, she is unable to lift heavy weights, she is unable to sit greater than 30 minutes, she is unable to stand greater than 60 minutes and she is unable to travel on journeys greater than 60 minutes. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last re-examination on April 7, 2017. *Pain:* achy, dull, sharp, shooting, tingling; level: 4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *OSWESTRY Disability Index:* 36%. *The Keele STaRt Back Screening Tool:* Low risk. *Recent medical treatment for this condition:* Pain management evaluation with injections. *Changes in past medical history:* None.

Activity of Daily Living Form Bathing/Showering: no impairment; Bending forward/backward: moderate impairment; Brushing teeth: no impairment; Buttoning shirt: no impairment; Driving: mild impairment; Drying Hair: mild impairment; Household chores: moderate impairment; Laundry: severe impairment; Lifting less than 10 lbs: mild impairment; Lifting more than 10 lbs: severe impairment; Kneeling: mild impairment; Making Meals: moderate impairment; Prolonged Sitting more than 30 minutes: moderate impairment; Putting pants on: mild impairment; Putting shoes/socks on: mild impairment; Reaching above the shoulders: no impairment; Restful night's sleep: no impairment; Seated to standing position: mild impairment; Sexual activity: no impairment; Standing: mild impairment; Squatting: mild impairment; Taking out the trash: not performed; Tying shoes: mild impairment; Using lavatory: mild impairment; Walking: mild impairment.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with no pain; left rotation: 60/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Strength:* all upper extremity musculature (C5-T1) were WNL and graded 5/5. *Sensation:* all upper extremity sensory exams (C5-T1) were WNL to Pin prick. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Reflexes:* bilateral upper extremity reflexes (C5, C6, C7) 2+. *Orthopedic tests:* left lateral compression: Negative; right lateral compression: Negative; maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by motion and static palpation.*

Encounter dated 06/12/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 06/23/2017

Lumbar/Sacral/Pelvis: Range of motion: flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. Heel to toe walking: WNL. Gait pattern: normal. Strength: all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. Sensation: all lower extremity sensory exams (L1-S1) were WNL to Pin prick. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. Tenderness on palpation: left SI: mild to moderate. Trigger points: left gluteus maximus. Reflexes: bilateral lower extremity reflexes (L4 and S1) 2+. Orthopedic tests: Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative; Minor's sign: Negative; Slump Test: Negative bilateral; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for lower back pain on a cough or sneeze. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-examination on April 7, 2017 her neck condition has slightly regressed. Her Neck Disability Index score increased from 28% to 36%. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL and decrease the frequency and intensity of headaches.

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Prognosis: Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: Mrs. Harwell's lower back condition has slightly regressed since her last re-examination on April 7, 2017. Her Oswestry Disability Index score increased from 28% to 36% Further treatment is medically necessary to help improve her active lumbar ROM and improve her ability to sit, stand, bend, perform household chores and lift with less pain. **Post-treatment analysis:** patient tolerated treatment without incident.

Set backs: Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Encounter dated 06/12/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 06/23/2017

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.
Treatment schedule: 1x/week for 4 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 8 weeks.

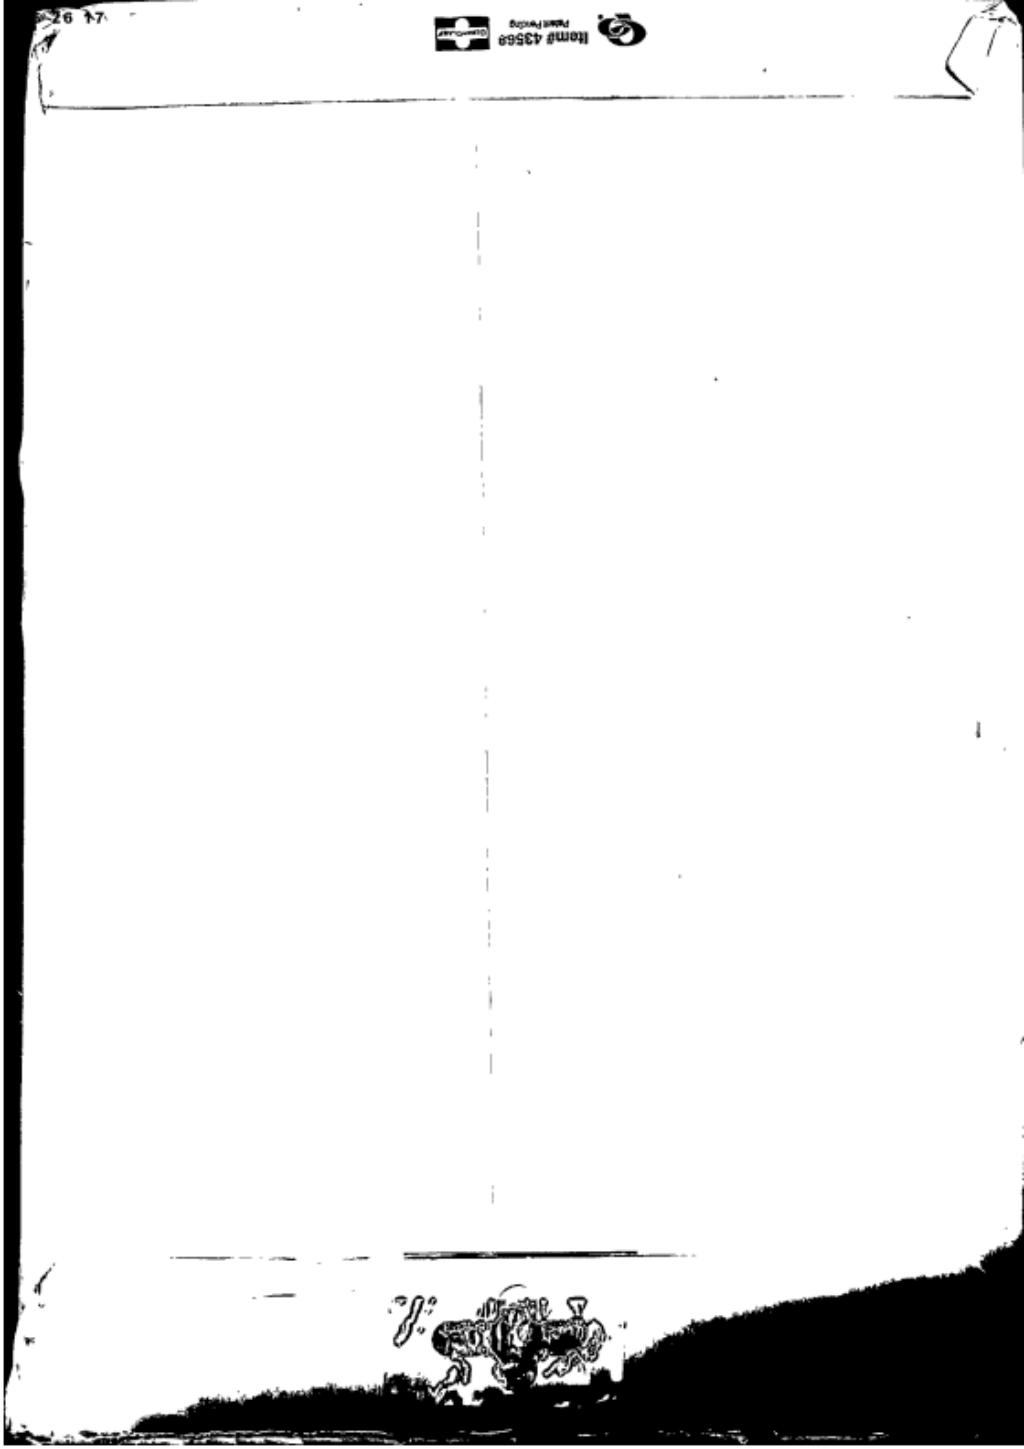

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapulae trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and/or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to July 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 06/14/2017 at 1:24pm

Re-Evaluation
Date: 06/15/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- Headaches/ Pain

History of Present Illness

General:

Dear Dr. Panzarella:
We had the pleasure of seeing Danielle today in neurologic reevaluation regarding motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a wonderful 36-year-old young woman who had an unfortunate motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at the urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale. The headaches were worse than her baseline. She reported associated anosmia, osmophobia, spots before her eyes, fatigue, difficulty concentrating, neck stiffness, weakness in the arms and face.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16. MRI L spine and C-spine 1/5/16 showed mild multilevel degenerative changes, but there are disk extrusions seen at C4-C5 and C5-C6. She did have an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 showed a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8. The remainder of the CBC was within normal limits. CMP, TSH, Vitamin D and Vitamin B12 were within normal limits.

Danielle has tried ibuprofen, Tylenol, Motrin, chiropractic care, massage therapy and physical therapy. After initial evaluation, she was started on magnesium oxide, Naprosyn and Rizatriptan. Vestibular therapy and physical therapy have both proven helpful in symptom management. Massage therapy is also very helpful with decreasing her cervical myofascial spasm. Regular trigger point injections have proven to be very beneficial.

Danielle is struggling with episodes of dizziness and vertigo. These can be so severe she will have to pull over when she is driving. They seem to be triggered by certain neck movements. She will experience a sharp pain starting from the base of her head that will radiate up and over to the top of her head. These do tend to occur with a headache. Lamictal was started and is currently at 100mg, but there is no notable relief. Headaches are almost daily and tend to be located along the right occipital and temporal regions and will radiate into her right eye.

The patient did attend vestibular therapy and physical therapy until discharged from both. She

continues to do complete exercises at home. Unfortunately, the patient feels she has plateaued.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal.

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Review of Systems

Headaches, photophobia, sonophobia, osmophobia, fatigue, cervicalgia, anxiety, dizziness. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 120/78, HR 74, RR 16, Ht 63, Wt 227.2, BMI 40.24, BSA 2.14.

Examination

General Examination:

General Appearance: Well-nourished, well-developed, in no apparent distress, participated with the exam. Well groomed. Neck: Supple. Range of motion, restricted. Left shoulder greatly elevated over right. C1-2 is shifted to the right. Severely spasmed paraspinal muscles and trapezi bilaterally. Cardiovascular: S1, S2, no murmurs, regular rate. Extremities: Full range of motion of extremities x4. No edema.

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. Speech: Speech content and production was normal. Memory: Memory for remote and recent events was intact. Fund of Knowledge: Appropriate for events and past history. Cognition was intact. Motor: 5/5 upper and lower extremities bilaterally. Tone: Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. Reflexes: DTRs were +2 globally. Plantar responses were downgoing bilaterally. Coordination: Test of coordination and fine motor skills were within normal limits. Gait and Station: Within normal limits. Tandem stance is unsteady. Romberg unsteady. Sensory: Sensation to touch and cold was intact in all 4 extremities bilaterally.

Cranial Nerves:

Cranial Nerve II: Visual fields full. Disc margins clear bilaterally. No vessel abnormalities. Cranial Nerves III, IV, VI: Extraocular movements intact. PERRLA. Convergence insufficiency right eye. Cranial Nerve V: Facial sensation and muscles of mastication were normal bilaterally. Cranial Nerve VII: Face was symmetric and strength was equal bilaterally. Cranial Nerve VIII: Hearing was intact to finger rub bilaterally. Cranial Nerves IX, X: Swallowing and palate elevation was within normal limits. Cranial Nerve XI: Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. Cranial Nerve XII: Tongue was midline.

Assessments

1. Vestibular dysfunction - H83.2X9 (Primary)
2. Concussion, without loss of consciousness, sequela - S06.0X0S
3. Posttraumatic headache - G44.309
4. Cervical radicular pain - M54.12
5. Left-sided low back pain with left-sided sciatica, unspecified chronicity - M54.42

Danielle is a 38-year-old female with a history of a car accident in October 2015. Headaches continue to be almost daily and located mostly along the right side of her head. The patient was discharged from both vestibular therapy and physical therapy due to improvement, however the patient feels she is almost regressing in regards to her myofascial spasm and dizziness. Since her accident, the patient continues to struggle with headaches, neck pain, muscle tension, dizziness, vertiginous events, decreased attention and concentration and overall feels cognitively impaired. When asked what percent she feels improved she was unable to answer due to persistent and almost worsening symptoms at today's appointment.

1. Wean off Lamictal. Decrease one tablet a day until completely off.
2. Nortriptyline to help with sleep and muscle relaxation. The patient is severely spasmed on exam. If symptoms are not improved or persist with nortriptyline, Topamax will be started. We will see how the patient does with nortriptyline and Topamax. Finally, if the patient continues to struggle Botox will be considered.
3. Compounded pain cream to apply BID. This should also help with her cervical myofascial spasm. Discussed increased efficacy with regular, daily use.
4. Restart vestibular and physical therapy due to worsening dizziness, imbalance and cervical myofascial spasm.

The patient should avoid headache triggers, exercise regularly and avoid skipping meals.

Thank you for allowing me to care for this patient. Any questions or concerns, please feel free to contact me at any point in time. This dictation was created by a medical scribe. Errors may be present. Efforts were made to ensure accuracy.

Treatment

1. Vestibular dysfunction

PHYSICAL THERAPY Vestibular nos1571218

2. Posttraumatic headache

Continue magnesium oxide tablet, 250 mg, 1-2 tab(s), orally, once a day

Continue Naprosyn tablet, 500 mg, 1 tab(s), orally, pm headache, up to BID

Continue Melatonin tablet, 3 mg, 1 tab(s), orally, once (at bedtime)

Continue Vitamin D3 capsule, 5000 intl units, 1 cap(s), orally, once a day

Decrease Lamictal tablet, 25 mg, 2 tab(s), orally, BID

Continue rizatriptan tablet, 10 mg, 1 tab(s), orally, pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3

Start nortriptyline capsule, 10 mg, 1 cap(s), orally, QHS, 30 day(s), 30, Refills 5

Notes: compounded pain cream.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle. 06/15/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 06/15/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 06/15/2017.

**INSURANCE CLAIM
FORMS ENCLOSED**

NOTE: OPEN THIS ENVELOPE FROM THE BOTTOM.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entry to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown in Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary upon the full charge and the patient is responsible only for one deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned "Insured", i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government in payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished to me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identify (legal name and NPI), license #, or SSN of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee; 2) they must be an integral, although incidental part of a covered physician service; 3) they must be of kinds commonly furnished in physician's office; and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black-Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who manipulates or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(b) (5), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1086; 5 USC 801 et seq, and 30 USC 801 et seq; 35 USC 613, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying System No. 09-70-0501, Med, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37548, Wed Sept 12, 1990, as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28, 1990, See BSA-5, ESA-6, ESA-12, ESA-13, ESA-30, as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompensation claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1126B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C-26-05, Baltimore, Maryland 21244-1630. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Re-Evaluation
Date: 06/15/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 Age: 36 Y Sex: Female
PCP: James Panzarella, DO

Reason for Appointment

- Headaches/ Pain

History of Present Illness

General:

Dear Dr. Panzarella:

We had the pleasure of seeing Danielle today in neurologic reevaluation regarding motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a wonderful 36-year-old young woman who had an unfortunate motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at the urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale. The headaches were worse than her baseline. She reported associated sonophobia, osmophobia, spots before her eyes, fatigue, difficulty concentrating, neck stiffness, weakness in the arms and face.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16 MRI L spine and C-spine 1/5/16 showed mild multilevel degenerative changes, but there are disk extrusions seen at C4-C5 and C5-C6. She did have an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 showed a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8. The remainder of the CBC was within normal limits. CMP, TSH, Vitamin D and Vitamin B12 were within normal limits.

Danielle has tried ibuprofen, Tylenol, Motrin, chiropractic care, massage therapy and physical therapy. After initial evaluation, she was started on magnesium oxide, Naprosyn and RizatRIPTAN. Vestibular therapy and physical therapy have both proven helpful in symptom management. Massage therapy is also very helpful with decreasing her cervical myofascial spasm. Regular trigger point injections have proven to be very beneficial.

Danielle is struggling with episodes of dizziness and vertigo. These can be so severe the she will have to pull over when she is driving. They seem to be triggered by certain neck movements. She will experience a sharp pain starting from the base of her head that will radiate up and over to the top of her head. These do tend to occur with a headache. Lamictal was started and is currently at 100mg, but there is no notable relief. Headaches are almost daily and tend to be located along the right occipital and temporal regions and will radiate into her right eye.

The patient did attend vestibular therapy and physical therapy until discharged from both. She

continues to do complete exercises at home. Unfortunately, the patient feels she has plateaued.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal

Current Medications

- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 IU units capsule 1 cap(s) orally once a day
- Taking Lamictal 25 mg tablet 1 tab(s) orally 1 tab once daily x 2 weeks, then increase to 1 tab BID x 2 weeks, then increase to 2 tabs BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

- T & A
- D&C
- Endoscopy
- Colonoscopy

Family History

Father: alive, Stroke

Mother: alive, Asthma

Siblings: alive

1 brother(s) - healthy.

Social History

Tobacco Use:

Smoking Patient is a: non smoker .

Fall History:

Have you fallen No . Do you feel unsteady when No .

Alcohol use:

Alcohol Consumption: Patient does not drink alcohol.

Illicit Drugs:

Using illicit drugs: Denies

Resides with:

Spouse: Husband. Children: Yes, x3 Self: Yes

Working:

Employed: Stay at home mom

Marital Status:

Married: Yes.

Driving:

Does Patient Drive: Yes

Exercise:

Daily. Yes, Walks.

Caffeine:

Review of Systems

Headaches, photophobia, sonophobia, osmophobia, fatigue, cervicalgia, anxiety, dizziness. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 120/78, HR 74, RR 16, Ht 63, Wt 227 2, BMI 40.24, BSA 2.14.

Examination

General Examination:

General Appearance Well-nourished, well-developed, in no apparent distress, participated with the exam. Well groomed. Neck: Supple Range of motion, restricted. Left shoulder greatly elevated over right. C1-2 is shifted to the right. Severely spasmed paraspinal muscles and trapezi bilaterally. Cardiovascular: S1, S2, no murmurs, regular rate. Extremities Full range of motion of extremities x4. No edema.

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. Speech: Speech content and production was normal. Memory: Memory for remote and recent events was intact. Fund of Knowledge: Appropriate for events and past history. Cognition was intact. Motor: 5/5 upper and lower extremities bilaterally. Tone: Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. Reflexes: DTRs were +2 globally. Plantar responses were downgoing bilaterally. Coordination: Test of coordination and fine motor skills were within normal limits. Gait and Station: Within normal limits. Tandem stance is unsteady. Romberg unsteady. Sensory: Sensation to touch and cold was intact in all 4 extremities bilaterally.

Cranial Nerves:

Cranial Nerve II: Visual fields full. Disc margins clear bilaterally. No vessel abnormalities. Cranial Nerves III, IV, VI: Extraocular movements intact. PERRLA. Convergence insufficiency right eye. Cranial Nerve V: Facial sensation and muscles of mastication were normal bilaterally. Cranial Nerve VII: Face was symmetrical and strength was equal bilaterally. Cranial Nerve VIII: Hearing was intact to finger rub bilaterally. Cranial Nerves IX, X: Swallowing and palate elevation was within normal limits. Cranial Nerve XI: Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. Cranial Nerve XII: Tongue was midline.

Assessments

1. Vestibular dysfunction - H83.2X9 (Primary)
2. Concussion, without loss of consciousness, sequela - S06.0X0S
3. Posttraumatic headache - G44.309
4. Cervical radicular pain - M54.12
5. Left-sided low back pain with left-sided sciatica, unspecified chronicity - M54.42

Danielle is a 36-year-old female with a history of a car accident in October 2015. Headaches continue to be almost daily and located mostly along the right side of her head. The patient was discharged from both vestibular therapy and physical therapy due to improvement; however, the patient feels she is almost regressing in regards to her myofascial spasm and dizziness. Since her accident, the patient continues to struggle with headaches, neck pain, muscle tension, dizziness, vertiginous events, decreased attention and concentration and overall feels cognitively impaired. When asked what percent she feels improved she was unable to answer due to persistent and almost worsening symptoms at today's appointment.

1. Wean off Lamictal Decrease one tablet a day until completely off.
 2. Nortriptyline to help with sleep and muscle relaxation. The patient is severely spasmed on exam. If symptoms are not improved or persist with nortriptyline, Topamax will be started. We will see how the patient does with nortriptyline and Topamax. Finally, if the patient continues to struggle Botox will be considered.
 3. Compounded pain cream to apply BID. This should also help with her cervical myofascial spasm
- Discussed increased efficacy with regular, daily use
4. Restart vestibular and physical therapy due to worsening dizziness, imbalance and cervical myofascial spasm

The patient should avoid headache triggers, exercise regularly and avoid skipping meals

Thank you for allowing me to care for this patient. Any questions or concerns, please feel free to contact me at any point in time. This dictation was created by a medical scribe. Errors may be present. Efforts were made to ensure accuracy.

Treatment

1. Vestibular dysfunction

PHYSICAL THERAPY Vestibular nos1571218

2. Posttraumatic headache

Continue magnesium oxide tablet, 250 mg, 1-2 tab(s), orally, once a day

Continue Naprosyn tablet, 500 mg, 1 tab(s), orally, pm headache, up to BID

Continue Melatonin tablet, 3 mg, 1 tab(s), orally, once (at bedtime)

Continue Vitamin D3 capsule, 5000 int'l units, 1 cap(s), orally, once a day

Decrease Lamictal tablet, 25 mg, 2 tab(s), orally, BID

Continue rizatriptan tablet, 10 mg, 1 tab(s), orally, pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3

Start nortriptyline capsule, 10 mg, 1 cap(s), orally, QHS, 30 day(s), 30, Refills 5

Notes: compounded pain cream

Preventive Medicine

COUNSELING Healthy Living Patient counseled on the importance of healthy lifestyle 06/15/2017.

Diet Patient counseled on importance of lowering sugar intake, sodium and fats 06/15/2017.

Exercise Patient counseled on importance of moderate physical activity daily 06/15/2017

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal offense punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

ALL MEDICARE AND TRICARE PAYMENTS. A patient's signature authorizes final payment by me and authorizes disclosure of any information necessary to process the claim in I certifies that the information provided in Block 8 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical information and information and I understand the person has employer group health insurance, liability, no-fault, worker's compensation, auto or other insurance which is responsible to pay for the services for him/her. Medicare does not reimburse. See 42 CFR 411.24(a). In case it is complicated, the patient's signature authorizes release of the information to the insurance or agency shown in Medicare, private or TRICARE. In complicated cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the charge determined by the Medicare carrier or TRICARE fiscal intermediary if the physician is responsible only for the deductible, copayments and non-covered services. Copayments and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if the physician is less than the charge submitted. TRICARE is not a health insurance program but makes payment for the MTF benefits provided through outside providers via the Uniform Billing System. Information on the patient's insurance should be provided in those items captioned as "Insured"; i.e., Items 1a, 4, 6, 7, 8 and 11.

51. BLACK LUNG AND PECOA CLAIMS

The new date of service is indicated in a statement paid by the Government as payment in full. See Black Lung and PECOA instructions regarding required procedure for diagnosis and/or system.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, PECOA AND BLACK LUNG)

In returning this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from this Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed ability and payment decision; 4) this claim will be submitted by me or on my behalf by my designated physician or company, complete with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment, including but not limited to the Federal and/or Private state and Physician Self-Referral Law (commonly known as Stark Law); 5) the services for this claim were medically necessary and personally furnished by me or were furnished incident to my professional services by my employees under my direct supervision; 6) except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional services by me, my identity (legal name and NPI license), or NPI of my primary and initial rendering health care provider is reported in the designated column. For services to be considered "incident to" a physician's professional services, 7) they must be rendered under the physician's direct supervision by lesser employees; 8) I may be an employee, although incidental part of a covered physician service; 9) they must be or leads committee supervised in the rendering of care; and 10) the status of non-physician must be included on the physician's bill.

For TRICARE claims, I further certify that 1) any employee(s) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a civilian employee of the United States Government either civilian or military (refer to 3 USC 5336). For Black Lung claims, I further certify that the service performed is not for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 414.32).

NOTICE: Any person who knowingly or falsely certifies information to receive payment from Federal funds requested by this form may incur criminal liability for false statements under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, PECOA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OIGP to ask you for information needed in the administration of the Medicare, TRICARE, PECOA, and Black Lung programs. Authority to collect information is set forth in section 205(g), 1802, 1872, and 1877 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(e)(3), and 44 USC 301-41 CFR 101 et seq and 10 URC 1071 and 1076; 3 USC 6101 et seq., and 30 USC 991 et seq., 99 USC 613; E.O. 9397.

The column "An identifier to complete claims under Medicaid programs is used to identify you and to determine your eligibility. It is also used to identify if the service or supplier you received was provided by these programs and to insure proper payment is made."

The information may be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, to the effective administration of Federal programs that require other third parties to pay primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice, mailing system No. 06-70-0001, titled "Carrier Medicare Claims Record," published in the Federal Register Vol. 55 No. 177, page 37484 on 17 Sep. 1990, 19, 20, 21, or as updated and republished.

FOR DOLCI CLAIMS: Department of Labor, Privacy Act of 1974, "Regulation of Use of Systems of Records," Federal Register Vol. 55 No. 40, W-14-P-36, 1990. See FSA-6, ER-6, ER-12, ER-14, FPA-70, or -14, -17, -18, -19, -20, -21 and -22, as updated and republished.

FOR TRICARE (TRICARE PRINCIPAL PURPOSES): To evaluate eligibility for medical care provided by civilian sources and to issue payment terms establishment of eligibility and claim status.

NOTICE TO TRICARE: Information of mine and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services, and the Dept. of Transportation contractors, the Dept. of Defense, audited in their responsibility under TRICARE/CHAMPVA. To the Dept. of Justice for representation of the Secretary of Defense, in civil actions, to the Postal Service, private collection agents, and consumer reporting agencies in connection with recompence claims, and to Congressional offices in connection with any legislative work at the request of the person to whom the claim pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claim adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, claims of non-payment, and other documents related to the operation of TRICARE.

INTERAGENCY: 2. Voluntary failure or failure to provide information will result in delay in payment or may result in denial of claim. With the one exception outlined below, no provider may deny payment under this program for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under TRICARE could lead to denial of payment.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-912 provide penalties for self-funding of the treatment.

You should be aware that P.L. 95-452, the "Computer Matching and Privacy Protection Act of 1998," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments made for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept all payments in full, the amount paid by the Medicaid program for the services submitted for payment under that program, with the exception of deductibles, coinsurance, co-payment or similar cost-sharing charges.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: There is a penalty for filing a false statement. The foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claim submission, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

An amendment to the Medicare Beneficiary Enrollment Form (M-160) is required to respond to a collection of information unless it displays a valid CMB control number. The valid CMB control number for this Medicare enrollment form is 19-00-1979. You are required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate or if you require further assistance, please write to CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C-28-06, Baltimore, Maryland 21207-2806. This address is for comments only. It is not for general correspondence. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Tuesday June 20, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 06/20/2017 at 12:13pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today stating that "I have been really sore since Sunday." Patient stated that saw Dr. McVige last Thursday for a neurological appointment. Driving and turning her head has been more difficult due to the pain. Some pain down her right arm today as well. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* worse. *since Sunday.* *Pain:* achy, dull, sharp, tingling, shooting; level: 5/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. **Headaches:** Patient stated that she did not have any headaches since last visit. *Recent medical treatment for this condition:* Massage therapy; Neurological evaluation. *Changes in past medical history:* None.

* **Thoracic:** Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* worse. *since last Sunday.* *Pain:* achy, dull, sharp, shooting; level: 5/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain has been more intense. She states that the pain is more in the center of her lower back. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* worse. *since last Sunday.* *Pain:* achy, dull, sharp, shooting, tingling; level: 5/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. **Bowel or bladder incontinence:** No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy; Neurology follow up. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left

**Encounter dated 06/20/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 07/07/2017**

rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness:* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness:* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Tenderness & Hypertonicity:* lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: mild to moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: worse, patient has noticed increased pain while driving. In addition, active left rotation regressed from 60 to 30 degrees and right rotation regressed from 60 to 45 degrees. *Prognosis:* Guarded.

Post-treatment analysis: patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* worse, VAS score increased from a 4 to 5 out of 10.

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated

**Encounter dated 06/20/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 07/07/2017**

disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x/week for 3 weeks; 1x every 2 weeks for 4 weeks; Re-examination for 7 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization); Cervical (manual traction). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to July 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Tuesday June 27, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 06/27/2017 at 3:52pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Encounter dated 06/27/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 07/07/2017

Subjective

Cervical: Patient returned today stating that her neck pain has been a little better. Right shoulder and arm pain also has been better. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 4/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she has had a headache since yesterday. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting; level: 5/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain continues to be painful. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting, tingling; level: 5/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by motion and static palpation.*

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal bilateral moderate; TFL / ITB left mild to

Encounter dated 06/27/2017 for Danielle Harwell #3438

Procedure Note Date: 07/06/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- headaches, trigger points. Patient presents for treatment of headaches

History of Present Illness

General

The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. The patient states that trigger point injections are helpful in relieving myofascial symptoms.

Current Medications

- Taking Lamictal 25 mg tablet 2 tab(s) orally BID
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking nortriptyline 10 mg capsule 1 cap(s) orally QHS
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

- T & A
- D&C
- Endoscopy
- Colonoscopy

Hospitalization/Major Diagnostic Procedure

See surgical history

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 110/72, HR 84, RR 16, Ht 63", Wt 231, BMI 40.92, BSA 2.18.

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

		Inflator

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with Isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 10 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 07/06/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 07/06/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 07/06/2017.

After consenting to the procedure, the patient was taken to the operating room and positioned on the fluoroscopy table. Sterile prep and drape was done and procedure started as stated above. Local anesthesia was administered. Screening fluoroscopy was utilized to identify the levels stated above. The needle was advanced under direct visualization. The patient's vital signs remained stable throughout the procedure and the patient was taken to the recovery room in stable condition.

**INSURANCE CLAIM
FORMS ENCLOSED**

NOTE: OPEN THIS ENVELOPE FROM THE BOTTOM.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured", i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal Anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician's service; 3) they must be of kinds commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's bill.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black-Lung claims, I further certify that the services performed were for a Black-Lung-related disorder.

No Part B Medicare benefits may be paid unless the form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(e)(6), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1086, 5 USC 8101 et seq, and 30 USC 901 et seq; 38 USC 613; E.O. 13397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No 08-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol 65 No. 177, page 37549, Wed. Sept 12, 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol 65 No. 40, Wed Feb. 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/principles received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recollection claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE(S): Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged could prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment and similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note

Date: 07/06/2017

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 36 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- headaches, trigger points. Patient presents for treatment of headaches

History of Present Illness

General

The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. The patient states that trigger point injections are helpful in relieving myofascial symptoms.

Current Medications

- Taking Lamictal 25 mg tablet 2 tab(s) orally BID
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 inti units capsule 1 cap(s) orally once a day
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking nortriptyline 10 mg capsule 1 cap(s) orally QHS
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Past Medical History

- Asthma
- Esophageal reflux

Surgical History

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy

Vital Signs

BP sitting 110/72, HR 84, RR 16, Ht 63", Wt 231, BMI 40.92, BSA 2.16.

ExaminationNeurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive

 Batavia Office | 35 Batavia City Centre • Batavia, NY 14020 | Fax: (716) 250-2045

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 10 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING, Healthy Living. Patient counseled on the importance of healthy lifestyle 07/06/2017.

Diet. Patient counseled on importance of lowering sugar intake, sodium and fats. 07/06/2017.

Exercise Patient counseled on importance of moderate physical activity daily. 07/06/2017

Follow Up

Attn: Claims Dept

The attached claims have been faxed to Geico. Recently, there has been an issue with the clarity of the claims or they have not been scanned after they have been faxed. This is to verify that they were submitted both via fax and mail.

I hope this will help in getting the claims processed without any delay.

Sincerely,

Kristen R.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured", i.e., items 1a, 4, 5, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whenever submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare, senior Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE, i) for each service rendered incident to my professional service, the identity (legal name and NPI), license #, or SSN of the primary individual rendering each service is reported in the designated section for services to be considered; ii) a physician's professional services, i) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician service, iii) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 10 USC 5336). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or omits essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a) (6), and 44 USC 3101-41 CFR 101 et seq and 10 USC 1079 and 1086; 5 USC 8101 et seq; and 30 USC 901 at seq; 38 USC 613; E.O. 13037.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, 'Carrier Medicare Claims Record,' published in the Federal Register, Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1995, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Reputation of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recoupment claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claim adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1126B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1157. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimates or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Step C4-25-25, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Monday July 3, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 07/03/2017 at 10:30am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain continues to feel better. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches have been "O.K. only a couple last week". *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain has been better since last visit. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, shooting, tingling; level: 3/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature

Encounter dated 07/03/2017 for Danielle Harwell #3438

DOB:08/29/1980 Today's date: 07/20/2017

Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal bilateral mild to moderate; TFL / ITB left mild to moderate. *Tenderness on palpation:* left SI: mild to moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees. *Spinal subluxation level(s):* L4, L5, Left SI, Right SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Cervical assessment:* improving, VAS score improved from a 4 to 3 out of 10. *Prognosis:* Guarded.

Post-treatment analysis: patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** improving, VAS score improved from a 5 to 3 out of 10.

Lumbar assessment: improving, VAS score improved from a 5 to 3 out of 10. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Encounter dated 07/03/2017 for Danielle Harwell #3438

DOB:08/29/1980 Today's date: 07/20/2017

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.

Treatment schedule: 1x/week for 1 week; 1x every 2 weeks for 4 weeks; Re-examination for 5 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left AS (prone mobilization); Cervical (manual traction); SI right PI (diversified side posture). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to July 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 07/03/2017 at 10:30am

Tuesday July 11, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 07/11/2017 at 8:41am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain remains the same. She stated that she had a

**Encounter dated 07/11/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 07/20/2017**

injections last Thursday which initially increased her pain, but after her massage yesterday she has felt better. Right shoulder pain has been better. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches were more intense last week. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain remains the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting, tingling; level: 3/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C1, C2, C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal bilateral mild to moderate; TFL / ITB left mild to moderate. *Tenderness on palpation:* left SI: mild to moderate. *Trigger points:* left gluteus maximus.

Encounter dated 07/11/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 07/20/2017

Orthopedic tests: Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees. **Spinal subluxation level(s):** L4, L5, Left SI, Right SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine).

Cervical assessment: improving, less right shoulder pain. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.

Treatment schedule: 1x/week for 1 week; 1x every 2 weeks for 4 weeks; Re-examination for 5 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left AS (prone mobilization); Cervical (manual traction); SI right PI (diversified side posture); C1 right lateral flexion restriction (Instrument adjustment Arthrostim); C2 right lateral flexion restriction (Instrument adjustment Arthrostim). **Physical Modalities:** bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. **Patient given:** home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10

Encounter dated 07/11/2017 for Danielle Harwell #3438

Re-Evaluation
Date: 07/27/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- Migraines . Patient present for treatment of headache

History of Present Illness

General:

Dear Dr. Panzarella:

We had the pleasure of seeing Danielle today in neurologic reevaluation regarding motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a wonderful 36-year-old young woman who had an unfortunate motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at the urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale. She reported associated sonophobia, osmophobia, spots before her eyes, fatigue, difficulty concentrating, neck stiffness, weakness in the arms and face.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16. MRI L spine and C-spine 1/5/16 showed mild multilevel degenerative changes, but there are disk extrusions seen at C4-C5 and C5-C6. She did have an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 were normal aside from a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8.

Danielle has tried ibuprofen, Tylenol, Motrin, chiropractic care, massage therapy and physical therapy. After initial evaluation, she was started on magnesium oxide, Naprosyn and Rizatriptan. Vestibular therapy and physical therapy have both proven helpful in symptom management. Massage therapy and regular trigger point injections have been very helpful with decreasing her cervical myofascial spasm.

Danielle had been struggling with episodes of dizziness and vertigo which can be so severe she will have to pull over when she is driving. They seem to be triggered by certain neck movements. She will experience a sharp pain starting from the base of her head that will radiate up and over to the top of her head. These do tend to occur with a headache. Lamictal was started and is currently at 100mg, but there is no notable relief. Headaches are almost daily and tend to be located along the right occipital and temporal regions and will radiate into her right eye.

The patient found vestibular and physical therapies helpful, however she was discharged from both. She continues to do complete exercises at home. Unfortunately, the patient feels she has plateaued.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal.

At her last reevaluation, the patient was weaned off Lamictal. She was started on Nortriptyline.

Topamax was planned to start after Lamictal was weaned. Botox was also discussed if medication continued to be ineffective. She was also sent to restart vestibular and physical therapies.

The patient returns today with no improvement of her symptoms. Unfortunately, the patient has been suffering from a constant headache over the past week. She has been taking Nortriptyline at bedtime and tolerating well. She does feel that it has improved her sleep somewhat. She has not yet been able to obtain a vestibular therapy appointment due to availability. Due to her constant headache, she has been taking Naproxen at least 1-2 times a day over the past week. Since her last appointment she did wean off Lamictal.

Current Medications

- Taking Lamictal 25 mg tablet 2 tab(s) orally BID
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally pm headache, up to BID
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking rizatriptan 10 mg tablet 1 tab(s) orally pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking nortriptyline 10 mg capsule 1 cap(s) orally QHS
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Review of Systems

Positive for headache, falls, dizziness, sleep outcome blurry vision, ringing in ears, earache, vertigo, joint pain, stiffness, neck and lower back pain, muscle aches, easy bruising. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy. Positive for headaches. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit.

Vital Signs

BP sitting 122/82, HR 88, RR 16, Ht 63", Wt 234.2, BMI 0.29, HC 0, BSA 7.52.

Examination**General Examination:**

General Appearance: Well-nourished, well-developed, in moderate distress, participated with the exam. Well groomed. **Eyes:** Disc margins clear, no vessel abnormalities, no papilledema. **Neck:** Supple. Range of motion limited with lateral flexion. Trigger points palpated within cervical musculature bilaterally. **Cardiovascular:** peripheral pulses within normal limits. **Extremities:** Full range of motion of extremities x4. No edema.

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. **Speech:** Speech content and production was normal. **Memory:** Memory for remote and recent events was intact. **Fund of Knowledge:** Appropriate for events and past history. **Cognition:** was intact. **Motor:** 5/5 upper and lower extremities bilaterally. **Tone:** Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. **Reflexes:** DTRs were +2 globally. **Coordination:** Test of coordination and fine motor skills were within normal limits. **Gait and Station:** Gait within normal limits. Romberg positive.. **Sensory:** Sensation to touch and cold was intact in all 4 extremities bilaterally.

Cranial Nerves:

Cranial Nerve II: Visual fields are full. **Cranial Nerves III, IV, VI:** Extraocular movements intact. **PERRLA.** **Cranial Nerve V:** Facial sensation and muscles of mastication were normal bilaterally. **Cranial Nerve VII:** Face was symmetric and strength was equal bilaterally. **Cranial Nerve VIII:** Hearing was intact to finger rub bilaterally. **Cranial Nerves IX, X:** Swallowing and palate elevation was within normal limits. **Cranial Nerve XI:** Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. **Cranial Nerve XII:** Tongue was midline.

Assessments

1. Bilateral occipital neuralgia - M54.81 (Primary)
2. Posttraumatic headache - G44.309
3. Myofascial pain - M79.1
4. Vestibular dysfunction - H83.2X9
5. Sleep difficulties - G47.9
6. Concussion, without loss of consciousness, sequela - S06.0X0S

Danielle is a very sweet 36-year-old female who presents today for reevaluation regarding headaches and postconcussive symptoms. Unfortunately, the patient has had a severe headache that has persisted over the past week. We will provide her with a Toradol injection in the office. I would also like her to take a Medrol Dosepak as there is likely component of medication overuse. In addition, due to the severity of the patient's symptoms, I do feel as medically necessary to provide the patient with an occipital nerve block at today's appointment. This will be the patient's first nerve block. Regarding preventative agents, we will increase her Nortriptyline to 20 mg at bedtime to further aid with sleep. We will also start her on Topamax now that she is weaned off of Lamictal, which was ineffective for her. She does plan to start vestibular therapy once she is able to obtain an appointment. We will also continue regular trigger point injections,

chiropractic therapy, and massage therapy. The patient is to return in 2 weeks for trigger point injections. We will see the patient again for reevaluation in 2-3 months, sooner if needed.

This dictation was created with Dragon voice recognition system. Although efforts were made to ensure accuracy, voice recognition errors may be present.

Dr. McVige is the supervising physician on site.

Thank you for allowing us to participate in the care of this patient. If there are any questions please feel free to call anytime.

Treatment

1. Posttraumatic headache

Start Medrol Dosepak tablet, 4mg, as directed, orally, on package, 6 days, 21, Refills 0

Start Topamax tablet, 25 mg, 1 tab(s), orally, Take 1 QHS x 1 week; Increase to 1 tab in AM & 1 tab in PM x 1 week; Increase to 2 tabs AM & 2 tabs PM x 1 week, 30 day(s), 120, Refills 5

Stop Lamictal tablet, 25 mg, 2 tab(s), orally, BID

Increase nortriptyline capsule, 10 mg, 2 cap(s), orally, QHS

2. Myofascial pain

MASSAGE Therapy 1617284

Chiropractic therapy 1617283

3. Others

Notes: The patient is to continue with the current treatment plan.

Procedures

Toradol:

Assessment: Received patient signed informed consent. Patient was in the sitting position. Sterile prep utilizing an alcohol swab was performed. A total of 60 mg Toradol was injected into the Left deltoid, with a 27 gauge needle utilized. No complications occurred. Hemostasis was easily maintained. Post injection instructions given to patient. The patient was stable at discharge by Alesha Adams, LPN.

NERVE BLOCK: I positioned the patient in a sitting position within the exam room. The occipital area was prepped and cleansed with isopropyl alcohol in a sterile fashion. I provided the patient with a blockade using a 25-gauge needle Bilateral to the greater and lesser occipital nerves with equal volumes of 1% lidocaine and 0.5% bupivacaine. A total of 3 cc was injected on each side without complication. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was observed following treatment to assure the absence of complications and was discharged in good condition. The patient was instructed to apply ice and gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle. 07/27/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 07/27/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 07/27/2017.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a violation of law punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENT: A patient's signature requests that payment he made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and non-medical information as to whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is to pay for the services for which the Medicare claim is made. § 18 CFR 411.2(a). Item 9 is completed by the patient's signature authorizes release of the information to the health plan or agency. In Medicare assigned or TRICARE preferred rates, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary if he fails to do so. In Medicare assigned or TRICARE preferred rates, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary if it is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain institutions with the United States Government. Information on the patient's sponsor should be provided in those items captioned in "insured", i.e., items 1a, 2, 6, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have furnished myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed decision and pay my claim; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal Anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly removed by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI license #, or SSN) of the primary individual rendering such service is noted on the claim, unless such service is a integral, although incidental part of a covered physician service; 7) they must be rendered under the physician's direct supervision by me or my employee; 8) they must be of kinds commonly furnished in physician's office; and 9) the services, if non-physician, must be included on the physician's bill.

For TRICARE claims, I further certify that, for any employee(s) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government, either civilian or military (refer to 10 USC 5336), for Black Lung claims, I further certify that the services performed were for a Black Lung related disorder.

No Part H Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 442.82).

NOTICE: Any one of the requirements or failure to furnish essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PARTIES ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and DOL to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 703(a)(3), 1802 and 1874 of the Social Security Act, as amended, 42 CFR 411.24(a) and 426(g)(6), and 44 USC 3101; 41 CFR 101-11 sqq and 10 USC 1078 and 1079, 44 USC 6111 et seq and 30 USC 901 or seq; 38 USC 613, E.O. 13377.

The information you submit to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, insurance companies, medical review boards, health plans, and other organizations or Federal agencies, for the efficient administration of Federal programs. It may require other third parties to pay or remit to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying System No. 69-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 65 No. 177, page 47549, Wed Sept 16, 1998, as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 65 No. 40, Wed Feb. 26, 1990. See ESA-3, ESA-6, ESA-12, ESA-13, ESA-30, or as revised and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the care or supplies received are authorized by law.

ROUTINE USES: Information on claim and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services, and/or the Dept. of Transportation contractor and their statutory representatives under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Federal Bureau of Investigation for criminal investigations, and consumer reporting agencies in connection with recoupment claims, and to Congressional Offices in response to legitimate needs at the request of the person to whom it is a record holder. Appropriate disclosure may be made to other Federal, state, local, foreign governmental agencies, private business entities, and individual individuals or entities on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntarily, or when failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for failing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide timely information under TRICARE could be deemed an obstruction.

It is my duty and you shall find if you know that another party is responsible for paying for your treatment. Section 11206 of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-504, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to describe fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to stamp, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to notify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false claim, statement, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Computer Matching Program Act of 1988, no person is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0960-1189. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review OMB's privacy impact statement, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of this time or believe OMB has overlooked any comments for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-28-05, Baltimore, Maryland 21244-2900. This address is for comments only. Do NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

PATIENT AND INSURED INFORMATION

PHYSICIAN OR SUPPLIER INFORMATION

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.
WARNING: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a civil or criminal penalty under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

STATEMENT OF PAYMENT AGREEMENT AND TRICARE PAYMENT: A physician signature requires that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Block 1 through 12 is true, accurate, and complete. In the case of a physician claim, the patient's signature authorizes him only to release to his/her medical provider the information on and that the person has employer group health insurance. In so doing, no fault provider compensation or other form of which is received is to be paid to the physician for which the Medicare claim is made. See 42 CFR 411.4(a). If item 8 is completed, the patient's signature authorizes release of the information to the hospital, in which case the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the billable amount and the amounts are responsible only for the deductible, coinsurance and non-covered services. Compensation and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes a payment to health benefits provided through uniform providers in Uniform Services. Information on the patient's sponsor should be provided in those items captioned in "Insured" i.e., items 1a, 4, 6, 7, 8 and 11.

BLACK LUNG AND FECA CLAIMS

A provider agrees to except fee payments by the Government as payment in full. See Black Lung and FECA instructions regarding required pronouncements against enrolling physicians.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on the form is true, accurate and complete; 2) I have furnished myself with all applicable laws, regulations and general instructions which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed decision and payment decision; 4) this claim, either submitted by me or on my behalf by my designee, is being correctly, completely and with all applicable documents and/or supporting forms, signatures and originals, submitted to my patient (but not to my employer, business or corporation); 5) the services on this form were not furnished directly and personally furnished by me or were furnished incident to my professional services as my employees under my direct supervision, except as otherwise agreed or authorized by Medicare or TRICARE; 6) for each service rendered incident to my professional services, the identity (first name and HICN) of the primary individual rendering such service is indicated in the designated section for services to be considered "incident to" a physician's professional services; 7) they must be listed under the physician's name as supervisor by his/her employee; 8) they must be an integral, although incidental, part of a physician's practice; 9) they must be of lands personally furnished by the physician's office; and 10) the services of non-physician, must be indicated on the physician's bills.

For TRICARE claim: 1) I further swear that I for any reason, or who render services are an employee, member of the Uniformed Services or civilian employee of the United States Government or a current employee of the United States Government, either civilian or military (just) is USC 554a. For Black Lung claims, I further certify that the services performed were for a Black Lung-related condition.

My signature is made herein in the belief the form is received as required by existing law and regulations (42 CFR 404.22).

WARNING: Any use of this form or its attachments except of information to receive payment from Federal funds is subject to law and regulations of the Department of Health and Human Services.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

I am authorized by CMS, TRICARE and OMB to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is set out in 208a(a), 1991, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a)(6), and 44 USC 3101-4(f) CFR 101 et seq and 10 USC 1078 and 1079, 6 USC 141 et seq and 49 USC 501 et seq, 29 UCC 819, E.O. 12027.

The information is used to determine eligibility, to determine if your services are to be paid, to determine if you are eligible, and to determine if your services are to be paid.

This information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other Federal agencies to pay primary to Federal programs, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the services you have used to a hospital or doctor. Additional disclosures are made through the uses of information contained in sections of this notice.

FOR MEDICARE CLAIMS: See the notice following section 1902-70-0501, titled "General Medicare Claims Record" published in the Federal Register, Vol. 55 No. 177, page 2518-2519, July 27, 1990, as updated and republished.

FOR OMB APPROVAL: OMB #13: Department of Labor, Privacy Act of 1974, "Reputation of Office of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28, 1990, Supp 26A-6, EOB 6, 114-12, 12A-13 (E.O. 12057) as updated and republished.

FOR TRICARE AND FECA: PRINCIPAL PURPOSES: To exclude disability for medical care provided by civilian sources and to make payment upon establishment of disability and to determine if there is a conflict between medical care furnished by two.

FOR TRICARE (FECA): Information contained and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation and/or the Dept. of Justice, other Federal agencies under TRICARE/CHAMPVA, to the Dept. of Justice or representation of the Secretary of Defense in civil actions in the Federal Courts, private collectors, auditors, and consumers for rating agencies in connection with recuperation claims, and to Congressional Offices in response to inquiries made of the Office of the Inspector General about a medical program. Appropriate disclosure may be made to other Federal, state, local, or non-governmental agencies, private businesses and/or individuals and/or to other Federal, state, or local agencies relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, quality-of-care, compliance, and audit purposes, and for the operation of TRICARE.

DISCLOSURE: Voluntarily, however, failure to furnish information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties and/or other consequences in failing to supply information. However, failure to furnish information regarding the medical services, itemized or the amount charged would prevent payment of claims under Federal programs. Failure to furnish our other information, such as name or claim number, could delay payment of the claim. Failure to provide medical information that is FECA could be denied or deducted.

It is important to you to let us know if you know that another party is responsible for paying for your treatment. Section 11093 of the Social Security Act and 31 USC 3901-3912 provide penalties for false statements of information.

You should be aware that P.L. 102-593 (the Computer Matching and Privacy Protection Act of 1996), permits the government to verify information by way of computer matching.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services to the State Attorney or Dept. of Health and Human Services may request.

I further agree to submit to a review by the Medicaid program for those claims submitted for payment under that program, with the exception of any third party deductible, non-insurance, co-payment or similar third party charges.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

WARNING: It is illegal to certify that long-term care information is accurate and complete. I understand that payment and certification of this claim will be from Federal and State funds, and if a provider claim, statement or documents is found to be inaccurate, may be prosecuted under applicable Federal or State laws.

As required by the Patient Protection Act of 1996, no person is required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is OMB-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search for data resources, gather the data needed, and complete and review the information collected. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-25-05, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

chiropractic therapy, and massage therapy. The patient is to return in 2 weeks for trigger point injections. We will see the patient again for reevaluation in 2-3 months, sooner if needed. This dictation was created with Dragon voice recognition system. Although efforts were made to ensure accuracy, voice recognition errors may be present.

Dr. McVige is the supervising physician on site.

Thank you for allowing us to participate in the care of this patient. If there are any questions please feel free to call anytime.

Treatment

1. Posttraumatic headache

Start Medrol Dosepak tablet, 4mg, as directed, orally, on package, 6 days, 21, Refills 0

Start Topamax tablet, 25 mg, 1 tab(s), orally, Take 1 QHS x 1 week; Increase to 1 tab in AM & 1 tab in PM x 1 week, Increase to 2 tabs AM & 2 tabs PM x 1 week, 30 day(s), 120, Refills 5

Stop Lamictal tablet, 25 mg, 2 tab(s), orally, BID

Increase nortriptyline capsule, 10 mg, 2 cap(s), orally, QHS

2. Myofascial pain

MASSAGE Therapy 1617284

Chiropractic therapy 1617283

3. Others

Notes. The patient is to continue with the current treatment plan.

Procedures

Toradol:

Assessment. Received patient signed informed consent. Patient was in the sitting position. Sterile prep utilizing an alcohol swab was performed. A total of 60 mg Toradol was injected into the Left deltoid, with a 27 gauge needle utilized. No complications occurred. Hemostasis was easily maintained. Post injection instructions given to patient. The patient was stable at discharge by Alesha Adams, LPN.. NERVE BLOCK: I positioned the patient in a sitting position within the exam room. The occipital area was prepped and cleansed with isopropyl alcohol in a sterile fashion. I provided the patient with a blockade using a 25-gauge needle Bilateral to the greater and lesser occipital nerves with equal volumes of 1% lidocaine and 0.5% bupivacaine. A total of 3 cc was injected on each side without complication. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was observed following treatment to assure the absence of complications and was discharged in good condition. The patient was instructed to apply ice and gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living Patient counseled on the importance of healthy lifestyle 07/27/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats 07/27/2017

Exercise: Patient counseled on importance of moderate physical activity daily 07/27/2017

**INSURANCE CLAIM
FORMS ENCLOSED**

NOTE: OPEN THIS ENVELOPE FROM THE BOTTOM.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 8 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured"; i.e., items 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 6536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(e), 1892, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a) (6), and 44 USC 3101 et seq and 10 USC 1079 and 1085, 5 USC 801 et seq, and 30 USC 801 et seq, 38 USC 613; E.O. 12897

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying System No. 69-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28, 1990. See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S) To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompensation claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other Federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntarily, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment! Section 1120B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding the information.

You should be aware that P.L. 100-603, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1690. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE local intermediary if the fee is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "insured", i.e., items 1a, 4, 6, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal Anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service, by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI), license #, or SSN of the primary individual rendering each service is reported in the designated section For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employees, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bill.

For TRICARE claims: I further certify that I (or any employee) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5538). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(e), 1892, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a) (6), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1086, 5 USC 801 et seq; and 38 USC 801 et seq, 38 USC 613, E.O. 13397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties pay to primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See ESA-5, EBA-5, EBA-12, ESA-13, EBA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

BOUTLINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recipient claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1187. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: RA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Re-Evaluation
Date: 07/27/2017

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 36 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- Migraines . Patient present for treatment of headache

History of Present Illness

General:

Dear Dr. Panzarella:

We had the pleasure of seeing Danielle today in neurologic reevaluation regarding motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a wonderful 36-year-old young woman who had an unfortunate motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at the urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale. She reported associated sonophobia, osmophobia, spots before her eyes, fatigue, difficulty concentrating, neck stiffness, weakness in the arms and face.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16 MRI L spine and C-spine 1/5/16 showed mild multilevel degenerative changes, but there are disk extrusions seen at C4-C5 and C5-C6. She did have an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 were normal aside from a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8.

Danielle has tried ibuprofen, Tylenol, Motrin, chiropractic care, massage therapy and physical therapy. After initial evaluation, she was started on magnesium oxide, Naprosyn and Rizatopran. Vestibular therapy and physical therapy have both proven helpful in symptom management. Massage therapy and regular trigger point injections have been very helpful with decreasing her cervical myofascial spasm.

Danielle had been struggling with episodes of dizziness and vertigo which can be so severe the she will have to pull over when she is driving. They seem to be triggered by certain neck movements. She will experience a sharp pain starting from the base of her head that will radiate up and over to the top of her head. These do tend to occur with a headache. Lamictal was started and is currently at 100mg, but there is no notable relief. Headaches are almost daily and tend to be located along the right occipital and temporal regions and will radiate into her right eye.

The patient found vestibular and physical therapies helpful, however she was discharged from both. She continues to do complete exercises at home. Unfortunately, the patient feels she has plateaued.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal.

At her last reevaluation, the patient was weaned off Lamictal. She was started on Nortriptiline.

 Batavia Office | 35 Batavia City Centre • Batavia, NY 14020 | Fax: (716) 250-2045

Topamax was planned to start after Lamictal was weaned. Botox was also discussed if medication continued to be ineffective. She was also sent to restart vestibular and physical therapies.

The patient returns today with no improvement of her symptoms. Unfortunately, the patient has been suffering from a constant headache over the past week. She has been taking Nortriptyline at bedtime and tolerating well. She does feel that it has improved her sleep somewhat. She has not yet been able to obtain a vestibular therapy appointment due to availability. Due to her constant headache, she has been taking Naproxen at least 1-2 times a day over the past week. Since her last appointment she did wean off Lamictal.

Current Medications

- Taking Lamictal 25 mg tablet 2 tab(s) orally BID
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking nizatidine 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking nortriptyline 10 mg capsule 1 cap(s) orally QHS
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Review of Systems

Positive for headache, falls, dizziness, sleep outcome blurry vision, ringing in ears, earache, vertigo, joint pain, stiffness, neck and lower back pain, muscle aches, easy bruising. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy. Positive for headaches. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit.

Vital Signs

BP sitting 122/82, HR 88, RR 16, HT 63", Wt 234.2, BMI 0.29, HC 0, BSA 7.52.

Examination

General Examination.

General Appearance. Well-nourished, well-developed, in moderate distress, participated with the exam. Well groomed. Eyes: Disc margins clear, no vessel abnormalities, no papilledema. Neck: Supple. Range of motion limited with lateral flexion. Trigger points palpated within cervical musculature bilaterally. Cardiovascular: peripheral pulses within normal limits. Extremities: Full range of motion of extremities x4. No edema.

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. Speech: Speech content and production was normal. Memory: Memory for remote and recent events was intact. Fund of Knowledge: Appropriate for events and past history. Cognition was intact. Motor: 5/5 upper and lower extremities bilaterally. Tone: Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. Reflexes: DTRs were +2 globally. Coordination: Test of coordination and fine motor skills were within normal limits. Gait and Station: Gait within normal limits Romberg positive. Sensory: Sensation to touch and cold was intact in all 4 extremities bilaterally.

Cranial Nerves:

Cranial Nerve II: Visual fields are full. Cranial Nerves III, IV, VI: Extraocular movements intact. PERRLA. Cranial Nerve V: Facial sensation and muscles of mastication were normal bilaterally. Cranial Nerve VII: Face was symmetric and strength was equal bilaterally. Cranial Nerve VIII: Hearing was intact to finger rub bilaterally. Cranial Nerves IX, X: Swallowing and palate elevation was within normal limits. Cranial Nerve XI: Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. Cranial Nerve XII: Tongue was midline.

Assessments

- 1 Bilateral occipital neuralgia - M54.81 (Primary)
- 2 Posttraumatic headache - G44.309
- 3 Myofascial pain - M79.1
- 4 Vestibular dysfunction - H83.2X9
- 5 Sleep difficulties - G47.9
- 6 Concussion, without loss of consciousness, sequela - S06.0X0S

Danielle is a very sweet 36-year-old female who presents today for reevaluation regarding headaches and postconcussive symptoms. Unfortunately, the patient has had a severe headache that has persisted over the past week. We will provide her with a Toradol injection in the office. I would also like her to take a Medrol Dosepak as there is likely component of medication overuse. In addition, due to the severity of the patient's symptoms, I do feel as medically necessary to provide the patient with an occipital nerve block at today's appointment. This will be the patient's first nerve block. Regarding preventative agents, we will increase her Nortripptyline to 20 mg at bedtime to further aid with sleep. We will also start her on Topamax now that she is weaned off of Lamictal, which was ineffective for her. She does plan to start vestibular therapy once she is able to obtain an appointment. We will also continue regular trigger point injections,

Policy ID: 013873940011059

Friday July 21, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 07/21/2017 at 9:12am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain continues to remain sore. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she noticed headaches "quite often this week". *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain remains the same, but her left posterior thigh pain "has not been as bad". *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, shooting, tingling; level: 3/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature

Encounter dated 07/21/2017 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 08/02/2017

Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C1, C2, C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Mild to Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal bilateral mild to moderate; TFL / ITB left mild to moderate. Tenderness on palpation: left SI: mild to moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees. *Spinal subluxation level(s):* L4, L5, Left SI, Right SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Cervical assessment:* unchanged. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: improving, less posterior thigh pain. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Encounter dated 07/21/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 08/02/2017

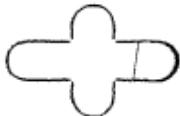

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x every 2 weeks for 4 weeks; Re-examination for 4 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left AS (prone mobilization); Cervical (manual traction); SI right PI (diversified side posture); C1 right lateral flexion restriction (Instrument adjustment Arthrostim); C2 right lateral flexion restriction (Instrument adjustment Arthrostim). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to August 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 07/21/2017 at 9:12am

Abbreviations:

ADL: activities of daily living
MVA: motor vehicle accident
ROM: range of motion
WNL: within normal limits

תְּמִימָנָה וְעַמְמָנָה, כְּלֵבֶת בְּרִית

Test cases you can't predict from the day before are the ones that will make or break your application.

However, the main problem for most of the countries is that they have no clear policy on implants and no programmatic guidelines and policies for the use of implants. This is a major problem in India and less developed countries. The lack of a clear policy on implants has led to a lack of awareness among health workers and the public about the benefits and risks of implants. This is a serious concern for the future of the Indian population as more and more people are turning to implants for cosmetic purposes.

For TNCARE clients, I work directly with their insurance companies to coordinate care and services. This allows me to provide you with the best possible care while ensuring that the use of State Government's resources is kept to a minimum. If you have any questions or concerns, please do not hesitate to contact me. Thank you for your continued support.

No Part D "Medicare I enrollment begins no earlier than October 1, 2006, 120 days before the first day of the month in which the individual reaches age 65.

Policy ID: 013873940011059

Monday July 31, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 07/31/2017 at 8:45am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck is "stiff." Patient stated that she had a nerve block last week at DENT which has helped with her headaches. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving regarding her headaches. *since* last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that her headaches have been more slight. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since* last visit. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain has been "stiff. Left posterior thigh feels tight". *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since* last visit. *Pain:* achy, dull, stiff, tight. *Range:* 3->4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders.

Encounter dated 07/31/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 08/18/2017

Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C1, C2, C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Mild to Moderate. **Trigger points:** bilateral rhomboids. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Tenderness & Hypertonicity** lumbar paraspinal bilateral mild to moderate; TFL / ITB left mild to moderate. **Tenderness on palpation:** left SI: mild to moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees. **Spinal subluxation level(s):** L4, L5, Left SI, Right SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** improving, headaches have not been as intense. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Encounter dated 07/31/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 08/18/2017

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x every 2 weeks for 2 weeks; Re-examination for 2 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left AS (prone mobilization); Cervical (manual traction); SI right PI (prone mobilization); C1 right lateral flexion restriction (Instrument adjustment Arthrostim); C2 right lateral flexion restriction (Instrument adjustment Arthrostim). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to August 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

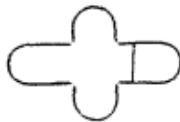

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 07/31/2017 at 8:45am

Abbreviations

ADL: activities of daily living
MVA: motor vehicle accident
ROM: range of motion
WNL: within normal limits

BECAUSE THIS FORM IS USED BY VARIOUS GROUPS OF PEOPLE TO RECORD THE STATUS OF CHILDREN, THE GOVERNMENT OF INDIA HAS ISSUED THIS FORM.

NOTICES: Any person who knowingly files or documents a claim containing a complaint, cause of action, or defense, or who neglects or fails to file a claim containing a complaint, cause of action, or defense, may be liable for attorney's fees and costs.

Figure 4B shows the results of the model calculations for the case of a 100% conversion of the initial reactants. The calculated values of the rate constants for the first two steps of the reaction are in excellent agreement with the corresponding experimental values. The calculated value of the rate constant for the third step is also in good agreement with the experimental value, although the latter was obtained under different conditions.

¹⁰ See also the discussion of the relationship between the two concepts in S. M. Hart, "The Rule of Law," 1969, 107 L. & P. 91.

¹⁰ See also the discussion of the 'moral economy' in the following section.

In addition to the above, the following are also included in the study: (1) the relationship between the amount of time spent in the classroom and the achievement of the students; (2) the relationship between the amount of time spent in the classroom and the achievement of the students; (3) the relationship between the amount of time spent in the classroom and the achievement of the students.

For TRICARE plans, a member may file a grievance if he or she is denied a claim benefit, or if he or she believes he or she has been discriminated against by the Department of Defense or another entity in accordance with the applicable law.

Table 1. Summary of characteristics of the 151 isolates from 100 patients with *Candida* infection in the United States, 1988-1990

NOTICE TO PATIENTS ABOUT THE COLLECTIVE ACTION AGAINST THE PHARMA INDUSTRY AND PUBLIC CLIMATE ACTORS (NO. 19-1474) NOT STATED IN THE COMPLAINT This notice is being provided to you by the Plaintiff in the above-captioned case. The Plaintiff is asking the Court to rule that the Defendants violated the First Amendment of the United States Constitution by enacting the California Consumer Privacy Act ("CCPA") and the California Privacy Rights Act ("CPRA").

The information contained in this document is the sole property of the Company and is confidential. It may not be reproduced, distributed or disclosed without the prior written consent of the Company.

The information may be used to plan for the prevention of further outbreaks and to get those who have been infected to self-isolate. It can also be used to identify other people who may have been exposed to the virus.

For the above-quoted "factual statement" of witness No. 177, see the "Report of the Commission," which bears the before-quoted date of Feb. 20, 1917, page 37540, Vol. I, Part 2, of the present volume.

For more information about the EEA, visit www.eea.europa.eu.

After the initial screening, the remaining 1000 subjects were randomly assigned to receive either the standard treatment or the new drug. The results showed that the new drug was significantly more effective than the standard treatment, with a 60% reduction in symptoms compared to 40% for the standard treatment.

HRH 1-19. Higher-level benefit and cost analysis. In addition to the benefit and cost analysis described above, a more detailed analysis of the proposed program can be conducted at the request of the Office of the Secretary of Transportation or the Secretary of Transportation's designee. This analysis will include an examination of the potential impact of the proposed program on the transportation system, including the potential impact on safety, traffic, economic, and environmental factors. The analysis will also consider the potential impact of the proposed program on the transportation system, including the potential impact on safety, traffic, economic, and environmental factors.

If you need any help or if you have any questions, feel free to contact me via email at alexander.schaefer@uni-ulm.de or via phone at +49 712 60 44 00 11.

You should be encouraged to talk to the Columbia teacher and/or to Park City High staff members about the difficulties you may have in dealing with your child.

3574-1471(200005)14:2;1-2

¹ This is consistent with the argument that the steering committee's role in the process makes it difficult to distinguish between the steering committee and the government in the final report. Cf. *ibid.*, 100–101.

NAME OF PHYSICIAN (OR DOCTOR) WHO IS TREATING YOU AND THE DATE OF YOUR LAST VISIT

同时，该报告还建议：在今后的五年内，将“对新成立的公司和企业给予特别优惠”（即“特区”）的范围扩大到整个中国。

¹⁰ In addition to his personal library, James A. Garfield also had a large collection of books at the U.S. Capitol. These included the works of George Washington, Abraham Lincoln, and other presidents, as well as a large collection of historical documents and manuscripts.

Patient: Danielle Harwell #3438 DOB: 08/29/1980
Policy ID: 013873940011059

Monday August 14, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 08/14/2017 at 4:01pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient returned today stating that her neck pain continues, but massage does help. Follow up with Dr. Siddique in November 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, right upper arm, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she has not had a headache since last visit. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; activities of daily living; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back and left posterior thigh pain remains the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, stiff, tight. *Range:* 3->4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain lower neck; extension: WNL 60/60 with no pain; left rotation: 30/80 with pain left lower neck ; right rotation: 45/80 with pain left lower neck ; left lateral bending: 25/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders.

Encounter dated 08/14/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 08/30/2017

Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive lower neck; maximum right lateral compression: Positive lower neck. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C1, C2, C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Mild to Moderate. **Trigger points:** bilateral rhomboids. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: WNL 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Tenderness & Hypertonicity** lumbar paraspinal bilateral mild to moderate; TFL / ITB left mild to moderate. **Tenderness on palpation:** left SI: mild to moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees. **Spinal subluxation level(s):** L4, L5, Left SI, Right SI. **Subluxations detected by:** motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** improving, no headaches since last visit. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** unchanged.

Lumbar assessment: unchanged. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Encounter dated 08/14/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 08/30/2017

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x every 2 weeks for 2 weeks; Re-examination for 2 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left AS (prone mobilization); Cervical (manual traction); SI right PI (prone mobilization); C1 right lateral flexion restriction (Instrument adjustment Arthrostim); C2 right lateral flexion restriction (Instrument adjustment Arthrostim). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back pm for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to August 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

James Panzarella DO
1208 Niagara Falls Boulevard
Tonawanda, NY 14150

Patient Name: Danielle Harwell
Date of Birth: 08/29/1980
No-Fault Carrier: NF Geico
CL#: 0138739400101059
Date of Injury: 10/31/15

Physiatry Re-evaluation: August 2, 2017

Chief Complaint(s): Neck pain, headaches, low back pain and leg pain.

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle in our Park Club Lane office for re-evaluation on August 2, 2017.

HISTORY/CHIEF COMPLAINT

This is a 36-year-old female presenting today for re-evaluation. She is status post left L5-S1 transforaminal epidural steroid injection with Dr. Siddiqui on June 1, 2017. The patient does state the injection helped with her left leg pain. She reports her relief to be approximately 50%, which is ongoing. This seemed to work better than the previously performed caudal epidural steroid injection. The patient continues to follow with Dent Neurologic Institute for chronic headaches. She recently underwent an occipital nerve block for headache flare-up and is currently on a Medrol Dosepak for this. She also utilizes occasional naproxen. She reports naproxen is no longer effective at treating her back pain and is inquiring about other medications to take. She continues with chiropractic care and medical massage therapy as well. She rates her pain between 3 and 4 out of 10 on the visual analog scale most days. Standing, lifting and walking aggravate her pain and lying down and also keeping active help. She denies unsteady gait, electric-shock sensations, bowel or bladder dysfunction or weakness.

Review of systems is notable for numbness, tingling, headaches and joint pain.

PHYSICAL EXAMINATION

BP Sitting: 125/85 **Pulse:** 80 **Resp:** 16 **Ht:** 63" **Wt:** 200lb **BMI:** 35.4

General: This is a 36-year-old female, in no acute distress. She is awake, alert and appropriate. Speech is fluent and coherent.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are

pink and moist.

Cardiovascular: Normal S1, S2.

Abdomen: Obese, non-distended.

Neuromusculoskeletal: The patient demonstrates well-preserved strength throughout the lower extremities. Sensory examination is intact to light touch throughout. She demonstrates symmetric muscle bulk and tone without spasticity or rigidity. Straight leg raise sign is negative. Patrick testing is negative. She ambulates with a non-antalgic gait.

Psychiatric: Judgement and cognition are within normal limits.

ASSESSMENT

M51.26 - Other intervertebral disc displacement, lumbar region, M53.3 - Sacrococcygeal disorders, not elsewhere classified, M47.816 - Spondylosis without myelopathy or radiculopathy, lumbar region

IMPRESSION/RECOMMENDATIONS:

This is a 36-year-old female with low back pain and left leg pain in the setting of multi-level lumbar degenerative disc disease and spondyloarthropathy with disc bulges/herniations L4-5 and L5-S1. I will introduce ibuprofen to be used in lieu of naproxen for her low back pain. We discussed potentially trying a muscle relaxant or gabapentin, although the patient is a caregiver to her three young children and husband, so this may be a factor in utilizing a medication such as this. We will hold off from further interventions at this time, but we may consider a repeat procedure as clinically warranted. The patient will return to the office in 3-4 months or sooner as clinically warranted.

The patient was advised today regarding treatment with the above named medication(s). The risks, benefits, common side effects and alternative treatments were discussed with the patient. The patient verbalized understanding and was told to call with any concerns.

Thank you for allowing me to participate in Danielle's care. If you have any questions or concerns regarding this patient, please do not hesitate to contact me at your earliest convenience.

Sincerely,

Electronically signed by Sarah O'mara, PA-C on 08/21/2017 at 8:13 am

Procedure Note

Date: 09/08/2017

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 37 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- Migraines, trigger points. Shoulder and neck pain

History of Present Illness

General:

The patient has migraine headaches, cervicalgia and associated trigger points. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine and bupivacaine. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. Patient tolerated the procedure.

Patient has had trigger point injections with good results in the past. She tried to go 2 months between injections, and unfortunately has seen an increase in neck pain. She is considering decreasing the amount of massage therapy in her current regimen, she feels quite overloaded with appointments at the moment. She states the occipital block 2 weeks ago was quite helpful for her headache. She is also currently titrating onto Topamax.

Current Medications

- Taking nortriptyline 10 mg capsule 2 cap(s) orally QHS
- Taking Medrol Dosepak 4mg tablet as directed orally on package
- Taking Topamax 25 mg tablet 1 tab(s) orally Take 1 QHS x 1 week; Increase to 1 tab in AM & 1 tab in PM x 1 week; Increase to 2 tabs AM & 2 tabs PM x 1 week
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 iu units capsule 1 cap(s) orally once a day
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours. MDD = 2, MWD = 3
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Examination**Neurological:**

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

No notable rash or lesions visualized at the area of injection sites.

Assessments

1. Myofascial pain - M79.1 (Primary)

Continue all previously prescribed medicines at the current doses.

The patient is to continue with the current treatment plan.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Dr. McVige is the supervising physician on site.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Procedures**Injections:**

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 10 areas in the back within the trapezieli and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 09/08/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 09/08/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 09/08/2017.

Monday August 28, 2017 Provider: Peter Guzinski DC RE-EXAM

Electronically signed by Peter Guzinski DC on 08/30/2017 at 1:15pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Accident Description: *Date of Accident:* October 31, 2015. *Time of Accident:* 4:55 PM. *Narrative Description of Accident:* Patient stated that she was stopped in traffic, while waiting for a truck to make a left hand turn into a driveway, when she was rear impacted. She stated that accident occurred while she was traveling South on Starin in the City of Buffalo, New York. Mrs Harwell, stated that this was a chain reaction accident. The vehicle that was behind her was also stopped and was pushed into her vehicle by an automobile that rear impacted them. *Patient Seatbelted?* Yes. *Position in vehicle driver.* *Patient Position at Impact:* looking straight ahead. *Impact Point of Patient's Car:* rear. *Brakes On At Time of Impact?* Yes. *Airbags Deployed?* No. *Did The Patient's Seat Break?* No. *Impact With Car Interior?* seatbelt left chest; headrest back head. *Patient's Vehicle Type:* Honda Odyssey 2007. *Type of Other Vehicle:* Honda CRV 2015. *Road Conditions At Time of Accident:* dry. *Was There Loss of Consciousness?* no. *What Symptoms Were Immediately Present?* Patient stated that she was experiencing head, neck, back and left shoulder and arm pain.

Cervical: Patient presented today with the continued chief complaint of neck pain. Follow up with Dr. Siddique for pain management is in November 2017. Due to the pain, she is unable to lift heavy weights, she has slight headaches which come frequently, she has a fair degree of difficulty with concentrating, she can do most of her usual work, but no more and her sleep has been moderately disturbed (1-2 hrs. sleepless). *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* worse. *since last re-examination on June 12, 2017.* *Pain:* achy, dull, sharp, tingling, shooting; level: 5/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, but they no longer last all day. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Cervical Disability Index:* 36%. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* worse.

**Encounter dated 08/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/13/2017**

since last re-examination on June 12, 2017. **Pain:** achy, dull, sharp, shooting; level: 5/10. **Pain is frequent.** **Exacerbates symptoms:** movement; bending; lifting; reaching; activities of daily living. **Alleviates symptoms:** nothing. **Numbness:** none. **Weakness:** none. **Oswestry score:** 32%.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. Due to the pain, she is unable to lift heavy weights, she is unable to walk greater than 1 mile, she is unable to sit greater than 60 minutes, she is unable to stand greater than 60 minutes and she is unable to travel on journeys greater than 2 hours. **Onset:** October 31, 2015. **Cause of symptoms:** MVA, rear impact. **Prior low back pain:** none. **Changes in this condition:** worse. *since* last re-examination on June 12, 2017. **Pain:** achy, dull, sharp, shooting, tingling; level: 5/10. **Pain is frequent.** **Pain radiates to:** left posterior thigh and leg. **Exacerbates symptoms:** driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. **Alleviates symptoms:** chiropractic care; massage. **Numbness:** none. **Weakness:** none. **Bowel or bladder incontinence:** No. **Recent infection or fever:** No. **Night sweats or pain:** No. **OSWESTRY Disability Index:** 32%. **The Keele STarT Back Screening Tool:** Low risk. **Recent medical treatment for this condition:** Massage therapy. **Changes in past medical history:** None.

Activity of Daily Living Form Bathing/Showering: no impairment; Bending forward/backward: moderate impairment; Brushing teeth: no impairment; Buttoning shirt: no impairment; Driving: mild impairment; Drying Hair: mild impairment; Household chores: mild impairment; Laundry: moderate impairment; Lifting less than 10 lbs: mild impairment; Lifting more than 10 lbs: moderate impairment; Kneeling: mild impairment; Making Meals: mild impairment; Prolonged Sitting more than 30 minutes: moderate impairment; Putting pants on: mild impairment; Putting shoes/socks on: mild impairment; Reaching above the shoulders: mild impairment; Restful night's sleep: no impairment; Seated to standing position: mild impairment; Sexual activity: mild impairment; Standing: mild impairment; Squatting: mild impairment; Taking out the trash: not performed; Tying shoes: mild impairment; Using lavatory: no impairment; Walking: no impairment.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain left lower neck; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. **Posture:** rounded shoulders. **Strength:** all upper extremity musculature (C5-T1) were WNL and graded 5/5. **Sensation:** all upper extremity sensory exams (C5-T1) were WNL to Pin prick. **Hypertonicity & Tenderness:** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Reflexes:** bilateral upper extremity reflexes (C5, C6, C7) 2+. **Orthopedic tests:** left lateral compression: Positive left lower neck pain; right lateral compression: Negative; maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness:** Thoracic paraspinal musculature Bilateral Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Encounter dated 08/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/13/2017

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with no pain; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Heel to toe walking:* WNL. *Gait pattern:* normal. *Strength:* all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. *Sensation:* all lower extremity sensory exams (L1-S1) were WNL to Pin prick. *Tenderness & Hypertonicity:* lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus. *Reflexes:* bilateral lower extremity reflexes (L4 and S1) 2+. *Orthopedic tests:* Patrick's Fabere: Positive left for lower back pain; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative; Minor's sign: Negative; Slump Test: Negative bilateral; Spinal Percussion L1-L5: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for lower back pain on a cough or sneeze. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-examination on June 12, 2017 her neck condition has regressed. Her active cervical flexion decreased from 50 to 40 degrees and left rotation decreased from 60 to 45 degrees. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL, improve active cervical ROM to WNL and to decrease the frequency and intensity of headaches. *Diagnosis:* M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last re-examination on June 12, 2017. She is now able to sit 30 minutes and travel 60 minutes longer with less pain. Further treatment is medically necessary to help improve her active lumbar ROM to WNL and improve her ability to sit, stand, bend, perform household chores and lift with less pain. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Encounter dated 08/28/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/13/2017

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x every 2 weeks for 8 weeks; Re-examination for 8 weeks. *Visit number* 1 of 4. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit and stand longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 08/30/2017 at 1:15pm

Abbreviations:

ADL: activities of daily living
MVA: motor vehicle accident
ROM: range of motion
WNL: within normal limits

卷之三

MEDICARE AND TERCARE PAYMENTS. A practice is permitted to bill Medicare for services provided to a patient who is also receiving Tercare payments. The physician must bill Medicare first and then bill Tercare separately. The physician may bill Medicare and Tercare simultaneously if the physician has obtained a waiver from the state Medicaid program. See 42 CFR 431.202.

$\hat{S}_{\text{max}} = 0.48 \pm 0.01$ J/K²

The probability mass function of the total reward until t is given by $P_{\pi}(S_t = s, R_t = r | S_0 = s_0, \pi)$.

In addition to the above-mentioned potential sources of error, there are other factors which may contribute to the observed differences between the two data sets. The first is the difference in the time period over which the data were collected. The second is the difference in the sampling methods used to obtain the data. The third is the difference in the way the data were analyzed.

$P_{\text{c}} = \text{TRU/RE}$ where TRU is the total number of true events and RE is the total number of reconstructed events.

With Part B Medicaid benefits, many low-income individuals are eligible for a range of services, including home and community-based services.

807 TCE Any one, whose remuneration or funds exceed the maximum limit of Rs. 10,000/- per annum, shall be liable to pay a sum equivalent to four times his/her remuneration.

NO FEE TO PATIENT ABOVE THE COLLEGE FOR MEDICAL AND DENTAL STUDENTS IN THE STATE OF NEW YORK. MEDICAL SERVICES ARE PROVIDED FREE.

TPM information (e.g., status examples, clear under-hood arguments, etc.) will be given to members over email, but full details of discussions and responses can be found in these minutes and in emails that would come in the file.

The information may then be given to other providers of care, such as a physician, hospital, or dental office, or to Federal agencies, or to the Office of Personnel Management that may utilize it. Information is usually given orally or in writing, and an off-the-record note can be taken for these programs. For example, many programs do not discuss information about a hospital stay because it is believed that the information is best kept in a system of records.

FOR MEDICARE CLAIMING: See the separate instruction booklet (or, if 70-0911, when Case 17-C-1000, James Bond), published in the Federal Register, Vol. 65 No. 197, page 37549, West, Sept. 12, 1990, as so titled, and amended.

¹⁰ See TONKIN, CLAUSES PÉNALISATRICES, QUOTATION IS-103. As mentioned, Article 4 of the Act, as amended by Law No. 103, provides that the Act "is intended to combat serious organized crime, and to combat serious forms of illegal conduct of individuals and

the distribution of the scores of the eight-point cumulative index of life.

DISCLAIMERS: Patients are responsible for paying the bill to their insurance company and for payment of claim costs. If services are provided by a third party, payment is the responsibility of the third party.

It is mandatory that you tell us if you know that another entity - especially the person before him (§ 2, dm. 110B) of the fiscal bottom line (§ 31 USt, 3801-3812 provide penalties for withheld taxes without a reason).

Some off-cut fibre, section B-3, 100-200 nm thick was used for electron microscopy (Fig. 1c). The sections were stained with uranyl acetate and lead citrate.

I therefore agree to keep such records as are necessary to claim fully the tax credit of \$1,000 per year which I am entitled under the Statute Title XIII plan and to file a claim for such amount as claimed for providing such services as have been rendered on Dec. 31 of the taxable year 1990.

I further agree to pay up, as payment in full, the amount unpaid by the C.I. and paid jointly, as well as interest on payment under this Agreement, with the exception of refundable deductible insurance, no payment or similar cash-flowing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above are
safe, effective, and in accordance to the needs of the patient and were generally furnished by
me or my associates.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and/or diversion of the grant will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of such shall be made, are illegal and subject to legal action, including forfeiture.

According to the Drug-Free Workplace Act of 1995, no person in a management position shall be responsible for causing a willful violation of this provision. DRAFT OMB-0938-1197 EOBM 1500 (02-12)

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if it is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "insured", i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal Anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, and 2) they must be an integral, although incidental part of a covered physician service; 3) they must be of lends commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1882, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.5(a) (8), and 44 USC 3101-41 CFR 101 et seq and 10 USC 1079 and 1086; 5 USC 801 et seq; and 30 USC 801 et seq, 30 USC 813; E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carmer Medicare Claims Record," published in the Federal Register, Vol. 65 No. 177, page 37549, Wed. Sept. 12, 1990, or as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 65 No. 40, Wed Feb. 28, 1990, See ESA-6, ESA-6, ESA-12, ESA-15, ESA-30, or as updated and republished

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S) To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recoupment claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988," permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under this program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1187. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-08-05, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Procedure Note

Date: 09/08/2017

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 37 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- Migraines, trigger points Shoulder and neck pain

History of Present Illness

General:

The patient has migraine headaches, cervicalgia and associated trigger points. The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine and bupivacaine. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. Patient tolerated the procedure.

Patient has had trigger point injections with good results in the past. She tried to go 2 months between injections, and unfortunately has seen an increase in neck pain. She is considering decreasing the amount of massage therapy in her current regimen, she feels quite overloaded with appointments at the moment. She states the occipital block 2 weeks ago was quite helpful for her headache. She is also currently titrating onto Topamax.

Current Medications

- Taking nortriptyline 10 mg capsule 2 cap(s) orally QHS
- Taking Medrol Dosepak 4mg tablet as directed orally on package
- Taking Topamax 25 mg tablet 1 tab(s) orally Take 1 QHS x 1 week; Increase to 1 tab in AM & 1 tab in PM x 1 week; Increase to 2 tabs AM & 2 tabs PM x 1 week
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 iu/ml units capsule 1 cap(s) orally once a day
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Family History

Father: alive, Stroke
 Mother: alive, Asthma
 Siblings: alive
 1 brother(s) - healthy.

Social HistoryTobacco Use:

Smoking: Patient is a. non smoker.

Fall History:

Have you fallen: No . Do you feel unsteady when: No .

Alcohol use:

Alcohol Consumption: Patient does not drink alcohol

Illicit Drugs:

Using illicit drugs: Denies.

Resides with:

Spouse: Husband. Children: Yes, x3. Self: Yes.

Working:

Employed. Stay at home mom.

Marital Status:

Married: Yes.

Driving:

Does Patient Drive: Yes.

Exercise:

Daily: Yes, Walks

Caffeine:

Other: Patient does not consume caffeine.

Examination**Neurological**

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions

No notable rash or lesions visualized at the area of injection sites

Assessments

1. Myofascial pain - M79.1 (Primary)

Continue all previously prescribed medicines at the current doses

The patient is to continue with the current treatment plan.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly

Dr. McVige is the supervising physician on site.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Procedures**Injections:**

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 10 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living. Patient counseled on the importance of healthy lifestyle. 09/08/2017.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 09/08/2017.

Exercise: Patient counseled on importance of moderate physical activity daily. 09/08/2017.

Follow Up

4 Weeks

1960, the average age of the population was 29.4 years, and the median age was 25.0 years. The median age of the population in 1960 was 25.0 years, and the median age of the population in 1960 was 25.0 years.

$$d\Gamma/dt = \left(\frac{g^2 m^2}{16\pi^2} + \mu_0^2 \right) \left[1 + \frac{1}{2} \left(\frac{m^2}{\mu_0^2} - 1 \right) \right] \frac{\partial^2 f}{\partial t^2} - \mu_0^2 \partial_t^2 f(t) = \frac{1}{2} \frac{\partial^2 f}{\partial t^2} - \frac{1}{2} \frac{\partial^2 f}{\partial t^2} = 0$$

the first time in the history of the world, the people of the United States have been compelled to go to war to defend their country against a foreign power.

The PEGMA film thickness was determined by the weight loss method. The film thickness was calculated as follows:

DOI: <https://doi.org/10.1007/s00339-018-1000-1> © Springer Nature Switzerland AG 2018

Wing, 2000) and the corresponding Δ values are given in Table 1.

For more information about the study, contact the study coordinator at 1-800-458-6232 or e-mail at studycoordinator@nccih.nih.gov.

The value of a parameter in the model is determined by the value of the parameter in the real system. The value of the parameter in the real system is determined by the value of the parameter in the model. This is a recursive process.

在1995年，中国GDP增长率为12%，而美国仅为2.7%。同年，中国出口总额为1580亿美元，而美国仅为558亿美元。

For a detailed description of the methods used to estimate the parameters of the model, see the technical report by Gómez et al. (2010).

PROBLEMS RELATED TO PROBLEMS IN THE FIELD OF POLYMER SCIENCE ARE AS FOLLOWS: 1) THE PROBLEMS OF POLYMERIZATION AND POLYMER PHYSICS; 2) THE PROBLEMS OF POLYMER CHEMISTRY; 3) THE PROBLEMS OF POLYMER TECHNOLOGY.

1000 m², 100 kg, and 1000 kg, respectively. The first two values are the same as those used by Bazzaz et al. (1986) and the third value is the same as that used by Bazzaz et al. (1986) and Bazzaz & Reich (1993). The latter two values were obtained from the literature. The values of α_{max} and β_{max} were set to 0.001 and 0.0001, respectively.

从以上分析可知， \hat{y}_t 是由 $y_{t-1}, y_{t-2}, \dots, y_{t-n+1}$ 和 $x_{t-1}, x_{t-2}, \dots, x_{t-n+1}$ 通过线性组合得到的。因此， \hat{y}_t 可以表示为一个包含 y 和 x 的向量的线性组合。

Your diagnostic test or treatment: 100-200-3-1 - Diagnostic Test: 100-200-3-1 - Treatment: 100-200-3-1 - Other: 100-200-3-1

Finally, after 10 days of continuous C. elegans feeding, the *gpa-4* mutant was able to move at a rate similar to the wild-type, indicating that the *gpa-4* mutation does not affect the ability of *C. elegans* to move.

Multiple experiments have been carried out to determine the effect of different parameters on the performance of the system.

10. NATURE OF PAYMENT (ORIGINATOR): Enter the name of the institution or organization that made the payment to you or your employer under my personal direction.

According to the *Parliamentary Information Bureau*, a government committee on health care reform has proposed a bill that would expand the number of people covered by Medicaid.

Tuesday September 12, 2017 Provider: Peter Guzinski DC

Electronically signed by Peter Guzinski DC on 09/12/2017 at 4:50pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. Follow up with Dr. Siddique for pain management is in November 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, tingling, shooting; level: 5/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 3-4 x a week. She states that the duration varies, but they no longer last all day. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting; level: 5/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling; level: 5/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain left lower neck; extension: WNL 60/60 with no pain; left

Encounter dated 09/12/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/29/2017

rotation: 70/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders.

Hypertonicity & Tenderness Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: WNL 60/60 with no pain; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal.

Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus.

Orthopedic tests: Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Cervical assessment:* unchanged. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: unchanged. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Encounter dated 09/12/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 09/29/2017

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.

Treatment schedule: 1x every 2 weeks for 6 weeks; Re-examination for 6 weeks. *Visit number* 2 of 4.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit and stand longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to September 30, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 09/12/2017 at 4:50pm

NOTICE: Any person who knowingly files a return that is due, or has been filed, before the final due date of the return, in consequence of mailing such return may be guilty of a felony and subject to imprisonment.

1. 1998-02-20 <http://www.123.com/123.htm>, 2001-01-20, 2001-01-20, 2001-01-20.

1.EFEDP AND TANF PAYMENTS: A parent requesting a TANF payment or an EFEDP payment must provide the information previously in Blocks 1 through 12 to the agency in charge of the program. This includes the parent's name and address, the amount and when the payment is to be made, and the reason for the request. The agency will review the Medicaid application and either approve or deny the request. If approved, the agency will issue a TANF or EFEDP payment. If denied, the agency will issue a denial letter. If denied, the parent may appeal the decision by following the procedures outlined in the Uniform Services Information on Medicaid, Section 10, Article 10, Section 10, Part 1, Article 10, Section 10.

ENERGY SUPPLY AND DEMAND IN THE UNITED STATES: A COMPARISON OF THE 1970S AND 1980S

In calculating cash flow for partners, from which the firm's cash flow statement is derived, we must distinguish between cash inflows resulting from sales of products or services, and program invocations, which are available for investment in the firm's own equipment and payment of debts. For this calculation we must take into account all program activities for investment purposes, as well as those that are not directly related to the firm's own equipment. The remaining cash available for investment is the difference between the amount of money received from sales of products and services and the amount spent on equipment purchases.

For TRICARE claims, I further certify that I (or my employer) is the subscriber or carrier, and that I am the duly appointed Uniformed Services member or an employee of the United States Government, civilian or military, and that I (B100-Ba88), the Deck Officer claim, I find it necessary that the services performed were for a Blue Line-related deployment.

No Part B Modules benefits may be paid unless this form is received by the carrier by the due date and requirements of GHI 10489.

NOTICE: Any one who may present or fail to present information to receive payment of Long Term Care Insurance premiums by the Insurer may upon conviction be subject to fine and imprisonment under applicable Provincial laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF PROSTATE, CERVICAL, PELVIC, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We and others did by GATC, HMGME and OWCW to study the role of the nucleic acid in the regulation of the lacZ gene, trpR, CAP, and Pribnow sequences. Authors to whom all correspondence should be addressed are as follows: B. B. B. 1000; M. C. G. 1000; G. G. 1000; and T. S. 1000.

The information you provide to complete forms such as the *Request for an Extended Right-to-Work* and to determine your eligibility to continue to work at the service center or supplier you're calling off.

The information may be relevant to a provider's decision-making process or to a consumer's decision to seek treatment. It also requires that the information be relevant to the consumer's decision to seek treatment. This is equivalent to the concept of "information about the benefit" and is the second element.

FOR MEDICINE OF ANGUS See also *Angus, Robert*. *Angus, Robert*, 1670-1743, English physician, 1670-1743, and *Angus, Robert*, 1670-1743, his son, 1698-1752, both physicians.

FOR OFFICE USE ONLY: Indicate if Licensee is a manufacturer or distributor of Class II, III and/or IV Devices as defined above. If applicable, check all that apply. Note: If 'No' is checked, then 'Yes' is implied.

FOR THICCAR CLASS: F1M1000 PURA'S BSC. To receive a clearing for one's file, one provided by common carrier, and to make payment upon a statement of eligibility and deformation of the name, signature, address, or identification number.

NOTIFICATION UPDATES: Information from claims and related documents may be used by the U.S. Department of Health and Human Services, under the Health Information Technology for Economic and Clinical Health Act ([HIT Act](#)), to the U.S. Department of Transportation, or to the Federal Aviation Administration, in connection with the International Revenue Service, postal collection agencies, and tax user reporting systems, to the Internal Revenue Service, and to Oregon state offices in advance to inquire about the employment history of the person to whom a return was sent.

DISCLOSURE: Voluntary, however, factors, to provide information will assist in prompt or more timely arrival of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any such information, except as noted above, could delay payment of the claim. Failure to provide medical information, except as noted above, could result in denial of the claim.

It is mandatory that you tell us if you know that another party is reaping dividends from your location. Section 1102 of the Small Business Act and 16 USC 1801-1812 provide penalties for withholding this information.

You should be aware that it is best to have your own Mathematica notebook for each of these programs, as well as the ones corresponding to the other chapters, in order to experiment with them.

广联达BIM平台化解决方案(CIM平台)

Hourly wages in the job market have been rising in decline until the mid-1970s, "exceptional". Since the mid-1970s, they fall 20% plus, and decline further when the economy grows, as shown by the long-term trend in the figure below. The rate of growth of real wages has fallen sharply.

However, specific payment will not be arranged until the day before the event, or at least one week before the event, so as to keep the number of students who have paid confirmation, up to payment or understand their demands.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): Ken Borrelli, M.D., 2000 E. Mississippi St. #100, Milwaukee, WI 53210-3100, physician who furnished services or furnished by me to my employee during my personal duration.

NOTICE: This is a legally binding document that creates a binding contract. It is intended to bind the parties to an individual contract, and that contract, statement or document, or commitment, shall supersede any oral understanding, understanding, or statement.

In addition to the general education requirements, students must also complete a minimum of 12 hours of approved electives. These electives may include courses such as art, music, drama, or physical education, as well as other academic subjects like psychology or sociology.

For H2O/HFO blends, it has been found that the higher the mole fraction of H2O, the lower the viscosity, indicating that the addition of water to the blend decreases the viscosity.

No Part II Model Law Statutes may be used unless at least one Part II or Part III is included as a qualified statute section, law, or regulation in Part II, Part III, or Part IV.

NOTICE: Any one who has failed or failed to respond to an initial or subsequent Commission's Request for Information may be subject to civil and criminal penalties under applicable Federal law.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF INFORMATION FOR THE AMERICAN SPANISH LANGUAGE SURVEY

We are authorized by CHS, TRICARE and OIG to collect information from you for administrative review in the administration, claims for TRICARE, TRICARE, TRICARE and Direct Line programs. A failure to collect information is an offense under 10 USC 8012, 1079, and 1074 or the Civil Recovery Act, section 104 of the CERCLA and may result in a fine up to USD 10,000.00 or imprisonment up to 5 years or both.

The information contained in this document is under license by the copyright holder. It is illegal to copy or distribute this document without the express permission of the copyright holder.

The information may also be given to other professionals who are involved in the treatment, such as the physician, and to other members of the treatment team. For example, if a physician is treating a patient with depression, it may be necessary to discuss information about the patient's history and current condition with the physician in order to provide the best care.

FOR MEDICARE CLAIMS: See the section entitled "Claims for Medicare Benefits," Chapter 10, Section 10, Chapter 10, Medicare, in Part 10, published in the Federal Register, Vol. 36 No. 177, page 37569, Wed Sept 16, 1992, or as amended and modified.

Rebuttal: USG's intervention from Israel and its local departments, at the beginning, the USG had no intention to be part of the fight against Hamas. However, after consistent with their "double track," they have been involved in the fight against Hamas since the beginning. The Internal Revenue Service, particularly, has been involved in this fight since the beginning. This is because the USG has been unable to implement most of the programs in its original budget. As a result, it has been forced to reallocate funds to other areas. In addition, the USG has been unable to implement a portion of its original budget due to lack of sufficient funds. In addition, the USG has been unable to implement a portion of its original budget due to lack of sufficient funds.

DISCLAIMER: In summary, however, failing to provide a statement will not result in a denial of coverage through a denial of claim. With the exception of specific disclaimers below, there are no presumptions under the policies for which a statement is required to satisfy information requests. Therefore, failure to provide a statement does not affect the insured's rights or the insurer's defenses if a claim is presented under a policy of liability insurance.

It is mandatory that you tell us a you know that another person incapable of paying for your treatment to you. Title 43 of the Texas Senate Article 31 USC 100-3812 provide provides for mandatory disclosure of information.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient stated that her neck has been O.K. Follow up with Dr. Siddique for pain management is in November 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving. *since last visit.* *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left posterior scapula, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 2 x a week. She states that the duration varies, but they no longer last all day. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with increased left shoulder blade pain. She stated that massage therapy has been really working the area to help relieve the pain. "I can't lift my arm up very high and lay on the left side due to the pain". *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* worse. *since last visit.* *Pain:* achy, dull, sharp, shooting; level: 5/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the continued chief complaint of lower back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improved. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling; level: 4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Encounter dated 09/25/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/11/2017

Cervical: Range of motion: flexion: 40/50 with pain left lower neck; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. Posture: rounded shoulders. Hypertonicity & Tenderness Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild. Trigger points: left levator scapulae, bilateral upper trapezius. Orthopedic tests: maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative. X-ray findings: Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. Spinal subluxation level(s): C5, C6, left first rib. Subluxations detected by: motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Left Moderate; Thoracic paraspinal musculature Right Mild to Moderate. Trigger points: bilateral rhomboids. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: WNL 60/60 with no pain; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. Gait pattern: normal. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right mild. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Cervical assessment:** improving. VAS score improved from a 5 to 3 out of 10 and her headache frequency decreased from 3 to 4 to 2 a week. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. **Thoracic assessment:** worse, more difficult to lay on her left side.

Lumbar assessment: improving. VAs score improved from a 5 to 4 out of 10. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying

Encounter dated 09/25/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/11/2017

annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x every 2 weeks for 5 weeks; Re-examination for 5 weeks. *Visit number* 3 of 4. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral cervical electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; left lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit and stand longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to October 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

Subjective

Cervical: Patient stated that her neck pain remains the same. Follow up with Dr. Siddique for pain management is in November 2017. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. since last visit. *Pain:* achy, dull, sharp, tingling, shooting; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left posterior scapula, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* Patient stated that she states that she still experiences headaches 2 x a week. She states that the duration varies, but they no longer last all day. Nothing alleviates the pain. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. since last visit. *Pain:* achy, dull, sharp, shooting; level: 5/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* nothing. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today with the chief complaint of increased lower back pain. She stated that the pain started Saturday gradually during the day. Due to the pain, getting dressed and sleeping have been difficult. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* worse. since Saturday. *Pain:* achy, dull, sharp, shooting, tingling; level: 8/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg, right posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: 40/50 with pain left lower neck; extension: WNL 60/60 with no pain; left rotation: 70/80 with pain left lower neck ; right rotation: 60/80 with pain left lower neck ; left lateral bending: 35/45 with pain lower neck ; right lateral bending: 35/45 with pain lower neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness* Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Moderate; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Left Moderate; Thoracic paraspinal musculature Right Moderate to Severe. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 30/60 with pain lower back; extension: 5/25 with pain lower

Encounter dated 10/03/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/11/2017

back; left rotation: 25/30 with pain lower back; right rotation: 15/30 with pain lower back; left lateral bending: 10/25 with pain lower back; right lateral bending: 10/25 with pain lower back. *Gait pattern:* normal. *Tenderness & Hypertonicity* lumbar paraspinal left moderate; TFL / ITB left mild to moderate; lumbar paraspinal right moderate to severe; TFL / ITB right moderate to severe. *Tenderness on palpation:* L4: moderate to severe; L5: moderate to severe; left SI: moderate; right SI: severe. *Trigger points:* left gluteus maximus, right gluteus maximus. *Orthopedic tests:* Straight leg raise: Positive bilateral at 45 degrees for lower back pain; Bechterew: Positive right for right lower back pain. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Cervical assessment:* unchanged. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac.

Differential diagnosis: Thoracic disc herniation. *Thoracic assessment:* unchanged.

Lumbar assessment: worse, VAS score increased from a 4 to an 8 out of 10 and her active lumbar ROM is no more limited with increased pain especially with flexion and bilateral rotation and lateral flexion. In addition her bilateral SLR decreased from 60 to 45 degrees with increased lower back pain. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 2x/week for 2 weeks due to increased lower back pain; Re-examination for 2 weeks. *Visit number 4 of 4. Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (anterior); T9 extension restriction (anterior); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral thoracic

**Encounter dated 10/03/2017 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 10/11/2017**

paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; bilateral TFL / ITB soft tissue massage. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec. *Home care:* ice: lumbar 4x day for 15 to 20 minutes per application for 3 days. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit and stand longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to October 31, 2017 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

MULTIPLE CHOICE. Below are four multiple-choice questions. Each question has four possible answers. You must choose the best answer for each question. There is only one correct answer for each question. If you are not sure about an answer, guess. You will receive one point for each correct answer. You will receive zero points for each incorrect answer. You will receive no points for each unanswered question. You will receive one point for each correct answer. You will receive zero points for each incorrect answer. You will receive no points for each unanswered question.

DSST-ORIENE. Results of this study suggest that the power of the DSST-ORIENE test is higher than that of the DSST-ORIENE test.

NOTE: The following chart lists the frequency distribution of the number of days between the date of application and the date of issuance of the first certificate of title.

As a result of the Pugwash Conference, the first international conference on disarmament was held in 1955 at Geneva. The Geneva Conference, composed exclusively of their powers, was convened by the United States and the Soviet Union. It was attended by the United Kingdom, France, and Canada, as well as the Soviet Union and the United States.

For the first time, we have shown that the *in vitro* growth of *Candida albicans* biofilms is inhibited by the addition of *in vivo* active metabolites of the antifungal agent.

LIFECODE and TRICAPLE PAYMENT is a general programming language which can be interpreted by the BBS. It has two uses, one is to send and receive messages and the other is to store and retrieve information and data in the memory. In this paper, I will introduce the basic concepts of LIFECODE and how it can be used to implement various applications. I will also discuss the advantages and disadvantages of using LIFECODE over other languages.

The specific agreement could be arranged by the shareholders of the company. The shareholders of the company could agree to sell their shares to the new investors.

$\delta_{\text{eff}}(T)/\delta_{\text{eff}}(0) \approx 1 - 3\pi^2/16 \approx 0.75$ at $T = 1.5 T_c$ (see Fig. 1).

In our long class for meadow management, I highly value the importance of soil health, soil biology, and organic matter. This means: Management that preserves soil structure, soil organisms, soil stability and promotes carbon storage in the soil. This is the way to build healthy ecosystems, not to prepare soil for growing plants and to produce yields. In our class we made the connection between soil health and yield. Yield is a result of soil health, not the other way around. Yield is a result of soil health, not the other way around.

On the 1st of January, 1863, the Legislature of the Commonwealth of Massachusetts passed a law, entitled "An Act to regulate the sale of spirituous liquors," which law was approved by the Governor on the 10th of January, 1863, and became a law.

¹² See, e.g., *U.S. v. Gandy*, 415 U.S. 853, 863 (1974) ("[T]he right to counsel is a fundamental right which must be protected by the Due Process Clause of the Fourteenth Amendment.").

POEM: *Wieder auf dem Berg* (1914) by Paul Klee, 1914, oil on canvas, 100 x 120 cm, Kunstmuseum Basel, Switzerland.

Re-Evaluation
Date: 01/11/2018

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 37 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- NF- Requires Opinion
- Patient is here following up for migraines

History of Present Illness

General:

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle today in neurologic reevaluation regarding a motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a 37-year-old female with previous history of migraine headaches who initially presented to this office on 2/19/16 after a motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16. MRI L spine and C-spine 1/16 showed mild multilevel degenerative changes with disk extrusions seen at C4-C5 and C5-C6. She had an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 were normal aside from a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8.

Danielle has tried ibuprofen, Tylenol, Motrin, Lamictal, Nortriptyline, magnesium, Naproxen, Rizatriptan, and Topamax. Chiropractic care, massage therapy, vestibular therapy and physical therapy. Lamictal was not found to be helpful. Vestibular therapy and physical therapy have both proven helpful in symptom management, and she had since been discharged from both. Massage therapy and regular trigger point injections have been helpful with decreasing her cervical myofascial spasm.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal.

The patient has since been experiencing continued symptoms. She was referred to restart physical and vestibular therapies and was started on Topamax. She continued with chiropractic therapy twice per week. At her last reevaluation on 10/19/17, dosing of both Nortriptyline and Topamax was increased. Cambia was recommended as a rescue medication due to GI upset caused by other NSAIDs. She continued with regular trigger point injections and occipital nerve blocks.

The patient returns today with continued symptoms. She is still experiencing about 4 headache days per week. Migraines are occurring about 2-3 times per month. She unfortunately has not been able to start physical or vestibular therapy yet. She underwent her fourth lumbar facet injection with Dr. Siddiqui last

Injuries	

month. She states that he used a different technique, and she has unfortunately been experiencing numbness and weakness of her left lower extremity since this procedure. She states that imaging with MRI of lumbar spine is planned. She has continued with massage and chiropractic therapy. She did find Cambia effective as a rescue medication, however this unfortunately is not covered through her insurance. Rizatriptan provides only modest relief for migraineous headaches. She has been tolerating 150 mg of Topamax daily with no side effects. She continues with magnesium daily, and takes Norptriptyline intermittently for sleep.

Current Medications

- Taking Topamax 25 mg tablet 3 tab(s) orally BID
- Taking norptriptyline 10 mg capsule 2 cap(s) orally QHS
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Nasoprosin 500 mg tablet 1 tab(s) orally prn headache, up to BID
- Taking rizatriptan 10 mg tablet 1 tab(s) orally prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Cambia potassium 50 mg powder for reconstitution 50 mg orally PRN Headache. Okay to take again after 2 hours. MDD = 2, MWD = 3
- Medication List reviewed and reconciled with the patient

Review of Systems

Positive for headache, dizziness, weakness, numbness, unsteadiness, sleep problem, double vision, ringing in ears, vertigo, joint pain and stiffness, neck and lower back pain, muscle aches, easy bruising. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 120/78, HR 80, RR 16, Ht 83, WT 246.1, BMI 43.59, BSA 2.23.

Examination

General Examination:

General Appearance: Well-nourished, well-developed, in mild distress, participated with the exam. Well groomed. Eyes: Disc margins clear, no vessel abnormalities, no papilledema. Neck: Supple. Range of motion limited with lateral flexion. Trigger points palpated within cervical musculature bilaterally.

Cardiovascular: peripheral pulses within normal limits. Extremities: Full range of motion of extremities x4. No edema.

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. Speech: Speech content and production was normal. Memory: Memory for remote and recent events was intact. Fund of Knowledge: Appropriate for events and past history. Cognition was intact. Motor: 5/5 upper extremities bilaterally, 3/5 left lower extremity. Tone: Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. Reflexes: DTRs were +2 globally. Coordination: Test of coordination and fine motor skills were within normal limits. Gait and Station: Romberg positive.. Sensory: Decreased sensation left lower extremity.

Cranial Nerves:

Cranial Nerve II: Visual fields are full. Cranial Nerves III, IV, VI: Extraocular movements intact. PERRLA. Cranial Nerve V: Facial sensation and muscles of mastication were normal bilaterally. Cranial Nerve VII: Face was symmetric and strength was equal bilaterally. Cranial Nerve VIII: Hearing was intact to finger rub bilaterally. Cranial Nerves IX, X: Swallowing and palate elevation was within normal limits. Cranial Nerve XI: Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. Cranial Nerve XII: Tongue was midline.

Assessments

1. Posttraumatic headache - G44.309 (Primary)
2. Migraine without aura - G43.009
3. Vestibular dysfunction - H83.2X9
4. Myofascial pain - M79.1
5. Concussion, without loss of consciousness, sequela - S06.0X0S
6. Sleep difficulties - G47.9

7. Left-sided low back pain with left-sided sciatica, unspecified chronicity - M54.42

Danielle is a 37-year-old female who returns today for reevaluation regarding postconcussive symptoms. At this point, headaches have been her most bothersome and continuous symptom. Patient is having over 15 headache days per month. She has tried multiple preventative agents as listed above. At this point I do believe she would benefit very much from Botox. We will submit for this today. We will also increase her Topamax to 100 mg twice a day. Rather than Rizatriptan, we will have the patient try Sumatriptan as an alternative rescue medication for her migraines. Unfortunately, Cambia was not approved through her insurance. We will send Diclofenac tablets to see if this may provide some relief for her non-migrainous headaches. She will continue with massage therapy and chiropractic therapy. She does plan to continue following with Dr. Siddiqui's office regarding her low back and lower extremity issues. Hopefully, she will be able to attend physical and vestibular therapies again in the near future as these were beneficial for her as well. She will also continue with trigger point injections and occipital nerve blocks. As the patient does have a severe headache at today's appointment, we'll provide her with a Toradol injection in the office today. We will see her back in 2 weeks for trigger point injections, and in 3 months for reevaluation, sooner if needed. This dictation was created with Dragon voice recognition system. Although efforts were made to ensure accuracy, voice recognition errors may be present.

Dr. McVige is the supervising physician on site.

Thank you for allowing us to participate in the care of this patient. If there are any questions please feel free to call anytime.

Treatment**1. Posttraumatic headache**

Stop Topamax tablet, 25 mg, 3 tab(s), orally, BID

Continue magnesium oxide tablet, 250 mg, 1-2 tab(s), orally, once a day

Stop Naprosyn tablet, 500 mg, 1 tab(s), orally, prn headache, up to BID

Stop rizatriptan tablet, 10 mg, 1 tab(s), orally, prn migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3

Stop Cambia powder for reconstitution, potassium 50 mg, 50 mg, orally, PRN Headache. Okay to take again after 2 hours. MDD = 2; MWD = 3

Start topiramate tablet, 100 mg, 1 tab(s), orally, BID, 30 day(s), 60 Tablet, Refills 5

Start Imitrex tablet, 100 mg, 1 tab(s), orally, PRN Migraine; MDD = 2 MWD = 3, 30 days, 9, Refills 5

Start diclofenac tablet, potassium 50 mg, 1 tab(s), orally, prn headache, MDD=2, no more than 3 days per week, 30 day(s), 20, Refills 5

2. Migraine without aura

Notes: submit for Botox.

3. Sleep difficulties

Continue nortriptyline capsule, 10 mg, 2 cap(s), orally, QHS

Continue Melatonin tablet, 3 mg, 1 tab(s), orally, once (at bedtime)

Procedures**Toradol:**

Assessment: Received patient signed informed consent. Patient was in the sitting position. Sterile prep utilizing an alcohol swab was performed. A total of 60 mg Toradol was injected into the left deltoid, with a 27 gauge needle utilized. No complications occurred. Hemostasis was easily maintained. Post injection instructions given to patient. The patient was stable at discharge. Administered by Andrew Sargent, LPN.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle. 01/11/2018.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 01/11/2018.

Exercise: Patient counseled on importance of moderate physical activity daily. 01/11/2018.

¹ See T. B. Macaulay, *The Law of War and Peace* (London, 1899).

Figure 10. The effect of the number of hidden neurons on the performance of the neural network.

94.5% (67,755) of 100% of the 2011-12 PCP were met, according to the

Following the first few weeks of the study, the children were asked to draw a picture of their family. The drawings were collected and analyzed to determine the extent to which the children's drawings reflected the reality of their family situation. The results showed that the children's drawings were often inaccurate or incomplete, reflecting a lack of understanding or knowledge about their family members and their relationships.

In India, where the first recorded case was reported in December 2013, the number of diagnosed cases has increased to 1,000,000 as of April 2016.

²⁰ See also the discussion of the relationship between the two in the section on the "Cultural Turn" below.

Wetland areas, which are often flooded, are at risk of drowning as sea levels rise. This is particularly true for coastal wetlands, such as salt marshes, which are highly vulnerable to flooding and erosion.

100425 000000Z NOV 08 /FM/ 000000Z NOV 08 /TO/ 000000Z NOV 08 /SUBJ/ 000000Z NOV 08 /INFO/ 000000Z NOV 08 /REF/ 000000Z NOV 08 /END/ 000000Z NOV 08

Finally, we can use the fact that $\mathbf{P}^{\text{opt}}(\mathbf{y}, \mathbf{x})$ is a convex function of \mathbf{y} to show that $\mathbf{P}^{\text{opt}}(\mathbf{y}, \mathbf{x}) \leq \mathbf{P}^{\text{opt}}(\mathbf{y}', \mathbf{x})$ whenever $\mathbf{y}' \in \mathcal{Y}$ and $\mathbf{y}' \neq \mathbf{y}$.

The mean number of days between the first and last day of the month for each month is shown in Table 1. The mean number of days between the first and last day of the month for each month is shown in Table 1.

For example, the following C# code creates a new `File` object and writes "Hello World" to it:

For CNET's full coverage of CES 2013, check out our CES 2013 hub.

For more information about the study, please contact Dr. Barbara J. Ganzini at (415) 502-2519 or email her at barbara.ganzini@ucsf.edu.

During the US-Soviet summit meeting in Moscow in December 1987, Gorbachev and Bush agreed to eliminate all intermediate-range nuclear missiles from Europe. This was followed by the INF Treaty in 1988, which prohibited the production and deployment of intermediate-range nuclear missiles. The US and Soviet Union had agreed to eliminate all intermediate-range nuclear missiles from Europe by 1991.

¹⁰ See also, e.g., *W. H. Lewis, The Economics of Inflation* (London, 1972), pp. 11-12.

Fig. 10. The effect of the number of nodes.

Having said all of this, it is important to remember that the most important thing is to have fun and enjoy the process of learning and exploring new things.

При $\alpha = \beta = 0$ в дифференциальных уравнениях (1) и (2) коэффициенты a_1 и b_1 равны нулю, а коэффициенты a_2 и b_2 не равны нулю, что соответствует случаю, когда в исходном уравнении (1) коэффициент a_1 равен нулю.

According to the author, the main reason for the lack of interest in the study of the history of the Soviet Union is the absence of a clear historical perspective.

Re-Evaluation

Date: 01/11/2018

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 37 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- NF- Requires Opinion
- Patient is here following up for migraines

History of Present Illness

General:

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle today in neurologic reevaluation regarding a motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a 37-year-old female with previous history of migraine headaches who initially presented to this office on 2/19/16 after a motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16. MRI L spine and C-spine 1/5/16 showed mild multilevel degenerative changes with disc extrusions seen at C4-C5 and C5-C6. She had an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 were normal aside from a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8

Danielle has tried ibuprofen, Tylenol, Motrin, Lamictal, Nortriptyline, magnesium, Naproxen, Rizatriptan, and Topamax. Chiropractic care, massage therapy, vestibular therapy and physical therapy. Lamictal was not found to be helpful. Vestibular therapy and physical therapy have both proven helpful in symptom management, and she had since been discharged from both. Massage therapy and regular trigger point injections have been helpful with decreasing her cervical myofascial spasm.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal.

The patient has since been experiencing continued symptoms. She was referred to restart physical and vestibular therapies and was started on Topamax. She continued with chiropractic therapy twice per week. At her last reevaluation on 10/19/17, dosing of both Nortriptyline and Topamax was increased. Cambia was recommended as a rescue medication due to GI upset caused by other NSAIDs. She continued with regular trigger point injections and occipital nerve blocks.

The patient returns today with continued symptoms. She is still experiencing about 4 headache days per week. Migraines are occurring about 2-3 times per month. She unfortunately has not been able to start physical or vestibular therapy yet. She underwent her fourth lumbar facet injection with Dr. Siddiqui last

month. She states that he used a different technique, and she has unfortunately been experiencing numbness and weakness of her left lower extremity since this procedure. She states that imaging with MRI of lumbar spine is planned. She has continued with massage and chiropractic therapy. She did find Cambia effective as a rescue medication, however this unfortunately is not covered through her insurance. RizatRIPTAN provides only modest relief for migraineous headaches. She has been tolerating 150 mg of Topamax daily with no side effects. She continues with magnesium daily, and takes Nortriptyline intermittently for sleep.

Current Medications

- Taking Topamax 25 mg tablet 3 tab(s) orally BID
- Taking nortriptyline 10 mg capsule 2 cap(s) orally QHS
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking Naprosyn 500 mg tablet 1 tab(s) orally pm headache, up to BID
- Taking nzafiptan 10 mg tablet 1 tab(s) orally pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 intl units capsule 1 cap(s) orally once a day
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Taking Cambia potassium 50 mg powder for reconstitution 50 mg orally PRN Headache. Okay to take again after 2 hours. MDD = 2; MWD = 3
- Medication List reviewed and reconciled with the patient

Review of Systems

Positive for headache, dizziness, weakness, numbness, unsteadiness, sleep problem, double vision, ringing in ears, vertigo, joint pain and stiffness, neck and lower back pain, muscle aches, easy bruising. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 120/78, HR 80, RR 16, Ht 63, Wt 246.1, BMI 43.59, BSA 2.23.

Examination

General Examination.

General Appearance: Well-nourished, well-developed, in mild distress, participated with the exam. Well groomed. Eyes: Disc margins clear, no vessel abnormalities, no papilledema. Neck: Supple. Range of motion limited with lateral flexion. Trigger points palpated within cervical musculature bilaterally.

Cardiovascular: peripheral pulses within normal limits. Extremities: Full range of motion of extremities x4. No edema

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. Speech: Speech content and production was normal. Memory: Memory for remote and recent events was intact. Fund of Knowledge: Appropriate for events and past history. Cognition was intact. Motor: 5/5 upper extremities bilaterally, 3/5 left lower extremity. Tone: Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. Reflexes: DTRs were +2 globally. Coordination: Test of coordination and fine motor skills were within normal limits. Gait and Station: Romberg positive.. Sensory: Decreased sensation left lower extremity

Crani Nerves:

Crani Nerve II: Visual fields are full. Crani Nerves III, IV, VI: Extraocular movements intact PERRLA. Crani Nerve V: Facial sensation and muscles of mastication were normal bilaterally. Crani Nerve VII: Face was symmetric and strength was equal bilaterally. Crani Nerve VIII: Hearing was intact to finger rub bilaterally. Crani Nerves IX, X: Swallowing and palate elevation was within normal limits. Crani Nerve XI: Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. Crani Nerve XII: Tongue was midline.

Assessments

- 1 Posttraumatic headache - G44.309 (Primary)
- 2 Migraine without aura - G43.009
- 3 Vestibular dysfunction - H83.2X9
- 4 Myofascial pain - M79.1
- 5 Concussion, without loss of consciousness, sequela - S06.0X0S
- 6 Sleep difficulties - G47.9

7. Left-sided low back pain with left-sided sciatica, unspecified chronicity - M54.42

Danielle is a 37-year-old female who returns today for reevaluation regarding postconcussive symptoms. At this point, headaches have been her most bothersome and continuous symptom. Patient is having over 15 headache days per month. She has tried multiple preventative agents as listed above. At this point I do believe she would benefit very much from Botox. We will submit for this today. We will also increase her Topamax to 100 mg twice a day. Rather than Rizatriptan, we will have the patient try Sumatriptan as an alternative rescue medication for her migraines. Unfortunately, Cambia was not approved through her insurance. We will send Diclofenac tablets to see if this may provide some relief for her non-migrainous headaches. She will continue with massage therapy and chiropractic therapy. She does plan to continue following with Dr. Siddiqui's office regarding her low back and lower extremity issues. Hopefully, she will be able to attend physical and vestibular therapies again in the near future as these were beneficial for her as well. She will also continue with trigger point injections and occipital nerve blocks. As the patient does have a severe headache at today's appointment, we'll provide her with a Toradol injection in the office today. We will see her back in 2 weeks for trigger point injections, and in 3 months for reevaluation, sooner if needed. This dictation was created with Dragon voice recognition system. Although efforts were made to ensure accuracy, voice recognition errors may be present.

Dr. McVige is the supervising physician on site.

Thank you for allowing us to participate in the care of this patient. If there are any questions please feel free to call anytime.

Treatment

1. Posttraumatic headache

Stop Topamax tablet, 25 mg, 3 tab(s), orally, BID

Continue magnesium oxide tablet, 250 mg, 1-2 tab(s), orally, once a day

Stop Naprosyn tablet, 500 mg, 1 tab(s), orally, pm headache, up to BID

Stop rizatriptan tablet, 10 mg, 1 tab(s), orally, pm migraine, okay to repeat dose in 2 hours, MDD = 2, MWD = 3

Stop Cambia powder for reconstitution, potassium 50 mg, 50 mg, orally, PRN Headache. Okay to take again after 2 hours. MDD = 2, MWD = 3.

Start topiramate tablet, 100 mg, 1 tab(s), orally, BID, 30 day(s), 60 Tablet, Refills 5

Start Imitrex tablet, 100 mg, 1 tab(s), orally, PRN Migraine; MDD = 2 MWD = 3, 30 days, 9, Refills 5

Start diclofenac tablet, potassium 50 mg, 1 tab(s), orally, pm headache, MDD= 2, no more than 3 days per week, 30 day(s), 20, Refills 5

2. Migraine without aura

Notes: submit for Botox.

3. Sleep difficulties

Continue nortriptyline capsule, 10 mg, 2 cap(s), orally, QHS

Continue Melatonin tablet, 3 mg, 1 tab(s), orally, once (at bedtime)

Procedures

Toradol

Assessment: Received patient signed informed consent. Patient was in the sitting position. Sterile prep utilizing an alcohol swab was performed. A total of 60 mg Toradol was injected into the left deltoid, with a 27 gauge needle utilized. No complications occurred. Hemostasis was easily maintained. Post injection instructions given to patient. The patient was stable at discharge. Administered by Andrew Sargent, LPN.

Preventive Medicine

COUNSELING: Healthy Living. Patient counseled on the importance of healthy lifestyle 01/11/2018

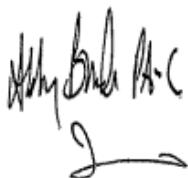

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 01/11/2018.

Exercise: Patient counseled on importance of moderate physical activity daily 01/11/2018.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a), if item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown in Medicare assigned or TRICARE participation cases; the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary; this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in 'Insured', i.e., items 4, 6, 7, 9 and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (OR MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment, including but not limited to the Federal anti-fraud statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form are medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license # or SSN) of the primary individual rendering each service is reported in the designated section. For services to be used incident to a physician's professional service, 7) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be integral, although incidental part of a covered physician's service; 8) they must be of kinds commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refers to 5 USC 8536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to ask you for information needed in the administration of the Medicare, TRICARE, FECA and Black Lung programs. Authority to collect information is in section 205(a), 1602, 1672 and 1674 of the Social Security Act as amended, 42 CFR 411.24(p) and 424.3(a)(8), and 44 USC 3101.41 CFR 101 et seq and 10 USC 1079 and 1085 5 USC B101 et seq, and 30 USC 901 et seq, 38 USC 613, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal programs that require other third parties pay to Federal program and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, 'Carrier Medicare Claims Record,' published in the Federal Register, Vol. 55 No. 177, page 37349, Wed. Sept. 11, 1990, or as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, 'Republication of Notice of Systems of Records,' Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-39, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S) To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

DISCLOSURE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompence claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURE PURPOSES: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1129B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-603, the 'Computer Matching and Privacy Protection Act of 1988', permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of the claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-26, Baltimore, Maryland 21244-1830. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE. Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS. A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-lit, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 8 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE preferred provider cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE local intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE local intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured": i.e., items 1a, 4, 6, 7, 8, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal Anti-Kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license # or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician's service, 3) they must be of kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 434.32).

NOTICE. Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 2051(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 42 U.S.C. (b), and 44 USC 3101, 41 CFR 101 et seq and 10 USC 1079 and 1088, 5 USC 8101 et seq and 30 USC 801 et seq, 38 USC 613, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, comers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice matching system No 09-70-0501, titled, "Carmer Medicare Claims Record," published in the Federal Register, Vol 55 No 177, page 37540, Wed Sept. 1990, or as updated and republished.

FOR OWCP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol 55 No 40, Wed Feb 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S). To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompence claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLAIMERS: Voluntary, however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1126B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE. This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claim, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving the form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05 Baltimore, Maryland 21244-1850. DOB: 8/29/1980

ID: RAM1965183

DOS: 2/2/2018 1:46:00 PM

MRI LUMBAR SPINE W/O CONTRAST 20MIN**REASON FOR STUDY AND CLINICAL INFORMATION:** Back pain.**COMPARISON:** 1/4/2016.**IMAGING SEQUENCES:** Unenhanced multiplanar 3-T MR Imaging of the lumbar spine is performed.**FINDINGS:** The lumbar spine is imaged from T11-12 to the L5-S1 level. L5-S1 is the last labeled level for the purpose of the study.

The height of the lumbar vertebral bodies is well-maintained. A hemangioma is seen within the T12 and L4 vertebral body.

The conus terminates at the level of the T12 vertebral body and within limits of the study, no suspicious signal is seen in the distal conus.

At T12-L1 and L1-2, the discs are well-hydrated. The canal and neural foramina are patent.

At L2-3, the disc is well-hydrated. The canal and neural foramina are patent.

At L3-4, note is made of severe disc space narrowing with endplate spurring and there is an annular bulge that does flatten the thecal sac. These changes result in mild canal narrowing. The neural foramina are patent. This is unchanged from the prior study.

At L4-5, there is disc space narrowing with facet arthropathy. There is a broad-based annular bulge that flattens the thecal sac resulting in overall mild canal stenosis similar to the prior study. Mild recess narrowing is seen. The far neural foramina maintain their caliber.

At L5-S1, there is disc space narrowing with a central broad-based disc protrusion and increased epidural fat is noted. Mild bilateral neural foraminal narrowing is seen and centrally there is mild canal stenosis. This is unchanged from the prior study.

IMPRESSION:

1. AT L3-4 THERE IS DISC SPACE NARROWING WITH ENDPLATE SPURRING AND DISC DESICCATION WITH CENTRAL DISC EXTRUSION CAUSING MILD CANAL STENOSIS SIMILAR TO THE PRIOR STUDY.
2. AT L4-5 A CENTRAL BROAD-BASED DISC PROTRUSION WITH ANNULAR TEAR IS SEEN TO CAUSE MILD CANAL STENOSIS. FACET ARTHROPATHY SEEN. THESE CHANGES RESULT IN MILD BILATERAL RECESS NARROWING. THE NEURAL FORAMINA ARE PATENT.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. She stated that she has a follow up at DENT on January 11, 2018. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->4/10. *Pain is constant.* *Pain radiates to:* left shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* She states that her headaches remain the same. She states that the duration varies, but they no longer last all day. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches as well. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting. *Range:* 3->4/10. *Pain is constant.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating "that I feel a little better. I can move my left big toe better." Patient still waiting for her lumbar MRI to be approved. Follow up with Dr. Siddique is January 31, 2018. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Encounter dated 01/15/2018 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 02/13/2018

Cervical: Range of motion: flexion: WNL 50/50 with no pain; extension: WNL 60/60 with pain lower neck; left rotation: WNL 80/80 with pain left lower neck ; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain; right lateral bending: WNL 45/45 with no pain. Posture: rounded shoulders.

Hypertonicity & Tenderness Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild to Moderate. Trigger points: left levator scapulae, bilateral upper trapezius. Orthopedic tests: left lateral compression: Positive left lower neck pain; right lateral compression: Negative; maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. X-ray findings: Chest and cervical spine x-rays were performed at Immediate Care on November 1, 2015. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. Spinal subluxation level(s): C5, C6, left occiput, left first rib. Subluxations detected by: motion and static palpation.

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Moderate. Trigger points: bilateral rhomboids. Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.

Lumbar/Sacral/Pelvis: Range of motion: flexion: 40/60 with pain lower back; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. Gait pattern: normal. Strength: left extensor hallucis longus: 5/5; right extensor hallucis longus: 5/5; left tibialis anterior: 5/5; right tibialis anterior: 5/5; bilateral gluteus maximus: 4/5. Tenderness & Hypertonicity lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild. Tenderness on palpation: left SI: moderate. Trigger points: left gluteus maximus. Orthopedic tests: Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by: motion and static palpation.

Assessment

Cervical assessment: Mrs. Harwell's condition has remained similar to her last visit. Diagnosis: M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). Prognosis: Guarded. Post-treatment analysis: patient tolerated treatment without incident. Set backs: Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. CPT code(s): 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained relatively unchanged since her last visit. Differential diagnosis: Thoracic disc herniation. Post-treatment analysis: patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last visit. Her VAS score

Encounter dated 01/15/2018 for Danielle Harwell #3438

DOB:08/29/1980 Today's date: 02/13/2018

improved from a 5 to 6 to 4 out of 10. In addition, Bechterew's Test was negative today and her left tibialis anterior and extensor hallucis longus were stronger and graded 5/5 from a 4/5. Furthermore, her left SLR improved from 45 to 60 degrees and without lower back or leg pain today. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Visit# 4 of 8 planned treatments.* *Treatment schedule:* 2x/week for 2 weeks; Re-examination for 2 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (no treatment rendered); C6 left lateral flexion restriction (no treatment rendered); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (diversified prone); Occiput left posterior (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy; left lumbar ultrasound, 1.5w/cm² 1 MHz 100% (8 minutes). *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to January 31, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. She stated that her left shoulder pain has been a little better. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->4/10. *Pain is constant.* *Pain radiates to:* left shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* She states that her headaches remain the same. She states that the duration varies, but they no longer last all day. Patient stated that she gets intermittent dizziness with the headaches. She states that does experience an irritation to bright lights with the headaches as well. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting. *Range:* 3->4/10. *Pain is constant.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that she continues to feel better especially with her left leg pain. "My left leg is slowly coming back." Patient still waiting for approval of her lumbar MRI. Follow up with Dr. Siddique is January 31, 2018. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 4/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Assessment

Cervical assessment: Mrs. Harwell's condition has remained similar to her last visit. *Diagnosis:* M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. *CPT code(s):* 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained relatively unchanged since her last visit. *Differential diagnosis:* Thoracic disc herniation. *Post-treatment analysis:* patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back continues to improve. Her left tibialis anterior and left extensor hallucis longus are remaining strong and graded 5/5. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with

Encounter dated 01/18/2018 for Danielle Harwell #3438

DOB:08/29/1980 Today's date: 02/13/2018

central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches.

Visit# 5 of 8 planned treatments. Treatment schedule: 2x/week for 2 weeks; Re-examination for 2 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (no treatment rendered); C6 left lateral flexion restriction (no treatment rendered); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (diversified prone); Occiput left posterior (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy; left lumbar ultrasound, 1.5w/cm² 1 MHz 100% (8 minutes). *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to January 31, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->4/10. *Pain is constant.* *Pain radiates to:* left shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* She states that she is still experiencing 1 to 2 headaches a week. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting. *Range:* 3->4/10. *Pain is constant.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back remains sore. She stated that she went to squat yesterday and felt like her lower back locked up which made it difficult to stand upright. Patient still waiting for approval of her lumbar MRI. Follow up with Dr. Siddique is January 31, 2018. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 4->5/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with pain lower neck; left rotation: WNL 80/80 with pain left lower neck ; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain; right lateral bending: WNL 45/45 with no pain. *Posture:* rounded shoulders.

Hypertonicity & Tenderness Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild to Moderate. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* left lateral compression: Positive left lower neck pain; right lateral compression: Negative; maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. *X-ray findings:* Chest and cervical spine x-rays were performed at Immediate Care on November 1, 2015. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left occiput, left first rib. *Subluxations detected by:* motion and static palpation.

Encounter dated 01/23/2018 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 02/13/2018

Thoracic: Hypertonicity & Tenderness Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by motion and static palpation.*

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 45/60 with pain lower back; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Strength:* left extensor hallucis longus: 5/5; right extensor hallucis longus: 5/5; left tibialis anterior: 5/5; right tibialis anterior: 5/5; bilateral gluteus maximus: 4/5. *Tenderness & Hypertonicity:* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Mrs. Harwell's condition has remained similar to her last visit. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained relatively unchanged since her last visit. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has remained similar to her last visit. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. **Visit#** 6 of 8 planned treatments. **Treatment schedule:** 2x/week for 1 week; Re-examination for 1 week.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3->4/10. *Pain is constant.* *Pain radiates to:* left shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* She states that she is still experiencing 1 to 2 headaches a week. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting. *Range:* 3->4/10. *Pain is constant.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back remains sore. Patient still waiting for approval of her lumbar MRI. Follow up with Dr. Siddique is January 31, 2018. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 4->5/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with pain lower neck; left rotation: WNL 80/80 with pain left lower neck ; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain; right lateral bending: WNL 45/45 with no pain. *Posture:* rounded shoulders.

Encounter dated 01/25/2018 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 02/13/2018

Hypertonicity & Tenderness Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild to Moderate. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** left lateral compression: Positive left lower neck pain; right lateral compression: Negative; maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. **X-ray findings:** Chest and cervical spine x-rays were performed at Immediate Care on November 1, 2015. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6, left occiput, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Moderate. **Trigger points:** bilateral rhomboids. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: 50/60 with pain lower back; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Strength:** left extensor hallucis longus: 5/5; right extensor hallucis longus: 5/5; left tibialis anterior: 5/5; right tibialis anterior: 5/5; left gluteus maximus: 5/5; right gluteus maximus: 5/5. **Tenderness & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild. **Tenderness on palpation:** left SI: moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Cervical assessment: Mrs. Harwell's condition has remained similar to her last visit. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained relatively unchanged since her last visit. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last visit. Her bilateral gluteus maximus were stronger and graded 5/5. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with

Encounter dated 01/25/2018 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/13/2018

facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Visit# 7 of 8 planned treatments.* *Treatment schedule:* 2x/week for 1 week; Re-examination for 1 week. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (no treatment rendered); C6 left lateral flexion restriction (no treatment rendered); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization); Occiput left posterior (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy; left lumbar ultrasound, 1.5w/cm² 1 MHz 100% (8 minutes). *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms; Stressed the importance of performing home exercises to help with pain and improved ROM. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to January 31, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 3>4/10. *Pain is constant.* *Pain radiates to:* left shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* She states that she is still experiencing 1 to 2 headaches a week. *Recent medical treatment for this condition:* None. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting. *Range:* 3>4/10. *Pain is constant.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back remains sore. Patient saw Dr. Siddique yesterday and a new MRI has been ordered and will be performed tomorrow at Buffalo MRI. "Yesterday I was in so much ain probably a 7, but today I am back down to a 5 or 6". *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling, numb. *Range:* 5>6/10. *Pain is constant.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Pain management evaluation. *Changes in past medical history:* None.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with no pain; extension: WNL 60/60 with pain lower neck; left rotation: WNL 80/80 with pain left lower neck ; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain; right lateral bending: WNL 45/45 with no pain. *Posture:* rounded shoulders. **Hypertonicity & Tenderness** Sub-occipital musculature Left Moderate; cervical paraspinal musculature Left Moderate; scalene Left Moderate; sternocleidomastoid Left Moderate; pectoralis minor Left Mild to Moderate; cervical paraspinal musculature Right Mild to Moderate. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* left lateral compression: Positive left lower neck pain; right lateral compression: Negative; maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. **X-ray findings:** Chest and cervical spine x-rays were performed at Immediate Care on November 1,

Encounter dated 02/01/2018 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 02/13/2018

2015. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s): C5, C6, left occiput, left first rib. Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s): T2, T3, T6, T7, T8, T9. Subluxations detected by motion and static palpation.*

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 50/60 with pain lower back; extension: 5/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. *Gait pattern:* normal. *Strength:* left extensor hallucis longus: 4/5; right extensor hallucis longus: 5/5; left tibialis anterior: 5/5; right tibialis anterior: 5/5; left hamstring: 4/5; right hamstring: 5/5. *Tenderness & Hypertonicity* lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild. *Tenderness on palpation:* left SI: moderate. *Trigger points:* left gluteus maximus. *Orthopedic tests:* Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. *Spinal subluxation level(s): L4, L5, Left SI. Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Mrs. Harwell's condition has remained similar to her last visit. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained relatively unchanged since her last visit. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last visit. Her bilateral gluteus maximus were stronger and graded 5/5. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Encounter dated 02/01/2018 for Danielle Harwell #3438

DOB:08/29/1980 Today's date: 02/13/2018

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Visit#* 8 of 8 planned treatments. *Treatment schedule:* continue 2x/week for 1 week; Re-examination for 1 week. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (no treatment rendered); C6 left lateral flexion restriction (no treatment rendered); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization); Occiput left posterior (prone mobilization). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy; left lumbar ultrasound, 1.5w/cm² 1 MHz 100% (8 minutes). *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. *Home care:* ice: neck / lower back pm for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms; Stressed the importance of performing home exercises to help with pain and improved ROM. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to January 31, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

No-Fault Carrier: NF Geico
CL#: 0138739400101059
Date of Injury: 10/31/15

Psychiatry Re-evaluation: January 31, 2018

Chief Complaint(s): Low back pain, left leg pain, weakness, numbness.

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle Harwell in our Park Club Lane office for re-evaluation on January 31, 2018.

HISTORY/CHIEF COMPLAINT

This is a 37-year-old female presenting today for re-evaluation. She is status post bilateral L5-S1 transforaminal epidural steroid injections with Dr. Siddiqui on December 6, 2017. One week following this procedure she contacted our office with severe left lower extremity pain. This pain was worse than it was prior to her injections. Along with this she was reporting progressive paresthesias and weakness. We did try a methylprednisolone dose pack, which, unfortunately, did not provide much relief. We were hoping to have an MRI at this evaluation to review, however, due to clerical oversight this was not completed. The patient is very frustrated. She reports significant weakness through all muscle groups of the left lower extremity, along with significant numbness. Her numbness is multi-dermatomal. She reports pain more pronounced in the left leg, feeling as if it shoots up from her foot. Her pain score today is 7/10. She is using ibuprofen and naproxen, but nothing else for pain. Any activity aggravates her symptoms. She states for a month following her injection she was unable to even bear weight on her leg. She reports no change in her bowel or bladder function.

Review of systems is notable for tingling, numbness, headaches, joint pain and muscle weakness, otherwise noncontributory.

PHYSICAL EXAMINATION

BP: 118/85 Pulse: 80 Resp: 16 Ht: 63" Wt: 200lb BMI: 35.4

General: She is awake, alert and oriented x3.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are pink and moist.

Cardiovascular: Normal S1, S2.

Abdomen: Soft, obese, non-distended.

Neuromusculoskeletal: The patient has full strength throughout all myotomes of the right lower extremity. In the left lower extremity the patient has 0/5 strength with extension of the great toe, dorsiflexion, plantar flexion, knee flexion and extension. Left hip flexion is 4/5 with pain. Sensory examination is diminished to light touch in all dermatomal distributions of the left lower extremity. Gait is non-antalgic. No foot drop is noted.

Psychiatric: Judgement and cognition are within normal limits.

ASSESSMENT

M51.26 - Other intervertebral disc displacement, lumbar region, M54.16 - Radiculopathy, lumbar region

IMPRESSION/RECOMMENDATIONS:

This is a 37-year-old female with worsening left leg pain with weakness and sensory deficit on exam today. Although I did advise the patient that her weakness and sensory deficit exceed beyond the region of her injection, her findings are concerning. With this in mind, I would like to order an MRI of the lumbar spine for further evaluation. The patient was initiated on gabapentin 300 mg nightly to be titrated up to twice daily for neurogenic pain. She was given a small supply of hydrocodone to help with breakthrough pain. She will continue with ibuprofen versus naproxen for anti-inflammatory relief. The patient will follow up with me in one week. MRI authorization was obtained at today's office evaluation. The patient expressed understanding and agreement with today's plan of care.

The patient was advised today regarding treatment with the above named controlled substance(s). The risk, benefits, common side effects and alternative treatments were discussed with the patient. Risks discussed include, but are not limited to: physical and/or psychological dependence, medication tolerance, drowsiness/sleepiness, balance or coordination problems, confusion, allergic reaction or other abnormal symptoms. The patient has been advised and agrees to use the medication only as prescribed and not to drive or operate heavy machinery or equipment. The patient understood and consented to under a narcotic/opiate regimen and has agreed to sign and comply with the University at Buffalo Neurosurgery controlled substance contract/agreement. The patient verbalized understanding and was told to call with any concerns.

The patient was advised today regarding treatment with the above named medication(s). The risks, benefits, common side effects and alternative treatments were discussed with the patient. The patient verbalized understanding and was told to call with any concerns.

Thank you for allowing me to participate in Danielle's care. If you have any questions or concerns regarding this patient, please do not hesitate to contact me at your earliest convenience.

Sincerely,

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a) If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency chosen. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, copayments and non-covered services. Copayments and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured" i.e., items 1a, 4, 6, 7, 8 and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds I certify that: 1) the information on this form is true, accurate and complete, 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor, 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision, 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section for services to be considered "incident to" a physician's professional services, 7) they must be rendered under the physician's direct supervision by her/his employee, 2) they must be an integral, although incidental part of a covered physician service, 3) they must be kinds commonly furnished in physician's offices, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5536). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and CWCP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1852, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 424.8(a) (6), and 44 USC 3101; 41 CFR 101 et seq and 10 USC 1079 and 1086; 5 USC 8101 et seq, and 30 USC 901 et seq, 30 USC 613; E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third party payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol 55 No. 177, page 37549, Wed Sept 12, 1990, or as updated and republished.

FOR CWCP CLAIMS: Department of Labor Privacy Act of 1974. Republishing of Notice of Systems of Records, Federal Register Vol 55 No. 40, Wed Feb 28, 1990. See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

ROUTINE USE(S): Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recompence claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claims adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLAIMERS: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, co-insurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1107. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer Mail Stop C4-26-05, Baltimore, Maryland 21244-1650. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS: A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-fault, worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned "Insured"; i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems.

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from Federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) the claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employees under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although incidental part of a covered physician's services, 3) they must be of funds commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims I further certify that I (or any employee) who rendered services am not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5338). For Black Lung claims I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 434.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 205(a), 1802, 1872 and 1874 of the Social Security Act as amended. 42 CFR 411.21(a) and 424.3(g)(6), and 44 USC 3101-41 CFR 101 et seq and 10 USC 1079 and 1085-5 USC 8101 et seq, and 30 USC 901 et seq, 38 USC 613, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by those programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties payers to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosures are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 09-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Wed, Sept. 12, 1990, as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb. 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S) To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

FOR TRICARE CLAIMS: Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA, to the Dept. of Justice for representation of the Secretary of Defense in civil actions, to the Internal Revenue Service private collection agencies, and consumer reporting agencies in connection with recoupment, claims, and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claim adjudication, fraud program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DHS/OSI/HHS: Voluntary; however failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-503, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAO PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to except, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

SIGNATURE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of the patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1197. The time required to complete the information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

BECAUSE THIS FORM IS USED BY VARIOUS GOVERNMENT AND PRIVATE HEALTH PROGRAMS, SEE SEPARATE INSTRUCTIONS ISSUED BY APPLICABLE PROGRAMS.

NOTICE: Any person who knowingly files a statement of claim containing any misrepresentation or any false, incomplete or misleading information may be guilty of a criminal act punishable under law and may be subject to civil penalties.

REFERS TO GOVERNMENT PROGRAMS ONLY

MEDICARE AND TRICARE PAYMENTS A patient's signature requests that payment be made and authorizes release of any information necessary to process the claim and certifies that the information provided in Blocks 1 through 12 is true, accurate and complete. In the case of a Medicare claim, the patient's signature authorizes any entity to release to Medicare medical and nonmedical information and whether the person has employer group health insurance, liability, no-lituit worker's compensation or other insurance which is responsible to pay for the services for which the Medicare claim is made. See 42 CFR 411.24(a). If item 9 is completed, the patient's signature authorizes release of the information to the health plan or agency shown. In Medicare assigned or TRICARE participation cases, the physician agrees to accept the charge determination of the Medicare carrier or TRICARE fiscal intermediary as the full charge and the patient is responsible only for the deductible, coinsurance and non-covered services. Coinsurance and the deductible are based upon the charge determination of the Medicare carrier or TRICARE fiscal intermediary if this is less than the charge submitted. TRICARE is not a health insurance program but makes payment for health benefits provided through certain affiliations with the Uniformed Services. Information on the patient's sponsor should be provided in those items captioned in "Insured"; i.e., items 1a, 4, 6, 7, 9, and 11.

BLACK LUNG AND FECA CLAIMS

The provider agrees to accept the amount paid by the Government as payment in full. See Black Lung and FECA instructions regarding required procedure and diagnosis coding systems

SIGNATURE OF PHYSICIAN OR SUPPLIER (MEDICARE, TRICARE, FECA AND BLACK LUNG)

In submitting this claim for payment from federal funds, I certify that: 1) the information on this form is true, accurate and complete; 2) I have familiarized myself with all applicable laws, regulations, and program instructions, which are available from the Medicare contractor; 3) I have provided or will provide sufficient information required to allow the government to make an informed eligibility and payment decision; 4) this claim, whether submitted by me or on my behalf by my designated billing company, complies with all applicable Medicare and/or Medicaid laws, regulations, and program instructions for payment, including but not limited to the Federal anti-kickback statute and Physician Self-Referral law (commonly known as Stark law); 5) the services on this form were medically necessary and personally furnished by me or were furnished incident to my professional service by my employee under my direct supervision, except as otherwise expressly permitted by Medicare or TRICARE; 6) for each service rendered incident to my professional service, the identity (legal name and NPI, license #, or SSN) of the primary individual rendering each service is reported in the designated section. For services to be considered "incident to" a physician's professional services, 1) they must be rendered under the physician's direct supervision by his/her employee, 2) they must be an integral, although modest part of a covered physician's service, 3) they must be of lands commonly furnished in physician's office, and 4) the services of non-physicians must be included on the physician's bills.

For TRICARE claims, I further certify that I (or any employee) who rendered services are not an active duty member of the Uniformed Services or a civilian employee of the United States Government or a contract employee of the United States Government, either civilian or military (refer to 5 USC 5338). For Black Lung claims, I further certify that the services performed were for a Black Lung-related disorder.

No Part B Medicare benefits may be paid unless this form is received as required by existing law and regulations (42 CFR 424.32).

NOTICE: Any one who misrepresents or falsifies essential information to receive payment from Federal funds requested by this form may upon conviction be subject to fine and imprisonment under applicable Federal laws.

NOTICE TO PATIENT ABOUT THE COLLECTION AND USE OF MEDICARE, TRICARE, FECA, AND BLACK LUNG INFORMATION (PRIVACY ACT STATEMENT)

We are authorized by CMS, TRICARE and OWP to ask you for information needed in the administration of the Medicare, TRICARE, FECA, and Black Lung programs. Authority to collect information is in section 2051(a), 1862, 1872 and 1874 of the Social Security Act as amended, 42 CFR 411.24(a) and 421.5(b)(6), and 44 USC 3101-11 CFR 101 et seq and 10 USC 1079 and 1088; 5 USC 8101 et seq, and 30 USC 901 et seq; 38 USC 613, E.O. 9397.

The information we obtain to complete claims under these programs is used to identify you and to determine your eligibility. It is also used to decide if the services and supplies you received are covered by these programs and to insure that proper payment is made.

The information may also be given to other providers of services, carriers, intermediaries, medical review boards, health plans, and other organizations or Federal agencies, for the effective administration of Federal provisions that require other third parties pay to pay primary to Federal program, and as otherwise necessary to administer these programs. For example, it may be necessary to disclose information about the benefits you have used to a hospital or doctor. Additional disclosure are made through routine uses for information contained in systems of records.

FOR MEDICARE CLAIMS: See the notice modifying system No. 69-70-0501, titled, "Carrier Medicare Claims Record," published in the Federal Register, Vol. 55 No. 177, page 37549, Sept. 12, 1990, or as updated and republished.

FOR OWP CLAIMS: Department of Labor, Privacy Act of 1974, "Republication of Notice of Systems of Records," Federal Register Vol. 55 No. 40, Wed Feb 28, 1990, See ESA-5, ESA-6, ESA-12, ESA-13, ESA-30, or as updated and republished.

FOR TRICARE CLAIMS: PRINCIPLE PURPOSE(S): To evaluate eligibility for medical care provided by civilian sources and to issue payment upon establishment of eligibility and determination that the services/supplies received are authorized by law.

DISCLOSURES: Information from claims and related documents may be given to the Dept. of Veterans Affairs, the Dept. of Health and Human Services and/or the Dept. of Transportation consistent with their statutory administrative responsibilities under TRICARE/CHAMPVA; to the Dept. of Justice for representation of the Secretary of Defense in civil actions; to the Internal Revenue Service, private collection agencies, and consumer reporting agencies in connection with recoupment claims; and to Congressional Offices in response to inquiries made at the request of the person to whom a record pertains. Appropriate disclosures may be made to other federal, state, local, foreign government agencies, private business entities, and individual providers of care, on matters relating to entitlement, claim adjudication, fraud, program abuse, utilization review, quality assurance, peer review, program integrity, third-party liability, coordination of benefits, and civil and criminal litigation related to the operation of TRICARE.

DISCLOSURES: Voluntary; however, failure to provide information will result in delay in payment or may result in denial of claim. With the one exception discussed below, there are no penalties under these programs for refusing to supply information. However, failure to furnish information regarding the medical services rendered or the amount charged would prevent payment of claims under these programs. Failure to furnish any other information, such as name or claim number, would delay payment of the claim. Failure to provide medical information under FECA could be deemed an obstruction.

It is mandatory that you tell us if you know that another party is responsible for paying for your treatment. Section 1128B of the Social Security Act and 31 USC 3801-3812 provide penalties for withholding this information.

You should be aware that P.L. 100-603, the "Computer Matching and Privacy Protection Act of 1988", permits the government to verify information by way of computer matches.

MEDICAID PAYMENTS (PROVIDER CERTIFICATION)

I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the State's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or Dept. of Health and Human Services may request.

I further agree to accept, as payment in full, the amount paid by the Medicaid program for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, co-payment or similar cost-sharing charge.

NOTICE OF PHYSICIAN (OR SUPPLIER): I certify that the services listed above were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

NOTICE: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim will be from Federal and State funds, and that any false claims, statements, or documents, or concealment of a material fact, may be prosecuted under applicable Federal or State laws.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0988-1197. The time required to complete this information collection is estimated to average 10 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1630. This address is for comments and/or suggestions only. DO NOT MAIL COMPLETED CLAIM FORMS TO THIS ADDRESS.

Re-Evaluation
Date: 04/05/2018

Patient Name: Harwell, Danielle
DOB: 08/29/1980 **Age:** 37 Y **Sex:** Female
PCP: James Panzarella, DO

Reason for Appointment

- NF- Requires Opinion
- Patient is here following up for migraines

History of Present Illness

General:

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle today in neurologic reevaluation regarding a motor vehicle accident and head injury. She was seen at DENT Neurologic Institute in Amherst, New York.

Danielle is a 37-year-old female with previous history of migraine headaches who initially presented to this office on 2/19/16 after a motor vehicle accident on 10/31/2015. The patient was the seat-belted driver in her vehicle and was rear-ended by another car. The patient hit her head against the headrest, then jolted forward. She was seen at urgent care the next day. Afterward, the patient struggled with dizziness, difficulty with attention and concentration, headaches, poor sleep. She had significant amount of pain in the left upper extremity and shoulder. Headaches were occurring 4 times per week at 3-7/10 on the pain scale.

The patient was evaluated by Dr. Pollina, a neurosurgeon, on 2/8/16. MRI L spine and C-spine 1/5/16 showed mild multilevel degenerative changes with disk extrusions seen at C4-C5 and C5-C6. She had an EMG 01/19/2016, but we do not have the results. Laboratory studies 3/24/16 were normal aside from a low MCV of 77.7, low MCH of 25.7 and elevated RDW 14.8.

Danielle has tried ibuprofen, Tylenol, Motrin, Lamictal, Nortriptyline, magnesium, Naproxen, Rizatriptan, and Topamax, Chiropractic care, massage therapy, vestibular therapy and physical therapy. Lamictal was not found to be helpful. Vestibular therapy and physical therapy have both proven helpful in symptom management, and she had since been discharged from both. Massage therapy and regular trigger point injections have been helpful with decreasing her cervical myofascial spasm.

MRI Brain completed 03/27/2017 was normal. MRI Cervical spine completed 03/27/2017 showed mild dextroscoliosis of the cervical spine, there were some bone spurs, but otherwise normal.

The patient has since been experiencing continued symptoms. She was started on Topamax and continued on Nortriptyline. Cambia has been effective as a rescue medication, however this unfortunately is not approved through her insurance. She continued with chiropractic therapy twice per week. At her last reevaluation on 10/19/17, dosing of both Nortriptyline and Topamax was increased. Cambia was recommended as a rescue medication due to GI upset caused by other NSAIDs. She continued with regular trigger point injections and occipital nerve blocks.

She was last seen for reevaluation on 1/11/18 reported continued headache activity, about 4 headaches per week with 2-3 migraines per month. She had not yet restarted physical or vestibular

		Inflatus	

therapies. She had been undergoing regular lumbar facet injections, and continued with massage and chiropractic therapy. Dosing of Topamax was increased to 200 mg daily and Sumatriptan and Diclofenac were sent as alternative rescue medications. We also submitted for Botox.

The patient returns today with no change in frequency and severity of headaches. She did have to undergo a cholecystectomy on 2/9/18. She is hoping this will relieve some of her GI symptoms. She continues to take Topamax and is tolerating well. Botox was approved, however this has not yet been started. Upon reviewing recent appointments, she also stopped undergoing regular trigger point injections and occipital nerve blocks 4 months ago. She also reports temporomandibular joint pain. Rescue medications continue to be helpful, but can take a while to work.

Current Medications

- Taking nortriptyline 10 mg capsule 2 cap(s) orally QHS
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking magnesium oxide 250 mg tablet 1-2 tab(s) orally once a day
- Taking topiramate 100 mg tablet 1 tab(s) orally BID
- Taking Imitrex 100 mg tablet 1 tab(s) orally PRN Migraine; MDD = 2 MWD = 3
- Taking diclofenac potassium 50 mg tablet 1 tab(s) orally prn headache, MDD= 2, no more than 3 days per week
- Taking Vitamin D3 5000 Int'l units capsule 1 cap(s) orally once a day
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Review of Systems

Positive for headache, dizziness, weakness, unsteadiness, confusion, sleep problem, blurry vision, double vision, the years, earache, vertigo, joint pain and stiffness, neck and lower back pain, muscle aches, heartburn, anemia, easy bruising. No additional new neurological or physical deficits were reported outside of the patient's complaints upon the clinical review of systems for today's visit. The following systems were assessed: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 114/74, HR 88, RR 16, Ht 63, Wt 244.4, BMI 43.29, BSA 2.22.

Examination**General Examination:**

General Appearance: Well-nourished, well-developed, in mild distress, participated with the exam. Well groomed. Eyes: Disc margins clear, no vessel abnormalities, no papilledema. Neck: Supple. Range of motion limited with lateral flexion. Trigger points palpated within cervical musculature bilaterally.

Cardiovascular: peripheral pulses within normal limits. Extremities: Full range of motion of extremities x4. No edema.

Neurological:

Mental Status: Orientation to person, place, and time was normal. Attention span and concentration was appropriate. Speech: Speech content and production was normal. Memory: Memory for remote and recent events was intact. Fund of Knowledge: Appropriate for events and past history. Cognition was intact. Motor: 5/5 upper extremities bilaterally, 4/5 left lower extremity. Tone: Tone and bulk was within normal limits in the upper and lower extremities. No atrophy or fasciculations were noted. Reflexes: DTRs were +2 globally. Coordination: Test of coordination and fine motor skills were within normal limits. Gait and Station: Romberg positive.. Sensory: Decreased sensation left lower extremity.

Cranial Nerves:

Cranial Nerve II: Visual fields are full. Cranial Nerves III, IV, VI: Extraocular movements intact. PERRLA. Cranial Nerve V: Facial sensation and muscles of mastication were normal bilaterally. Cranial Nerve VII: Face was symmetric and strength was equal bilaterally. Cranial Nerve VIII: Hearing was intact to finger rub bilaterally. Cranial Nerves IX, X: Swallowing and palate elevation was within normal limits. Cranial Nerve XI: Sternocleidomastoid and shoulder shrug was within normal limits bilaterally. Cranial Nerve XII: Tongue was midline.

Assessments

- Posttraumatic headache - G44.309 (Primary)
- Myofascial pain - M79.1
- TMJ dysfunction - M26.609
- Migraine without aura - G43.009
- Vestibular dysfunction - H83.2X9
- Concussion, without loss of consciousness, sequela - S06.0X0S

Danielle is a 37-year-old female who returns today for reevaluation with continued headaches, myofascial pain, and back pain. She was advised to begin Botox injections for her chronic headaches. He will also resume trigger point injections and occipital nerve blocks. I would like to refer her to Dr. Goldberg for TMJ dysfunction. We will hold off on medication changes at this time, however we may elect to increase dosing of Topamax if needed. She will continue to follow with Dr. Siddiqui regarding lower back pain. We will have her return for Botox Injections at her earliest convenience, and for reevaluation in 3 months, sooner if needed.

This dictation was created with Dragon voice recognition system. Although efforts were made to ensure accuracy, voice recognition errors may be present.

Dr. Capote is the supervising physician on site.

Thank you for allowing us to participate in the care of this patient. If there are any questions please feel free to call anytime.

Treatment**1. Posttraumatic headache**

Refill magnesium oxide tablet, 250 mg, 2 tab(s), orally, once a day, 30 days, 60, Refills 5
Consultation1916491Burdick,Abbey L 04/05/2018 10:30:47 AM > Dr. Goldberg

2. Myofascial pain

MASSAGE Therapy1916465
Chiropractic therapy1916466

3. Migraine without aura

Continue nortriptyline capsule, 10 mg, 2 cap(s), orally, QHS
Continue topiramate tablet, 100 mg, 1 tab(s), orally, BID

Continue Imitrex tablet, 100 mg, 1 tab(s), orally, PRN Migraine; MDD = 2 MWD = 3

Continue diclofenac tablet, potassium 50 mg, 1 tab(s), orally, prn headache, MDD = 2, no more than 3 days per week

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle. 04/05/2018.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 04/05/2018.

Exercise: Patient counseled on importance of moderate physical activity daily. 04/05/2018.

improved from a 4 to 3 out of 10. *Prognosis:* Guarded. *Post-treatment analysis:* patient tolerated treatment without incident. *Set backs:* Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Visit# 1 of 4 planned treatments.* *Treatment schedule:* 1x every 2 weeks for 6 weeks; Re-examination for 6 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (blocking maneuver). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to May 16, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Thursday March 15, 2018 Provider: Peter Guzinski DC RE-EXAM

Electronically signed by Peter Guzinski DC on 03/18/2018 at 4:06pm

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Accident Description: *Date of Accident:* October 31, 2015. *Time of Accident:* 4:55 PM. *Narrative Description of Accident:* Patient stated that she was stopped in traffic, while waiting for a truck to make a left hand turn into a driveway, when she was rear impacted. She stated that accident occurred while she was traveling South on Starin in the City of Buffalo, New York. Mrs Harwell, stated that this was a chain reaction accident. The vehicle that was behind her was also stopped and was pushed into her vehicle by an automobile that rear impacted them. *Patient Seatbelted?* Yes. *Position in vehicle driver.* *Patient Position at Impact:* looking straight ahead. *Impact Point of Patient's Car:* rear. *Brakes On At Time of Impact?* Yes. *Airbags Deployed?* No. *Did The Patient's Seat Break?* No. *Impact With Car Interior?* seatbelt left chest; headrest back head. *Patient's Vehicle Type:* Honda Odyssey 2007. *Type of Other Vehicle:* Honda CRV 2015. *Road Conditions At Time of Accident:* dry. *Was There Loss of Consciousness?* no. *What Symptoms Were Immediately Present?* Patient stated that she was experiencing head, neck, back and left shoulder and arm pain.

Cervical: Patient presented today with the continued chief complaint of neck pain. Due to the pain, she is unable to lift heavy weights off the floor, she has severe headaches which come frequently, she can do most of her usual work, but no more and her sleep has been moderately disturbed (1-2 hrs. sleepless). *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* improving, since last re-examination on December 29, 2017. *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 2->3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* "I still get headaches periodically, 2 to 3 a week. Headaches are more frontal today. She states that the duration varies, but they no longer last all day." Patient stated that she gets intermittent dizziness with the headaches but it has not been as severe. She states that does experience an irritation to bright lights with the headaches as well. *Cervical Disability Index:* 30%. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* Yes: Cholecystectomy performed on February 9, 2018.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving, since last re-examination on December 29, 2017. *Pain:* achy, dull, sharp, shooting. *Range:* 4->5/10. *Pain is*

Encounter dated 03/15/2018 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 04/09/2018

frequent. *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none. *Oswestry score:* 58%.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain has been better since her last re-evaluation. Due to the pain, she is unable to lift heavy weights, she is unable to walk greater than 1 mile, she is unable to sit greater than 60 minutes, she is unable to stand greater than 60 minutes and she is unable to travel on journeys greater than 1 hour. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last re-examination on December 29, 2017. *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 4/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *OSWESTRY Disability Index:* 42%. *The Keele STaRT Back Screening Tool:* Low risk. *Recent medical treatment for this condition:* Massage therapy.

Activity of Daily Living Form Bathing/Showering: no impairment; Bending forward/backward: moderate impairment; Brushing teeth: no impairment; Buttoning shirt: no impairment; Driving: mild impairment; Drying Hair: mild impairment; Household chores: mild impairment; Laundry: moderate impairment; Lifting less than 10 lbs: mild impairment; Lifting more than 10 lbs: moderate impairment; Kneeling: mild impairment; Making Meals: mild impairment; Prolonged Sitting more than 30 minutes: moderate impairment; Putting pants on: mild impairment; Putting shoes/socks on: mild impairment; Reaching above the shoulders: no impairment; Restful night's sleep: mild impairment; Seated to standing position: mild impairment; Sexual activity: moderate impairment; Standing: mild impairment; Squatting: mild impairment; Taking out the trash: not performed; Tying shoes: mild impairment; Using lavatory: mild impairment; Walking: mild impairment.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain right neck; extension: WNL 60/60 with no pain; left rotation: WNL 80/80 with no pain; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain right neck; right lateral bending: WNL 45/45 with no pain left neck. *Posture:* rounded shoulders. *Strength:* all upper extremity musculature (C5-T1) were WNL and graded 5/5. *Sensation:* all upper extremity sensory exams (C5-T1) were WNL to Pin prick. *Hypertonicity & Tenderness* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Reflexes:* bilateral upper extremity reflexes (C5, C6, C7) 2+. *Orthopedic tests:* left lateral compression: Positive left lower neck pain; right lateral compression: Negative; maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative; Spinal Percussion C1-C7: Negative; left shoulder depression: Positive for left lower neck pain; right shoulder depression: Negative; neutral cervical compression: Negative; hyperextension cervical compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Orthopedic tests:* Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Encounter dated 03/15/2018 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/09/2018

Lumbar/Sacral/Pelvis: Range of motion: flexion: 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. Gait pattern: normal. Strength: all lower extremity motor exams (L1-S1) were WNL bilaterally and graded 5/5. Sensation: left S1 dermatomes had decreased sensation Pin prick; all other lower extremity dermatomes WNL to Pin prick. **Tenderess & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild. **Tenderess on palpation:** left SI: moderate. **Trigger points:** left gluteus maximus. **Reflexes:** bilateral lower extremity reflexes (L4 and S1) 2+. **Orthopedic tests:** Patrick's Fabere: Negative bilateral; Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral; Minor's sign: Negative; Femoral nerve stretch test: Negative bilateral; Dejerine's sign: Positive for lower back pain on a cough or sneeze. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-examination on December 29, 2017, Mrs. Harwell's neck condition has improved. Her Neck Disability Index score improved from 42% to 30% and her pain is no longer constant but now frequent. In addition, her active cervical extension and left rotation are now WNL and without pain. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL, improve active cervical ROM to WNL and to decrease the frequency and intensity of headaches. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 99212, 97124.

Thoracic assessment: Mrs. Harwell's middle back condition improved since her last re-evaluation on December 29, 2018. Her pain is no longer constant but now frequent. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last re-evaluation on December 29, 2018. Her VAS score improved from a 5 to 6 to 4 out of 10 and her Oswestry Disability Index score improved from 58% to 42%. She is now able to walk 1/2 of a mile farther and sit 30 minutes longer with less pain. Her active lumbar flexion improved from 40 to 60 degrees, extension improved from 5 to 15 degrees and left rotation is WNL. In addition, her left SLR improved from 45 to 60 degrees and her left tibialis anterior muscle is now stronger and graded 5/5 from a 4/5. Further treatment is medically necessary to help improve her active lumbar ROM to WNL and improve her ability to sit, stand, walk, bend, perform household chores and lift with 50% less pain. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation)

Encounter dated 03/15/2018 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 04/09/2018

with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. *Treatment schedule:* 1x every 2 weeks for 8 weeks; Re-examination for 8 weeks. *Subluxations found on assessment and adjusted:* C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (blocking maneuver). *Physical Modalities:* bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. *Patient given:* home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. *Home care:* ice: neck / lower back prn for 20 minutes. *Additional instructions:* Advised patient to monitor for any changes in their symptoms. *Short term goals:* decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. *Long term goals:* decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. *Disability status:* Temporary partial starting on November 12, 2015 to May 16, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit.* *Pain:* achy, dull, sharp, tingling, shooting, numb. *Range:* 2->3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* "I still get headaches periodically, 2 to 3 a week. I think my headaches are coming from my jaw". *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* improving. *since last visit.* *Pain:* achy, dull, sharp, shooting. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain has been better since last visit. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving. *since last visit.* *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain right neck; extension: WNL 60/60 with no pain; left rotation: WNL 80/80 with no pain; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain right neck; right lateral bending: WNL 45/45 with no pain left neck. *Posture:* rounded shoulders.

 DOB:08/29/1980 Today's date: 04/09/2018

Hypertonicity & Tenderness Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild; cervical paraspinal musculature Right Mild. **Trigger points:** left levator scapulae, bilateral upper trapezius. **Orthopedic tests:** maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative. **X-ray findings:** Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. **Spinal subluxation level(s):** C5, C6, left first rib. **Subluxations detected by:** motion and static palpation.

Thoracic: **Hypertonicity & Tenderness** Thoracic paraspinal musculature Bilateral Moderate. **Trigger points:** bilateral rhomboids. **Orthopedic tests:** Spinal percussion T1-T12: Negative; Sheppleman's: Negative bilateral. **Spinal subluxation level(s):** T2, T3, T6, T7, T8, T9. **Subluxations detected by:** motion and static palpation.

Lumbar/Sacral/Pelvis: **Range of motion:** flexion: 60/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with no pain; right rotation: WNL 30/30 with no pain; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: WNL 25/25 with pain lower back. **Gait pattern:** normal. **Strength:** left extensor hallucis longus: 4/5; right extensor hallucis longus: 5/5. **Sensation:** left L5 and S1 dermatomes had decreased sensation Pin prick; all other lower extremity dermatomes WNL to Pin prick. **Tenderness & Hypertonicity** lumbar paraspinal left moderate; TFL / ITB left moderate; lumbar paraspinal right mild. **Tenderness on palpation:** left SI: moderate. **Trigger points:** left gluteus maximus. **Orthopedic tests:** Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. **Spinal subluxation level(s):** L4, L5, Left SI. **Subluxations detected by:** motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-examination on December 29, 2017, Mrs. Harwell's neck condition has improved. Her Neck Disability Index score improved from 42% to 30% and her pain is no longer constant but now frequent. In addition, her active cervical extension and left rotation are now WNL and without pain. Further chiropractic treatment is medically necessary to decrease pain and improve function especially with her ability to perform her ADL, improve active cervical ROM to WNL and to decrease the frequency and intensity of headaches. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition improved since her last visit. Her VAS score improved from a 4 to 5 to 3 out of 10. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last visit. Her VAS score

Claim # 0138739400/0101069

NEW YORK MOTOR VEHICLE NO-FAULT INSURANCE LAW
ASSIGNMENT OF BENEFITS FORM

(FOR ACCIDENTS OCCURRING ON AND AFTER 3/1/02)

I, Danielle Harwell ("Assignor") hereby assign to Jeffrey I. Goldberg, D.O., P.C. ("Assignee")

(Print patient's name) (Print hospital or health care provider name)
all rights, privileges and remedies to payment for health care services provided by assignee to which I am
entitled under Article 51 (the No-Fault Statute) of the Insurance Law.

The Assignee hereby certifies that they have not received any payment from or on behalf of the Assignor and
shall not pursue payment directly from the Assignor for services provided by said Assignee for injuries sustained
due to the motor vehicle accident which occurred on 10/13/11, not withstanding any other agreement.
(Print accident date)

to the contrary.

This agreement may be revoked by the assignee when benefits are not payable based upon the assignor's lack
of coverage and/or violation of a policy condition due to the actions or conduct of the assignor.

ANY PERSON WHO KNOWINGLY AND WITH INTENT TO DECEIVE ANY INSURANCE COMPANY OR OTHER PERSON
FILES AN APPLICATION FOR COMMERCIAL INSURANCE OR A STATEMENT OF CLAIM FOR ANY COMMERCIAL OR
PERSONAL INSURANCE BENEFITS CONTAINING ANY MATERIALLY FALSE INFORMATION, OR CONCEALS FOR THE
PURPOSE OF MISLEADING, INFORMATION CONCERNING ANY FACT MATERIAL THERETO, AND ANY PERSON WHO,
IN CONNECTION WITH SUCH APPLICATION OR CLAIM, KNOWINGLY MAKES OR KNOWINGLY ASSISTS, ABETS,
SOLICITS OR CONSPIRES WITH ANOTHER TO MAKE A FALSE REPORT OF THE THEFT, DESTRUCTION, DAMAGE OR
CONVERSION OF ANY MOTOR VEHICLE TO A LAW ENFORCEMENT AGENCY, THE DEPARTMENT OF MOTOR
VEHICLES OR AN INSURANCE COMPANY, COMMITS A FRAUDULENT INSURANCE ACT, WHICH IS A CRIME, AND
SHALL ALSO BE SUBJECT TO A CIVIL PENALTY NOT TO EXCEED FIVE THOUSAND DOLLARS AND THE VALUE OF
THE SUBJECT MOTOR VEHICLE OR STATED CLAIM FOR EACH VIOLATION.

SUBJECTIVE

Patient presents for evaluation of a possible temporomandibular joint (TMJ) disorder following motor vehicle accident.

Mrs. Harwell's chief complaints included jaw locking, sensation of malocclusion (patient indicates "bite feels off"), limited mouth opening, jaw pain, headaches, TMJ clicking and ear pain.

Additional description of chief complaint: Jaw pain, popping, occasional open locking since MVA. Ear pain. Referred by neurology for TMJ assessment. Headaches. No prior history of TMJ issues. History of current condition: MVA 10/31/2015. Patient was stopped n Kenmore Avenue behind a truck. 4 car accident occurred, with 3 cars in a row rear-ended behind her. Struck from behind, did not hit anything in front of her. Did not lose consciousness. Went to Immediate Care (Delaware Avenue) the following day, x-rays taken, diagnosed as whiplash. Was later told by physicians she had two herniated discs in neck, two herniated discs in lower back, concussion. Developed headaches, jaw pain. Subsequent treatment has included botox, trigger point injections, and other headache care at Dent. Chiropractic care and massage. Injections and epidurals for pain management. Primary pain location: right. Patient indicates (pointing with finger) that pain is centered at TMJ. Joint sounds: Constant popping on right. Very rare popping on left. Temporal pattern: None. Condition is worse with stress.: Yes. Previous treatment: No prior history of TMJ issues. Was seen one time by another TMJ specialist, ordered MRI, pt did not wish to continue with him,. Patient is aware of parafunctional activity consisting of Grinding - Nocturnal. Eccentric jaw posture at times. History of head and neck surgery: None. Trauma history: MVA 10/31/15 - no other history of significant facial, head or neck trauma. Recent dental work includes None. Additional headache notes: Rare minor headaches prior to accident, did not require treatment.

Mrs. Harwell has symptoms since 10/31/2015. Patient reports that the problem appears to have started with car accident. Activities which make the condition worse include talking, eating. Massage appears to improve the condition. Progression is described as getting worse over time. Quality of pain is described by patient as Aching. The pain typically lasts "Variable". The patient indicates a pattern wherein the condition is best described as Steady throughout day. Jaw is painful with opening (bilateral), painful with chewing (bilateral). Current pain level is 5 out of ten. Average pain level for the past six months is 5 out of ten. Worst pain level in the past six months is 7 out of ten. The patient is aware of joint clicking on both sides. There is pain associated with the jaw

clicking. The patient reports the sensation of a recent occlusal change. The patient reports a limited or restricted jaw opening. Lateral mandibular movement feels limited or reduced. The patient has experienced an open lock.

The headaches affect the following areas of the head: temples (bilateral), the entire head, vertex of the head, occipital region. The patient indicates a history of migraines. The migraines were formally diagnosed by Dr Peter Guzinski. Additional headache information provided by the patient: "Dr Jennifer McVige." The patient typically sees a dentist Emergencies only. At this time, the patient reports that her teeth are sensitive to temperature. The patient reports xerostomia. Orthodontia history includes None. The patient reports ear pain (bilateral), tinnitus (bilateral), ear fullness (bilateral), dizziness or vertigo, eye pain (bilateral), blurred vision (bilateral). There is a feeling of a foreign object in the throat. Neck pain is reported by the patient. The patient reports back pain. There is numbness reported in the hands or fingers. There is a sensation of tingling in the hands or fingers. The patient states the following about his or her posture: "good." Overall sleep quality is described as 3 out of ten. Patient snores. The pain causes waking during the night.

To the question, How often are you tense, aggravated, or frustrated during a usual day? patient responded Half the time. The patient reports feeling depressed Seldom. To the question, Do you have thoughts of hurting yourself or committing suicide? the patient responded: No.

OBJECTIVE

Cranial nerve screening revealed a possible deficit in the following nerves: #11 (spinal accessory) - Right shoulder weakness..Otherwise all cranial nerves within normal limits. The patient is alert, attentive, and oriented. Speech is clear and fluent. Patient is able to detect and identify odor in both nostrils. Pupils are normal, equal, and reactive to light. At primary gaze, there is no eye deviation. Normal and coordinated tracking through six cardinal positions. No signs of diplopia. No evident nystagmus or ptosis. Facial sensation is intact to cotton in all three divisions of trigeminal nerve bilaterally. Face is symmetric with normal eye closure and facial expression. No evident facial weakness. Hearing is normal to rubbing sticks. Palate elevates symmetrically. Phonation is normal. Gag reflex is normal. Head turning and shoulder shrug with resistance are intact. Tongue protrudes in midline with normal movements and no atrophy. and No tenderness was elicited upon palpation of the Trapezius bilaterally, sternocleidomastoid bilaterally, lateral TMJ capsule on the left, Lateral Pterygoid bilaterally, posterior joint space bilaterally, middle temporalis bilaterally, anterior temporalis bilaterally, posterior temporalis bilaterally, Mastoid process bilaterally and Splenius Capitis / Cervical Insertions bilaterally. Mild tenderness was elicited upon palpation of the Masseter - Insertion bilaterally, Masseter - Enthesis bilaterally, lateral TMJ capsule on the right, temporal tendon bilaterally, stylomandibular ligament on the left and Masseter - Origin bilaterally. Severe tenderness was elicited upon palpation of the stylomandibular ligament on the right.

Comprehensive orofacial examination revealed:

Blood Pressure: 122/62.

Heart rate: 92 BPM.

Facial appearance: Normocephalic / symmetric.

Opening click observed on the right.

Opening pattern: Deviates Left, with correction.

The opening pattern is consistent.: Yes

Pain free opening: 44 mm.

Maximum unassisted opening: 50 mm.

Maximum assisted opening: 51 mm.

End feel of assisted opening: Normal.

Wide opening produces pain at Right TMJ.

Right lateral excursion: 4 mm.

Left lateral excursion: 8 mm.

Protrusion: 1 mm.

Mandibular midline 3 mm deviated from maxillary. (To the right)

Maxillary midline consistent with facial midline

All oral soft tissue within normal limits, including buccal mucosa, floor of mouth, and lateral tongue.

Tongue: Class 3: average to large, above occlusal plane.

Tori: none.

Palate: Hard and soft palate normal.

Mallampati throat form: 4.

Symmetrical rise of soft palate observed.

Periodontal condition: Fair.

Signs of dental wear: none.

Dental prosthesis present: None.

Occlusal class II.

Overjet of 4 mm.

Overbite of 3 mm.

Missing teeth 1,2,32.

Fractures of teeth 18,19,20,30 observed.

Cervical range of motion measurements indicated normal range of motion with pain free rotation, extension, flexion and side bend, with the following exceptions: pain on rotation to both side, pain on side bend to both shoulder.

Panoramic and bilateral TMJ radiographs at initial visit reveal: Compressed joint space (bilateral). Pronounced antegonial notching (bilateral). Pt aware of several fractured lower teeth requiring extraction. MRI 5/5/16 reviewed - indicates disc displacement with reduction on right, normal on left.

The patient reported allergic reactions to clindamycin, Environmental allergies, biaxin, Food allergies, latex, soma, penicillin, cipro, Other antibiotics:, ranidin, sulfa drugs, codeine and Keflex. She is currently taking claritin, magnesium, pantoprazole and vitamin d3.

SIGNIFICANT MEDICAL HISTORY: Past: Anxiety, low blood pressure, heart murmur, current pregnancy, sinus problems, Ulcers and Recent weight loss. Current: acid reflux, anemia, arthritis, asthma, autoimmune disorder, bruising easily, chronic pain, Digestive issues, dizziness, Headaches and osteoarthritis.

Past surgical procedures include dnc, gallbladder, nasal and tonsillectomy.

Family History: cancer, heart disease, diabetes, high blood pressure and stroke.

Social History: Occupation: homemaker. Cigarettes: The patient denies ever smoking. Alcohol: None. Caffeine: None. Reported weight: 200 pounds, Weight change in past two years: Gain of more than 10 pounds, Ethnic background: Caucasian / white.

ASSESSMENT

My working diagnosis is Disc displacement with reduction (right side) (ICD M26.631), myofascial pain / myalgia (right side) (ICD M79.1). Based on history and examination, the patient's condition appears to be attributable to the motor vehicle accident.

PLAN

Procedures performed: New patient exam level 3

(Patient was referred for evaluation. Office visit consisting of detailed history, detailed examination, and medical decision making of low complexity; presenting problem is of moderate severity; at least 40 minutes engaged in face-to-face examination, history taking, and counseling; counseling and/or coordination of care account for more than 50% of this time). Panoramic radiograph, TMJ lateral radiographs (bilateral, open and closed),

Recommendation of a soft diet, application of heat to painful area, hydrate, avoid chewing gum, minimize caffeine.

Instruction provided in therapeutic exercise (classic 5x5)

Provided patient with a copy of "Blue Book" outlining progressive therapy approach, instructions for care and maintenance of orthotic, and home care.

Immediate oral orthotic for parafunctional control (NTI type)

The treatment plan consists of Complete Biometric evaluation and review (including jaw tracking, facial EMG, joint vibration analysis). Immediate occlusal orthotic / deprogramer (NTI type), Lower occlusal appliance (Gelb anterior positioning type) and Upper occlusal orthotic (Farrar anterior positioning type).

We would like to see the patient in 4 weeks.

This patient has symptoms for which proper evaluation and therapy are medically necessary.

Patient Name: Danielle Harwell
Date of Birth: 08/29/1980
No-Fault Carrier: NF Geico
CL#: 0138739400101059
Date of Injury: 10/31/15

Psychiatry Re-evaluation: April 11, 2018

Chief Complaint(s): Low back pain, left greater than right lower extremity pain/weakness.

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle Harwell in our Park Club Lane office for re-evaluation on April 11, 2018.

HISTORY/CHIEF COMPLAINT

The patient is a 37-year-old female. We saw the patient last on January 31, 2018. At that time we were speaking with the patient regarding increased pain and weakness in the left leg, which she felt following an epidural steroid injection she had with Dr. Siddiqui in early December. The patient is pleased to report she has had some improvement in her pain. She was scheduled to come back to our office a week after our last appointment, but, unfortunately, had to undergo an urgent cholecystectomy with a complicated course. At this time she is feeling much better from this standpoint. She states that the left leg pain she was experiencing has also improved. She is still experiencing weakness, but it is also improved. An updated MRI of the lumbar spine will be reviewed below. We initiated the patient on gabapentin at her last appointment, which she is now taking and finding good relief with. She was given small supply of hydrocodone, which she states she has exhausted, but did feel it helped in times when her pain was very severe. She is also utilizing ibuprofen 800 mg. Her pain score today is 5/10 on the visual analog scale. She is unable to stand, walk or sit for any length of time and has to make frequent position changes. She notes occasional electric-shock sensations in the back, as well as down the leg, more so on the left-hand side. Her right leg is doing quite well.

Review of systems is notable for joint pain, numbness, tingling, muscle weakness and headaches, otherwise noncontributory to chief complaint.

PHYSICAL EXAMINATION

Resp: 16 **Ht:** 63" **Wt:** 200lb **BMI:** 35.4

General: This is a 37-year-old female, in no acute distress. She is awake, alert and appropriate. Speech is fluent and coherent.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are pink and moist.

Cardiovascular: Normal S1, S2.

Abdomen: Soft, non-distended, obese.

Neuromusculoskeletal: The patient has decreased strength throughout multiple muscle groups of the left lower extremity, most notable in left hip flexion. However, this is improved when compared to the significant weakness she exhibited in January. Sensory examination continues to be decreased in multiple dermatomal distributions of the left leg, most pronounced in the lateral aspect of the calf. Straight leg raise sign is negative. She is able to stand without assistance. Gait is mildly antalgic. She utilizes a straight cane for assistance in ambulation.

Psychiatric: Judgement and cognition are within normal limits.

REVIEW OF DIAGNOSTIC STUDIES

MRI of the lumbar spine without contrast from Buffalo MRI dated February 2, 2018, report was reviewed. There is disc space narrowing present at L3-4, L4-5 and L5-S1. This is severe at L3-4. There is mild central canal narrowing with no foraminal stenosis at L3-4. At L4-5 there is a broad-based annular bulge with mild canal stenosis similar to previous study in 2016. There is no significant foraminal stenosis. At L5-S1 there is disc space narrowing with a central broad-based disc protrusion and increased epidural fat noted. There is mild bilateral foraminal stenosis and mild central stenosis. This is unchanged compared to the 2016 study.

ASSESSMENT

M51.26 - Other intervertebral disc displacement, lumbar region, M47.26 - Other spondylosis with radiculopathy, lumbar region, M51.36 - Other intervertebral disc degeneration, lumbar region

IMPRESSION/RECOMMENDATIONS:

This is a 37-year-old female with low back pain and improved left lower extremity pain, paresthesias and weakness. Due to the ongoing symptoms she has, although they are markedly improved when compared to our last appointment, and in reviewing her MRI from February with no significant explanation of the weakness and numbness she is experiencing, I am recommending a bilateral lower extremity EMG/nerve conduction study. She will continue with chiropractic care and massage therapy. I will continue her on gabapentin 300 mg, and I have encouraged her to take this twice a day if capable. She will receive a refill of hydrocodone 7.5/325, a quantity of #15 tablets to be used sparingly. She will continue with ibuprofen for anti-inflammatory relief. The patient expressed understanding and agreement with today's plan of care. I will see her back following her EMG to review further treatment options.

The patient was advised today regarding treatment with the above named controlled substance(s). The risk, benefits, common side effects and alternative treatments were discussed with the patient. Risks discussed include, but are not limited to: physical and/or psychological dependence, medication tolerance, drowsiness/sleepiness, balance or coordination problems, confusion, allergic reaction or other abnormal symptoms. The patient has been advised and agrees to use the medication only as prescribed and not to drive or operate heavy machinery or equipment. The patient understood and consented to under a narcotic/opiate regimen and has agreed to sign and comply with the University at Buffalo Neurosurgery controlled substance contract/agreement. The patient verbalized understanding and was told to call with any concerns.

Danielle Harwell DD 04/11/2018

Procedure Note

Date: 05/08/2018

Patient Name: Harwell, Danielle

DOB: 08/29/1980 Age: 37 Y Sex: Female

PCP: James Panzarella, DO

Reason for Appointment

- NF- Requires Opinion
- Patient is here for Trigger Point injections . Patient presents for treatment of headache

History of Present Illness

General:

The patient is here today for trigger point injections. The patient denies any history of allergies to lidocaine, bupivacaine or dexamethasone. The patient denies any history of bleeding disorders. The patient is not on any anticoagulant medications. Prior to the procedure the risks and benefits were discussed with the patient and a written informed consent was signed. The patient has elected to have the procedure performed today. Patient reports good results with her trigger point injections. She unfortunately had to cancel her initial Botox appointment due to coming down with the stomach flu. We will resubmit for Botox authorization.

Current Medications

- Taking magnesium oxide 250 mg tablet 2 tab(s) orally once a day
- Taking nortriptyline 10 mg capsule 2 cap(s) orally QHS
- Taking topiramate 100 mg tablet 1 tab(s) orally BID
- Taking Imitrex 100 mg tablet 1 tab(s) orally PRN Migraine; MDD = 2 MWD = 3
- Taking diclofenac potassium 50 mg tablet 1 tab(s) orally prn headache, MDD= 2, no more than 3 days per week
- Taking Melatonin 3 mg tablet 1 tab(s) orally once (at bedtime)
- Taking Vitamin D3 5000 int'l units capsule 1 cap(s) orally once a day
- Taking pantoprazole 40 mg delayed release tablet 1 tab(s) orally once a day
- Taking loratadine 10 mg capsule 1 cap(s) orally once a day
- Medication List reviewed and reconciled with the patient

Review of Systems

Neck pain and headaches. No additional new neurological or physical deficits reported outside of the patient's complaints as compared to the previous visit, and upon review of clinical systems for today's visit. This assessing the following systems: neurologic, constitutional, eyes, ears, nose and throat, cardiovascular, respiratory, gastrointestinal, genitourinary, skin, musculoskeletal, psychiatric, endocrine, hematologic, and allergy.

Vital Signs

BP sitting 126/82, HR 80, RR 16, Ht 63, Wt 242.4, BMI 42.93, BSA 2.21.

Examination

Neurological:

The patient was seated comfortably on a chair and appeared to be well dressed, well nourished and without distress. The speech was clear and fluent. Affect was positive.

Muscular exam reveals 5/5 strength in the upper and lower extremities bilaterally. Prominent trigger points were palpated throughout the cervical and thoracic musculature, including the bilateral trapezius and latissimus dorsi muscles. These focal areas of tenderness are associated with distinct patterns of referred pain. Stimulation of these trigger points reproduces patterns of pain. There is no evidence of muscle deconditioning or wasting. Range of motion about the cervical spine is moderately limited in all directions.

Assessments

1. Myofascial pain - M79.1

Continue all previously prescribed medicines at the current doses.

Return for repeat trigger point injections in 1 month.

Avoid migraine triggers such as MSG and nitrates, obtain good sleep, avoid skipping meals and exercise regularly.

Thank you for allowing to participate in the care of this patient. If there are any questions please feel free to call anytime.

Dr. McVige is the supervising physician on site.

Procedures

Injections:

Trigger Point (w) The risks and benefits of this procedure were explained to the patient, and the patient agreed to the procedure. The patient denied any allergy to the agents used prior to administration. There is no history of bleeding disorder. Trigger point areas were palpated and cleansed with isopropyl alcohol in sterile fashion while the patient was in a seated position within the exam room. I then provided the patient with trigger point injections with equal volumes of 1% lidocaine and 0.5% marcaine (5 cc each). A total of 10 cc was injected with a 25-gauge needle without complication into 10 areas in the back within the trapezius and latissimus dorsi bilaterally. The patient tolerated the procedure well and complete hemostasis was maintained throughout. The patient was instructed to refrain from strenuous exercise, and to apply warm compresses with gentle massage to the area of injection for the next 2-3 days to address any local tenderness.

Preventive Medicine

COUNSELING: Healthy Living: Patient counseled on the importance of healthy lifestyle 05/08/2018.

Diet: Patient counseled on importance of lowering sugar intake, sodium and fats. 05/08/2018.

Exercise: Patient counseled on importance of moderate physical activity daily. 05/08/2018.

Electronically signed by Peter Guzinski DC on 04/27/2018 at 10:00am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, tingling, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving; lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* "I still get headaches periodically, 2 to 3 a week." Patient saw Dr. Golberg and a mouth guard was made to help with her TMJ. Follow up on May 21, 2018 for Bio testing. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change, since last visit. *Pain:* achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient presented today stating that her lower back pain continues. She stated that the electrodiagnostic testing "really aggravated her left lower back and both lower extremity. It just feels weird." Patient had the electrodiagnostic testing performed on Wednesday. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* improving, since last visit. *Pain:* achy, dull, sharp, shooting, tingling, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right buttock, left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain right neck; extension: WNL 60/60 with no pain; left

Encounter dated 04/27/2018 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 05/04/2018

rotation: WNL 80/80 with no pain; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45 with no pain right neck; right lateral bending: WNL 45/45 with no pain left neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness:* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness:* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: *Range of motion:* flexion: 45/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: 20/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: 15/25 with pain lower back. *Gait pattern:* normal. *Strength:* left extensor hallucis longus: 4/5; right extensor hallucis longus: 5/5; left tibialis anterior: 4/5; right tibialis anterior: 5/5. *Tenderness & Hypertonicity:* lumbar paraspinal bilateral moderate; TFL / ITB left moderate. *Tenderness on palpation:* left SI: moderate; right SI: moderate. *Trigger points:* left gluteus maximus, right gluteus maximus. *Orthopedic tests:* Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Since her last re-examination on December 29, 2017, Mrs. Harwell's neck condition has remained similar to her last visit. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained similar to her last visit. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has improved since her last visit. Her VAS score improved from a 6 to 3 out of 10. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet

Encounter dated 04/27/2018 for Danielle Harwell #3438
DOB:08/29/1980 Today's date: 05/04/2018

arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to: relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. Visit# 1 of 4 planned treatments. Treatment schedule: 1x/week for 3 weeks; Re-examination for 3 weeks. Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (no treatment rendered); C6 left lateral flexion restriction (no treatment rendered); T2 left rotation restriction (diversified prone); T3 left rotation restriction (diversified prone); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (prone mobilization). Physical Modalities: bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. Patient given: home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. Home care: ice: neck / lower back prn for 20 minutes. Additional instructions: Advised patient to monitor for any changes in their symptoms. Short term goals: decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. Long term goals: decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. Disability status: Temporary partial starting on November 12, 2015 to May 16, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

End of note. Electronically signed by Peter Guzinski DC on 04/27/2018 at 10:00am

Patient presented for initial evaluation on November 12, 2015 for injuries sustained in a MVA on October 31, 2015.

Subjective

Cervical: Patient presented today with the continued chief complaint of neck pain. Patient stated that she has been experiencing numbness in her right thumb and index. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior neck pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, tingling, shooting, numb; level: 3/10. *Pain is frequent.* *Pain radiates to:* right shoulder, left upper extremity. *Exacerbates symptoms:* movement of neck; driving, lifting; any kind of physical activity; reaching; activities of daily living; performing household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* right hand. *Weakness:* left upper extremity. *Recent infection or fever:* No. *Night sweats or pain:* No. *Headaches:* "I still get headaches periodically, 2 to 3 a week." Patient saw Dr. Golberg and a mouth guard was made to help with her TMI. Follow up on May 21, 2018 for Bio testing. *Recent medical treatment for this condition:* Massage therapy. *Changes in past medical history:* None.

Thoracic: Patient presented today with the continued chief complaint of middle back pain. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior thoracic pain:* none. *Changes in this condition:* no change. *since last visit:* Pain: achy, dull, sharp, shooting; level: 3/10. *Pain is frequent.* *Exacerbates symptoms:* movement; bending; lifting; reaching; activities of daily living. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* none. *Weakness:* none.

Lumbar/Sacral/Pelvis: Patient stated that her lower back pain continues to remain the same. *Onset:* October 31, 2015. *Cause of symptoms:* MVA, rear impact. *Prior low back pain:* none. *Changes in this condition:* slightly worse. *since last visit:* Pain: achy, dull, sharp, shooting, tingling, numb. *Pain is frequent.* *Pain radiates to:* right buttock, left posterior thigh and leg. *Exacerbates symptoms:* driving; lifting; sitting; standing; bending; sit to stand; performing ADL; squatting; tying shoes; putting pants, socks and shoes on; household chores. *Alleviates symptoms:* chiropractic care; massage. *Numbness:* left foot. *Weakness:* none. *Bowel or bladder incontinence:* No. *Recent infection or fever:* No. *Night sweats or pain:* No. *Recent medical treatment for this condition:* Massage therapy.

Objective

Cervical: *Range of motion:* flexion: WNL 50/50 with pain right neck; extension: WNL 60/60 with no pain; left rotation: WNL 80/80 with no pain; right rotation: WNL 80/80 with no pain; left lateral bending: WNL 45/45

Encounter dated 05/01/2018 for Danielle Harwell #3438
 DOB:08/29/1980 Today's date: 05/04/2018

with no pain right neck; right lateral bending: WNL 45/45 with no pain left neck. *Posture:* rounded shoulders. *Hypertonicity & Tenderness:* Sub-occipital musculature Left Mild to Moderate; cervical paraspinal musculature Left Mild to Moderate; scalene Left Mild to Moderate; sternocleidomastoid Left Mild to Moderate; pectoralis minor Left Mild; cervical paraspinal musculature Right Mild. *Trigger points:* left levator scapulae, bilateral upper trapezius. *Orthopedic tests:* maximum left lateral compression: Positive left lower neck pain; maximum right lateral compression: Negative. *X-ray findings:* Reviewed X-ray results of the chest and cervical spine from Immediate Care performed on November 1, 2015 with the patient. According to the cervical report, there was mild disc space narrowing at C5-C6 with loss of lordosis. The chest film was read as normal. *Spinal subluxation level(s):* C5, C6, left first rib. *Subluxations detected by:* motion and static palpation.

Thoracic: *Hypertonicity & Tenderness:* Thoracic paraspinal musculature Bilateral Moderate. *Trigger points:* bilateral rhomboids. *Spinal subluxation level(s):* T2, T3, T6, T7, T8, T9. *Subluxations detected by:* motion and static palpation.

Lumbar/Sacral/Pelvis: Reviewed electrodiagnostic testing of the lower extremity which was performed by General Diagnostic Associates on April 25, 2018. According to Dr. Smith, no electrophysiological evidence of an active or chronic lumbar radiculopathy, lumbosacral plexopathy, focal lower extremity entrapment neuropathy, lower extremity peripheral polyneuropathy, or myopathy was observed. *Range of motion:* flexion: 45/60 with pain lower back; extension: 15/25 with pain lower back; left rotation: WNL 30/30 with pain lower back; right rotation: 20/30 with pain lower back; left lateral bending: WNL 25/25 with pain lower back; right lateral bending: 15/25 with pain lower back. *Gait pattern:* normal. *Strength:* left extensor hallucis longus: 4/5; right extensor hallucis longus: 5/5; left tibialis anterior: 5/5; right tibialis anterior: 5/5. *Tenderness & Hypertonicity:* lumbar paraspinal bilateral moderate; TFL / ITB left moderate. *Tenderness on palpation:* left SI: moderate; right SI: moderate. *Trigger points:* left gluteus maximus, right gluteus maximus. *Orthopedic tests:* Straight leg raise: Negative left at 60 degrees; Well leg raise: Negative right at 60 degrees; Bechterew: Negative bilateral. *Spinal subluxation level(s):* L4, L5, Left SI. *Subluxations detected by:* motion and static palpation.

Assessment

Cervical assessment: Based on the current history and examination results, I professionally feel that their current symptoms are causally related to the MVA sustained on October 31, 2015. Mrs. Harwell's neck condition has remained similar to her last visit. **Diagnosis:** M50.222 (other cervical disc displacement at C5-C6 level), M51.26 (Other intervertebral disc displacement, lumbar region), M51.27 (Other intervertebral disc displacement, lumbosacral reg), M54.12 (Radiculopathy, cervical region), S23.3XXA (Sprain of ligaments of thoracic spine, initial encounter), M99.01 (Segmental and somatic dysfunction of cervical region), M99.03 (Segmental and somatic dysfunction of lumbar region), M99.02 (Segmental and somatic dysfunction of thoracic region), M99.05 (Segmental and somatic dysfunction of pelvic region), M54.2 (Cervicalgia), M54.5 (Low back pain), M54.6 (Pain in thoracic spine). **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Cervical MRI performed on 01/04/2016 at Buffalo MRI revealed according to the radiologist a C4-C5 shallow central disc extrusion with disc space narrowing and at C5-C6 shallow central disc extrusion which barely flattens the thecal sac. **CPT code(s):** 98941, 97010.

Thoracic assessment: Mrs. Harwell's middle back condition has remained similar to her last visit. **Differential diagnosis:** Thoracic disc herniation. **Post-treatment analysis:** patient tolerated treatment without incident.

Lumbar assessment: Mrs. Harwell's lower back condition has been slightly worse since her last visit. Her VAS score increased from a 3 to 4 to 5 out of 10. **Prognosis:** Guarded. **Post-treatment analysis:** patient tolerated treatment without incident. **Set backs:** Lumbar MRI performed at Buffalo MRI on 01/04/2016 revealed

Encounter dated 05/01/2018 for Danielle Harwell #3438

DOB:08/29/1980 Today's date: 05/04/2018

according to the radiologist a L1-L2 shallow disc bulge, at L3-L4 desiccated disc and disc space narrowing with facet arthropathy and a shallow disc bulge which results in mild canal narrowing, at L4-L5 desiccated disc with central disc protrusion (herniation) with annular tear which impresses upon the thecal sac with ligamentum flavum prominence which results in mild canal stenosis along with bilateral facet arthropathy and underlying annular bulge which results in mild bilateral recess and neural foraminal narrowing as well and at L5-S1 hypertrophic facet changes with desiccated disc and central to left paracentral disc protrusion (herniation) and annular tear which results in mild to moderate left recess and neural foraminal narrowing and mild right neural foraminal and recess narrowing.

Treatment & Plan

Patient treated to relieve pain, improve ADL, improve function, improve ROM, increase spinal mobility, centralize pain, decrease muscular hypertonicity and tenderness, reduce frequency and intensity of headaches. Visit# 2 of 4 planned treatments. Treatment schedule: 1x/week for 2 weeks; Re-examination for 2 weeks.

Subluxations found on assessment and adjusted: C5 left lateral flexion restriction (Instrument adjustment Arthrostim); C6 left lateral flexion restriction (Instrument adjustment Arthrostim); T2 left rotation restriction (diversified prone, thumb move); T3 left rotation restriction (diversified prone, thumb move); T6 extension restriction (diversified prone); T7 extension restriction (diversified prone); T8 extension restriction (diversified prone); T9 extension restriction (diversified prone); L4 extension restriction (manual traction); L5 extension restriction (manual traction); SI left PI (gentle diversified side posture). Physical Modalities: bilateral cervical heat therapy (15 minutes); bilateral lumbar electric muscle stimulation (15 minutes); bilateral lumbar heat therapy (15 minutes); bilateral cervical paraspinal soft tissue massage; left sternocleidomastoid soft tissue massage; left scalene soft tissue massage; left suboccipital soft tissue massage; left thoracic paraspinal soft tissue massage; bilateral lumbar paraspinal soft tissue massage; left TFL / ITB soft tissue massage; bilateral upper trapezius trigger point therapy; left levator scapula trigger point therapy; left rhomboid trigger point therapy. Patient given: home exercise program: advised patient to perform active cervical rotation exercises 3 sets of 10 daily; home exercise program: advised patient to perform nerve glide exercises 3 sets of 10 daily; home exercise program: advised patient to perform chin tucks 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform standing extension exercises 3 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform CAT / Camel stretches 2 sets of 10 daily hold 5 sec; home exercise program: advised patient to perform single knee to chest exercises 3 sets of 10 daily hold 10 sec; home exercise program: advised patient to perform dog leg stretches 2 sets of 10 daily. Home care: ice: neck / lower back prn for 20 minutes. Additional instructions: Advised patient to monitor for any changes in their symptoms. Short term goals: decrease pain; decreased tenderness; decrease hypertonicity; improved ADL; centralize pain; increase ROM; increase spinal mobility; improve the ability to sit, stand and walk longer with less pain; decrease frequency and intensity of headaches; improve the ability to bend with less pain; improve the ability to lift with less pain; improve the ability to sleep longer with less pain; improve the ability to go from a seated to standing position with less pain. Long term goals: decrease pain; able to perform functional activities with less difficulty; educate the patient to be able to perform home exercises to help relieve and or control pain. Disability status: Temporary partial starting on November 12, 2015 to May 16, 2018 with the restrictions of no lifting greater than 15lbs and no repetitive bending or lifting. In addition, she has been advised to refrain from reaching above the shoulder.

Postscript This report was generated using an electronic medical record system. Despite our diligent efforts, misspelling may be part of this report. Please feel free to contact our office at 716-681-3333 if you need further clarification.

FACIAL PAIN &
APNEA/APPLIANCE
THERAPY

May 21, 2018

Patient: Danielle Harwell

DOB: August 29, 1980

Exam date: May 21, 2018

Patient presents Complete biometric assessment of mandibular function, including jaw tracking, joint vibration analysis, and surface EMG. This test is medically necessary.

Mrs. Harwell's chief complaints included jaw locking, sensation of malocclusion (patient indicates "bite feels off"), limited mouth opening, jaw pain, headaches, TMJ clicking and ear pain.

The patient reported allergic reactions to clindamycin, Environmental allergies, biaxin, Food allergies, latex, soma, penicillin, cipro, Other antibiotics:, ranidin, sulfa drugs, codeine and Keflex. She is currently taking claritin, magnesium, pantoprazole and vitamin d3. **SIGNIFICANT MEDICAL HISTORY:** Past Anxiety, low blood pressure, heart murmur, current pregnancy, sinus problems, Ulcers and Recent weight loss. Current acid reflux, anemia, arthritis, asthma, autoimmune disorder, bruising easily, chronic pain, Digestive issues, dizziness, Headaches and osteoarthritis.

Past surgical procedures include hnc, gallbladder, nasal and tonsillectomy.

Family History: cancer, heart disease, diabetes, high blood pressure and stroke.

Patient's data on use of the orthotic:

No change, medical history

Current pain = 5 out of ten.

Average pain = 6 out of ten, over the past (since last visit)

Pain Free Opening = 42 mm

Maximum Unassisted Opening = 52 mm

Areas tender to palpation: R TMJ, R mastoid process, R Stylomandibular ligament

Patient is using upper appliance without problems

Condition of appliances: Not present today

Fit and feel of lower appliance: Good

Current appliance use protocol: wearing NTI at night

Overall effect on facial / TMJ pain: No change

Overall effect on headaches: No change

Overall effect on jaw function: No change

Effect on TMJ clicking: No change

Alginate impressions taken for fabrication of orthotic. Plan for fabrication and delivery of Lower Gelb, Upper Farrar (Completed chairside. Posture derived bite).

EMG AT REST, All muscles normal (less than 2 microvolts) with the exception of hyperactive muscles: Temporalis (left), Masseter (left). Hyperactive temporalis & masseter unilaterally indicative of unilateral overclosure.

EMG PLAIN CLENCH, All muscles demonstrate weakness (force less than 100 microvolts). All muscles demonstrate normal clenching force (greater than 100 microvolts) with the following exceptions: Notably weak muscle force. Temporalis muscle exerting more force than the masseter muscle on both sides;

indicative of imbalance and retrusive force on mandible. Delayed muscle recruitment evident: Yes, Muscle fatigue evident: Yes. Prolonged silent period of approximately 30 ms milliseconds observed, indicative of chronic muscle dysfunction, often associated with excessive clenching.

EMG POSTERIOR CLENCH, Muscle force generally weaker than plain clench. Weak muscles: All masticatory muscles less than 100 mv. Weakness in plain clench and with posterior support indicative of truly weak muscles, not just central inhibition due to pain. Muscle force symmetry worse than plain clench. Dominance of temporalis muscle over masseter improved. Temporalis muscle exerts significantly more force than masseter on the left. Improvement in muscle fatigue over plain clench: No, Improvement in after spiking over plain clench: No, Improvement in silent period duration over plain clench: Yes, Comments: right masseter dominant over left.

EMG POSTERIOR CLENCH WITH POSTURE CORRECTION, Muscle force generally greater than posterior clench with uncorrected posture. Muscle symmetry generally better than posterior clench with uncorrected posture. Dominance of temporalis muscle over masseter improved, relative to posterior clench with uncorrected posture. Improvement in muscle fatigue, relative to posterior clench with uncorrected posture: Yes, Improvement in EMG after spiking, relative to posterior clench with uncorrected posture: No,

EMG ANTERIOR CLENCH, Muscle force generally weaker than plain clench. Muscle force generally weaker than posterior clench. Weak muscles: All masticatory muscles below 100 mv. Muscle symmetry improved relative to plain clench and posterior clench. Masseters dominant over temporalis muscles.

EMG MASTICATION, RIGHT SIDE, Muscle force during chewing: Right temporalis >> left temporalis >> right masseter >> left masseter. Deviates from normal healthy pattern, indicating muscle incoordination.

EMG MASTICATION, LEFT SIDE, Muscle force during chewing: Left temporalis >> right temporalis >> left masseter >> right masseter. Deviates from normal healthy pattern, indicating muscle incoordination.

JVA / JT METERED, Impression of opening and closing pattern: Opening and closing initially smooth but deteriorate over time. Condition of right joint per BioPak flowchart: Chronic Disc Displacement with advanced Degenerative Joint Disease (Piper 4b, 5a). Condition of left joint per BioPak flowchart: Chronic Disc Displacement Adapted (Piper 4b). Comments on right side using FFT chart: Suggestive of multiple pronounced clicks with significant degenerative joint disease. Comments on left side using FFT chart: Distinct sharp click, mild evident degenerative disease.

JVA / JT PHONATION, Range of motion: Normal opening while speaking of approximately 16 mm. Patient has a tendency to speak mostly on the left side. Patient maintains normal range of motion while speaking relative to occlusion. Comments: Left joint noise evident.

JT RANGE OF MOTION / VELOCITY, Maximum opening 31.6 mm. Deflection of 1 mm. (To the right, less than 3 mm, normal). Right excursion 8.6 mm. Left excursion 5 mm. Asymmetry noted in right and left excursions. Velocity: Distinct drop in velocity at mid opening, consistent with reducing disc.

JT MASTICATION, RIGHT, General impression of frontal chewing pattern, right side: Narrow "banana" pattern with upper portion on right side and majority of chewing, including turning point, on left, suggesting acute disc displacement without reduction on left side. General pattern of mandibular velocity while chewing on right: Concavity midway on opening indicative of internal derangement.

JT MASTICATION, LEFT, General impression of frontal chewing pattern, left side: Notably restricted (laterally) pattern with nearly all chewing limited to left side, suggesting disc displacement on right side. General pattern of mandibular velocity while chewing on left: Concavity midway on opening indicative of internal derangement.

Most notable findings of biometric testing: Weakness and incoordination in clenching, significant improvement with posture and posterior support. Temporalis dominance in chewing. Significant degeneration in right joint, disc displacement in both joints. Testing confirms a muscle and joint based TMJ disorder.

FACIAL PAIN &
APNEA/APPLIANCE
THERAPY

June 20, 2018

Patient: Danielle Harwell
DOB: August 29, 1980
Exam date: June 20, 2018

Patient presents for delivery of an orthotic.

Mrs. Harwell's chief complaints included jaw locking, sensation of malocclusion (patient indicates "bite feels off"), limited mouth opening, jaw pain, headaches, TMJ clicking and ear pain.

The patient reported allergic reactions to clindamycin, Environmental allergies, biaxin, Food allergies, latex, soma, penicillin, cipro, Other antibiotics:, ranidin, sulfa drugs, codeine and Keflex. She is currently taking claritin, magnesium, pantoprazole and vitamin d3. **SIGNIFICANT MEDICAL HISTORY:** Past: Anxiety, low blood pressure, heart murmur, current pregnancy, sinus problems, Ulcers and Recent weight loss. Current: acid reflux, anemia, arthritis, asthma, autoimmune disorder, bruising easily, chronic pain, Digestive issues, dizziness, Headaches and osteoarthritis.

Past surgical procedures include dnc, gallbladder, nasal and tonsillectomy.

Family History: cancer, heart disease, diabetes, high blood pressure and stroke.

Orthotic Delivery: Delivery date: 06/20/2018, orthotic design: Definitive orthopedic appliance, medically necessary. Changes since previous visit: Pt in another Car accident 5/22/18. Provided patient with a copy of "Blue Book" outlining therapy plan, instructions for care and maintenance of orthotic, and home care instructions. Reviewed relevant information. Orthotic care and instructions provided. Upper orthotic design: Farrar. Upper instructions: wear at night. Lower orthotic design: Gelb. Lower instructions: Wear during day as much as possible. Fabricated chairside. Next appointment: Two weeks.

Patient was in another MVA 5/22/18: Was driving on Cleveland Drive, stopped at red light, proceeded when light turned green. Hit on right by another car which was running the red light. Car was pushed into another car. Patient hit head and lost consciousness. Pt was driving. Three people in car were taken by ambulance to ECMC. Did ultrasound and MRI of neck and back. Being evaluated currently for spine. Loss of right side peripheral vision. Concussion diagnosed by Dr. McVige, possible other brain injuries. Waiting on additional MRI. No change in jaw pain.

July 02, 2018

Patient: Danielle Harwell

DOB: August 29, 1980

Exam date: July 02, 2018

Patient presents for follow-up visit after orthotic delivery.

Mrs. Harwell's chief complaints included jaw locking, sensation of malocclusion (patient indicates "bite feels off"), limited mouth opening, jaw pain, headaches, TMJ clicking and ear pain.

The patient reported allergic reactions to clindamycin, Environmental allergies, biaxin, Food allergies, latex, soma, penicillin, cipro, Other antibiotics:, ranidin, sulfa drugs, codeine and Keflex. She is currently taking claritin, magnesium, pantoprazole and vitamin d3. **SIGNIFICANT MEDICAL HISTORY:** Past: Anxiety, low blood pressure, heart murmur, current pregnancy, sinus problems, Ulcers and Recent weight loss. Current: acid reflux, anemia, arthritis, asthma, autoimmune disorder, bruising easily, chronic pain, Digestive issues, dizziness, Headaches and osteoarthritis.

Past surgical procedures include dnc, gallbladder, nasal and tonsillectomy.

Family History: cancer, heart disease, diabetes, high blood pressure and stroke.

Patient's data on use of the orthotic:

No change, medical history

Current pain = 4 out of ten.

Average pain = 6 out of ten, over the past (two weeks)

Pain Free Opening = 37 mm

Maximum Unassisted Opening = 51 mm

Mild tenderness was elicited upon palpation of the Masseter - Insertion bilaterally, Masseter - Origin on the right, lateral TMJ capsule bilaterally, Lateral Pterygoid bilaterally, posterior joint space bilaterally, anterior temporalis bilaterally, temporal tendon on the left, middle temporalis bilaterally, Mastoid process bilaterally and posterior temporalis bilaterally. Moderate tenderness was elicited upon palpation of the stylomandibular ligament bilaterally and temporal tendon on the right.

Patient is using upper appliance without problems

Patient is using lower appliance without problems

Condition of appliances: Good

Fit and feel of upper appliance: Fair

Fit and feel of lower appliance: Fair - lower right slightly loose

Changes / adjustments made to appliance: Tightened lower

Current appliance use protocol: Wearing Farrar appliance at night routinely, Gelb during the day

Overall effect on facial / TMJ pain: No change

Overall effect on headaches: No change

Comments on headaches: Less frequent and less intense

Overall effect on jaw function: Somewhat more limited

Effect on TMJ clicking: No change

Comments on joint sounds: Clicking bilaterally but more prominent on right side.

Improvement in headaches – still significant pain similar to pre-treatment. Pt pleased with progress so far.

Next visit: One month

Follow up evaluation level 3

(Office visit consisting of expanded problem focused history or expanded problem focused examination, and medical decision making of low complexity; presenting problem of low to moderate severity; approximately 15 minutes face-to-face with patient) (CPT 99213).

Maintenance and periodic evaluation are medically necessary in the long term management of facial pain.

APPROVED OMB-0938-1197 FORM 1500 (02-12)

April 23, 2018

Patient: Danielle Harwell

DOB: August 29, 1980

Exam date: April 23, 2018

Referring Physician: Dr. Jennifer McVige

SUBJECTIVE

Patient presents for evaluation of a possible temporomandibular joint (TMJ) disorder following motor vehicle accident.

Mrs. Harwell's chief complaints included jaw locking, sensation of malocclusion (patient indicates "bite feels off"), limited mouth opening, jaw pain, headaches, TMJ clicking and ear pain.

Additional description of chief complaint: Jaw pain, popping, occasional open locking since MVA. Ear pain. Referred by neurology for TMJ assessment. Headaches. No prior history of TMJ issues. History of current condition: MVA 10/31/2015. Patient was stopped n Kenmore Avenue behind a truck. 4 car accident occurred, with 3 cars in a row rear-ended behind her. Struck from behind, did not hit anything in front of her. Did not lose consciousness. Went to Immediate Care (Delaware Avenue) the following day, x-rays taken, diagnosed as whiplash. Was later told by physicians she had two herniated discs in neck, two herniated discs in lower back, concussion. Developed headaches, jaw pain. Subsequent treatment has included botox, trigger point injections, and other headache care at Dent. Chiropractic care and massage. Injections and epidurals for pain management. Primary pain location: right. Patient indicates (pointing with finger) that pain is centered at TMJ. Joint sounds: Constant popping on right. Very rare popping on left. Temporal pattern: None. Condition is worse with stress: Yes. Previous treatment: No prior history of TMJ issues. Was seen one time by another TMJ specialist, ordered MRI, pt did not wish to continue with him,. Patient is aware of parafunctional activity consisting of Grinding - Nocturnal. Eccentric jaw posture at times. History of head and neck surgery: None. Trauma history: MVA 10/31/15 - no other history of significant facial, head or neck trauma. Recent dental work includes None. Additional headache notes: Rare minor headaches prior to accident, did not require treatment.

Mrs. Harwell has symptoms since 10/31/2015. Patient reports that the problem appears to have started with car accident. Activities which make the condition worse include talking, eating. Massage appears to improve the condition. Progression is described as getting worse over time. Quality of pain is described by patient as Aching. The pain typically lasts "Variable". The patient indicates a pattern wherein the condition is best described as Steady throughout day. Jaw is painful with opening (bilateral), painful with chewing (bilateral). Current pain level is 5 out of ten. Average pain level for the past six months is 5 out of ten. Worst pain level in the past six months is 7 out of ten. The patient is aware of joint clicking on both sides. There is pain associated with the jaw clicking. The patient reports the sensation of a recent occlusal change. The patient reports a limited or restricted jaw opening. Lateral mandibular movement feels limited or reduced. The patient has experienced an open lock.

The headaches affect the following areas of the head: temples (bilateral), the entire head, vertex of the head, occipital region. The patient indicates a history of migraines. The migraines were formally diagnosed by Dr Peter Guzinski. Additional headache information provided by the patient: "Dr Jennifer McVige." The patient typically sees a dentist Emergencies only. At this time, the patient reports that her teeth are sensitive to temperature. The patient reports xerostomia. Orthodontia history includes None. The patient reports ear pain (bilateral), tinnitus (bilateral), ear fullness (bilateral), dizziness or vertigo, eye pain (bilateral), blurred vision (bilateral). There is a feeling of a foreign object in the throat. Neck pain is reported by the patient. The patient reports back pain. There is numbness reported in the hands or fingers. There is a sensation of tingling in the hands or fingers. The patient states the following about his or her posture: "good." Overall sleep quality is described as 3 out of ten. Patient snores. The pain causes waking during the night.

To the question, How often are you tense, aggravated, or frustrated during a usual day? patient responded Half the time. The patient reports feeling depressed Seldom. To the question, Do you have thoughts of hurting yourself or committing suicide? the patient responded: No.

OBJECTIVE

Cranial nerve screening revealed a possible deficit in the following nerves: #11 (spinal accessory) - Right shoulder weakness.. Otherwise all cranial nerves within normal limits. The patient is alert, attentive, and oriented. Speech is clear and fluent. Patient is able to detect and identify odor in both nostrils. Pupils are normal, equal, and reactive to light. At primary gaze, there is no eye deviation. Normal and coordinated tracking through six cardinal positions. No signs of diplopia.. No evident nystagmus or ptosis. Facial sensation is intact to cotton in all three divisions of trigeminal nerve bilaterally. Face is symmetric with normal eye closure and facial expression. No evident facial weakness. Hearing is normal to rubbing sticks. Palate elevates symmetrically. Phonation is normal. Gag reflex is normal. Head turning and shoulder shrug with resistance are intact. Tongue protrudes in midline with normal movements and no atrophy. and

No tenderness was elicited upon palpation of the Trapezius bilaterally, sternocleidomastoid bilaterally, lateral TMJ capsule on the left, Lateral Pterygoid bilaterally, posterior joint space bilaterally, middle temporalis bilaterally, anterior temporalis bilaterally, posterior temporalis bilaterally, Mastoid process bilaterally and Splenius Capitis / Cervical Insertions bilaterally. Mild tenderness was elicited upon palpation of the Masseter - Insertion bilaterally, Masseter - Enthesis bilaterally, lateral TMJ capsule on the right, temporal tendon bilaterally, stylomandibular ligament on the left and Masseter - Origin bilaterally. Severe tenderness was elicited upon palpation of the stylomandibular ligament on the right.

Comprehensive orofacial examination revealed:

Blood Pressure: 122/62.
Heart rate: 92 BPM.
Facial appearance: Normocephalic / symmetric.
Opening click observed on the right.
Opening pattern: Deviates Left, with correction.
The opening pattern is consistent: Yes
Pain free opening: 44 mm.
Maximum unassisted opening: 50 mm.
Maximum assisted opening: 51 mm.
End feel of assisted opening: Normal.
Wide opening produces pain at Right TMJ.
Right lateral excursion: 4 mm.
Left lateral excursion: 8 mm.
Protrusion: 1 mm.
Mandibular midline 3 mm deviated from maxillary. (To the right)
Maxillary midline consistent with facial midline
All oral soft tissue within normal limits, including buccal mucosa, floor of mouth, and lateral tongue.
Tongue: Class 3: average to large, above occlusal plane.
Tori: none.
Palate: Hard and soft palate normal.
Mallemptati throat form: 4.
Symmetrical rise of soft palate observed.
Periodontal condition: Fair.
Signs of dental wear: none.
Dental prosthesis present: None.
Occlusal class II.
Overjet of 4 mm.
Overbite of 3 mm.
Missing teeth 1,2,32.
Fractures of teeth 18,19,20,30 observed.

Cervical range of motion measurements indicated normal range of motion with pain free rotation, extension, flexion and side bend, with the following exceptions: pain on rotation to both side. pain on side bend to both shoulder.

Panoramic and bilateral TMJ radiographs at initial visit reveal: Compressed joint space (bilateral). Pronounced antegonial notching (bilateral). Pt aware of several fractured lower teeth requiring extraction. MRI 5/5/16 reviewed - indicates disc displacement with reduction on right, normal on left.

The patient reported allergic reactions to clindamycin, Environmental allergies, biaxin, Food allergies, latex, soma, penicillin, cipro, Other antibiotics; ranidin, sulfa drugs, codeine and Keflex. She is currently taking claritin, magnesium, pantoprazole and vitamin d3.

SIGNIFICANT MEDICAL HISTORY: Past: Anxiety, low blood pressure, heart murmur, current pregnancy, sinus problems, Ulcers and Recent weight loss. Current: acid reflux, anemia, arthritis, asthma, autoimmune disorder, bruising easily, chronic pain, Digestive issues, dizziness, Headaches and osteoarthritis.

Past surgical procedures include doc, gallbladder, nasal and tonsillectomy.

Family History: cancer, heart disease, diabetes, high blood pressure and stroke.

Social History: Occupation: homemaker. Cigarettes: The patient denies ever smoking. Alcohol: None. Caffeine: None. Reported weight: 200 pounds, Weight change in past two years: Gain of more than 10 pounds, Ethnic background: Caucasian / white.

ASSESSMENT

My working diagnosis is Disc displacement with reduction (right side) (ICD M26.631), myofascial pain / myalgia (right side) (ICD M79.1). Based on history and examination, the patient's condition appears to be attributable to the motor vehicle accident.

PLAN

Procedures performed: New patient exam level 3

(Patient was referred for evaluation. Office visit consisting of detailed history, detailed examination, and medical decision making of low complexity; presenting problem is of moderate severity; at least 40 minutes engaged in face-to-face examination, history taking, and counseling; counseling and/or coordination of care account for more than 50% of this time). Panoramic radiograph, TMJ lateral radiographs (bilateral, open and closed),

Recommendation of a soft diet, application of heat to painful area, hydrate, avoid chewing gum, minimize caffeine.

Instruction provided in therapeutic exercise (classic 5x5)

Provided patient with a copy of "Blue Book" outlining progressive therapy approach, instructions for care and maintenance of orthotic, and home care.

Immediate oral orthotic for parafunctional control (NTI type)

The treatment plan consists of Complete Biometric evaluation and review (including jaw tracking, facial EMG, joint vibration analysis). Immediate occlusal orthotic / deprogramer (NTI type), Lower occlusal appliance (Gelb anterior positioning type) and Upper occlusal orthotic (Farrar anterior positioning type).

We would like to see the patient in 4 weeks.

This patient has symptoms for which proper evaluation and therapy are medically necessary.

June 20, 2018

Patient: Danielle Harwell
DOB: August 29, 1980
Exam date: June 20, 2018

Patient presents for delivery of an orthotic (D7880 x 2, UPPER AND LOWER)

Mrs. Harwell's chief complaints included jaw locking, sensation of malocclusion (patient indicates "bite feels off"), limited mouth opening, jaw pain, headaches, TMJ clicking and ear pain.

The patient reported allergic reactions to clindamycin, Environmental allergies, biaxin, Food allergies, latex, soma, penicillin, cipro, Other antibiotics: ranidin, sulfa drugs, codeine and Keflex. She is currently taking claritin, magnesium, pantoprazole and vitamin d3. **SIGNIFICANT MEDICAL HISTORY:** Past: Anxiety, low blood pressure, heart murmur, current pregnancy, sinus problems, Ulcers and Recent weight loss. Current: acid reflux, anemia, arthritis, asthma, autoimmune disorder, bruising easily, chronic pain, Digestive issues, dizziness, Headaches and osteoarthritis.

Past surgical procedures include dnc, gallbladder, nasal and tonsillectomy.

Family History: cancer, heart disease, diabetes, high blood pressure and stroke.

Orthotic Delivery: Delivery date: 06/20/2018.

Orthotic design: Definitive orthopedic appliance, medically necessary. Changes since previous visit: Pt in another Car accident 5/22/18. Provided patient with a copy of "Blue Book" outlining therapy plan, instructions for care and maintenance of orthotic, and home care instructions. Reviewed relevant information. Orthotic care and instructions provided.

Upper orthotic design: Farrar. Upper instructions: wear at night.

Lower orthotic design: Gelb. Lower instructions: Wear during day as much as possible. Fabricated chairside. Next appointment: Two weeks.

Patient was in another MVA 5/22/18: Was driving on Cleveland Drive, stopped at red light, proceeded when light turned green. Hit on right by another car which was running the red light. Car was pushed into another car. Patient hit head and lost consciousness. Pt was driving. Three people in car were taken by ambulance to ECMC. Did ultrasound and MRI of neck and back. Being evaluated currently for spine. Loss of right side peripheral vision. Concussion diagnosed by Dr. McVige, possible other brain injuries. Waiting on additional MRI. No change in jaw pain.

Patient Name: Danielle Harwell
Date of Birth: 08/29/1980
No-Fault Carrier: NF Geico
CL#: 0138739400101059
Date of Injury: 10/31/15

Psychiatry Re-evaluation: July 18, 2018

Chief Complaint(s): Low back pain.

Dear Dr. Panzarella:

I had the pleasure of seeing Danielle in our Park Club office for re-evaluation on July 18, 2018.

HISTORY/CHIEF COMPLAINT

This is a 37-year-old female presenting today for re-evaluation. She was last evaluated on April 11, 2018. At that time we reviewed an MRI of the lumbar spine due to the patient's pain, weakness and numbness encompassing the left leg. At that point she was initiated on gabapentin 300 mg, which she is now taking twice daily. She does tolerate this medication and feels that it provides relief. A small supply of hydrocodone was given at that appointment; however, she is no longer using this. She is also utilizing ibuprofen with some benefit. The patient states she was doing fairly well, noting improvement in her left leg numbness, until a subsequent car accident. She will not be seen for the symptoms related to this, as it is out of the scope of today's evaluation. She rates her pain score today 6/10 on the visual analog scale. Coughing, standing, lifting, lying down and walking worsen her pain. She states that any position or any activity for any length of time causes her increased pain, so she has to switch positions and activities often. Other than as noted above, there are no changes to her health history or reported medications. Results of an EMG/nerve conduction study will be reviewed below.

REVIEW OF SYSTEMS

Notable for joint pain and headaches. She reports neck pain since her most recent motor vehicle accident.

PHYSICAL EXAMINATION

BP: 145/89 Pulse: 106 Resp: 16 Ht: 63" Wt: 215lb BMI: 38.1

General: A 37-year-old female, in no acute distress. She is awake, alert and appropriate. Speech is fluent and coherent.

HEENT: Normocephalic, atraumatic. Lips, tongue and mucous membranes are pink and moist.

Cardiovascular: Normal S1, S2.

Abdomen: Soft, non-distended, obese.

Neuromusculoskeletal: The patient has tenderness to palpation of the cervical paraspinal muscles, trapezius and lumbar paraspinal muscles bilaterally. Range of motion of the cervical spine does create pain in all movements. Her lower extremity strength is relatively well maintained with improvement in sensation through the left leg when compared to her previous evaluation. Straight leg raise sign is positive in the seated position bilaterally. Gait is mildly antalgic.

Psychiatric: Judgement and cognition appear to be within normal limits.

REVIEW OF DIAGNOSTIC STUDIES

An EMG/nerve conduction study completed at General Diagnostic Associates dated April 25, 2018, report reviewed showing no electrophysiologic evidence of active or chronic lumbar radiculopathy. No evidence of lumbosacral plexopathy, focal lower extremity entrapment neuropathy or lower extremity polyneuropathy.

ASSESSMENT

M47.26 - Other spondylosis with radiculopathy, lumbar region, M51.26 - Other intervertebral disc displacement, lumbar region, M51.36 - Other intervertebral disc degeneration, lumbar region

IMPRESSION/RECOMMENDATIONS:

This is a 37-year-old female with low back pain and left greater than right lower extremity symptoms in the setting of lumbar disc bulging/herniations L3-4 through L5-S1, lumbar disc space narrowing and disc desiccation L3-4 and mild central stenosis L3-4 through L5-S1. Her symptoms are causally related to a motor vehicle accident on October 31, 2015. The patient informs me at today's evaluation that she was involved in a more recent motor vehicle accident. This was not discussed in depth, as it is out of the scope of today's evaluation. At this time we advised the patient she may no longer be a candidate for interventional procedures, as she had poor results with her most recent procedure. She was given a referral to alternative physiatry practices should she wish to establish with them. The patient would like to think about this and contact our office for further recommendations as needed. We will continue gabapentin at this time; however, in the future, this should be taken over by whomever moves forward with this patient's care. She will continue with ibuprofen at this time. The patient expressed understanding and agreement with today's plan of care.

The material risks, benefits, side effects and alternatives with the above named procedure were discussed with the patient today. These include, but are not limited to, injection site pain, bleeding, bruising, infections, damage to targeted or non-targeted tissue, increased pain, nerve injury or other reaction. In rare cases potentially serious reactions such as a CVA, arrhythmia, or death may occur. The patient was given procedure instructions for this specific purpose at the time of the visit.

Thank you for allowing me to participate in Danielle's care. If you have any questions or concerns regarding this patient, please do not hesitate to contact me at your earliest convenience.

Danielle Harwell DD 07/18/2018
